

5 Best Logo Design Apps on Mobile Phones

Besides professional graphic design software, users now have more apps that help create logos quickly and easily. Many apps don't even require graphic design skills. So, what are the best logo design apps on mobile? Let's take a look at the list below.

A **logo** is an important symbol representing the image of an individual or group. It helps customers and partners distinguish you from other companies or businesses. If you have the ability to design, creating your own logo using professional graphic design software such as Adobe Photoshop, Adobe Illustrator, AutoCAD, Corel Draw, etc., is not difficult.

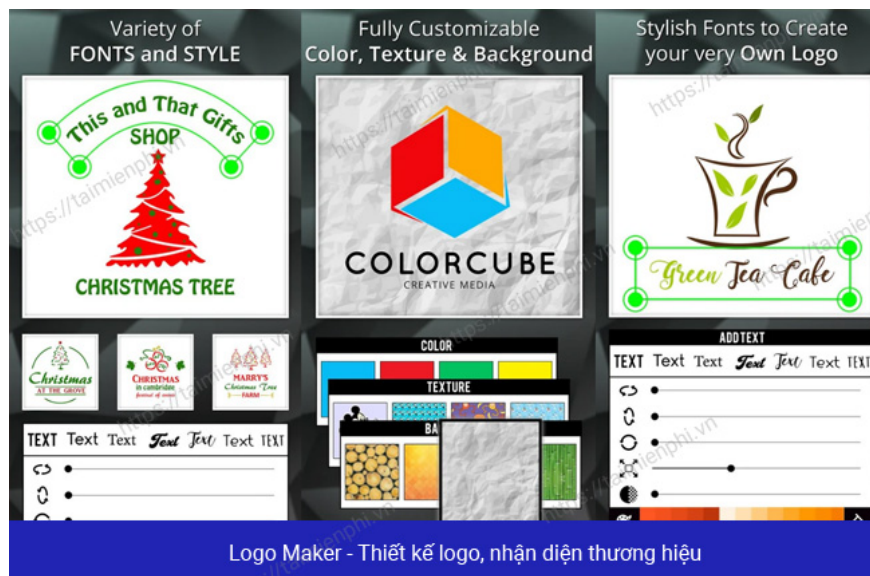

The best logo design app on mobile phones.

However, even if you know nothing about design or graphic design software, you can still create impressive and beautiful logos right on your phone in a few minutes.

1. Logo Maker - Logo Creator, Generator & Designer

Logo Maker is an incredibly impressive **logo design app** . The app provides users with everything they need to express their design ideas.

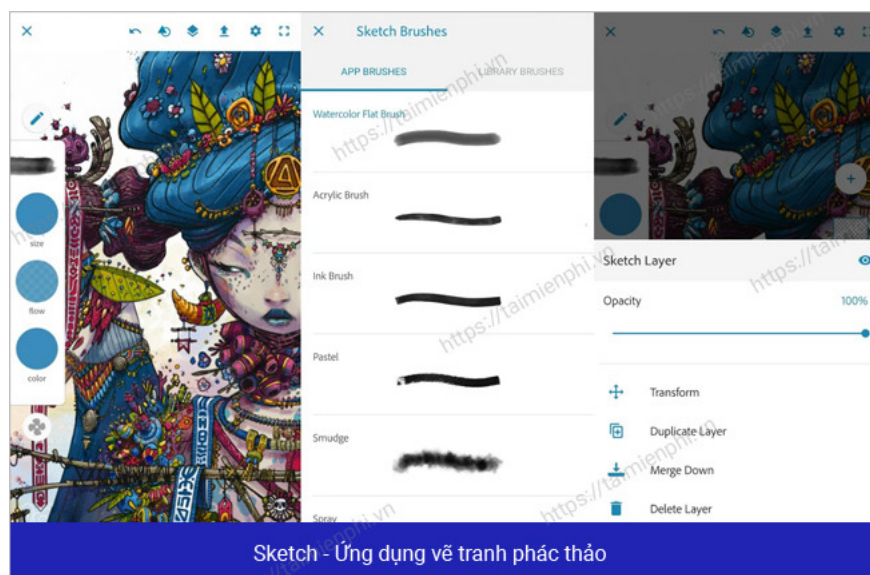

Logo Maker - Thiết kế logo, nhận diện thương hiệu

Logo Maker offers a library of graphic resources such as shapes, patterns, and backgrounds to create a logo design in the shortest time. For further enhancement or fine-tuning, Logo Maker provides powerful image editing features such as: changing fonts, resizing, color filters, 3D rotation, and more.

Logo Maker is not just a **logo design app** on your phone; designers also use it to create posters, cover photos, social media advertisements, and more.

2. Sketch - Draw & Paint

The Sketch app is a product of the well-known brand Sony. Sketch provides users with a drawing and photo editing tool suitable for any user. It's also a powerful application if you want to design logos on your phone.

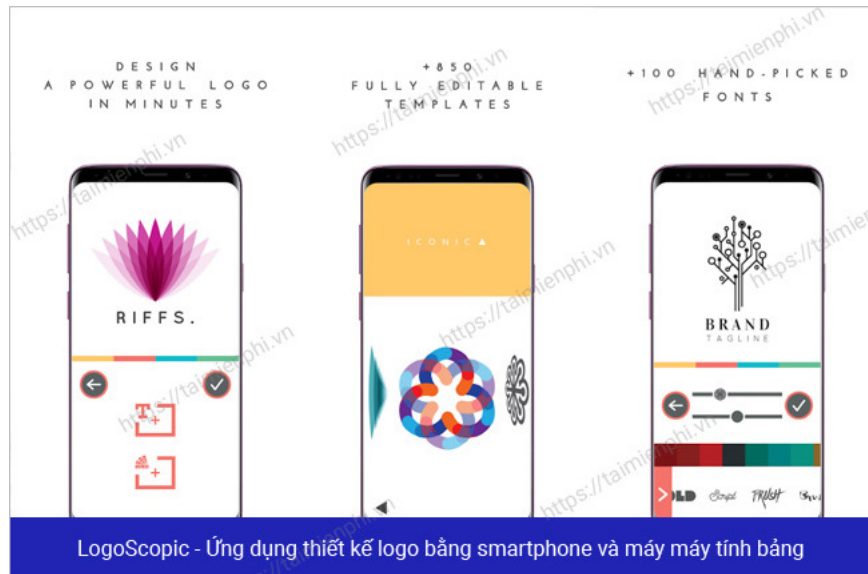

Sketch - Ứng dụng vẽ tranh phức tạp

Sketch 's interface is designed to be clean and spacious, providing ample room for users to create sketches. Supporting tools such as zoom, pen, ruler, eraser, and color are neatly arranged at the bottom, making it easy to find the tool you need without wasting time searching.

Another advantage of Sketch is its ability to back up and synchronize across all devices. This ensures that your logo design process is seamless and uninterrupted, no matter where you are or what time it is.

3. *LogoScopic Studio - Logo Maker*

As its name suggests, LogoScopic Studio brings a complete design studio with all the professional tools into your phone. This app provides a seamless design process, allowing you to create a complete logo yourself, even without any prior experience.

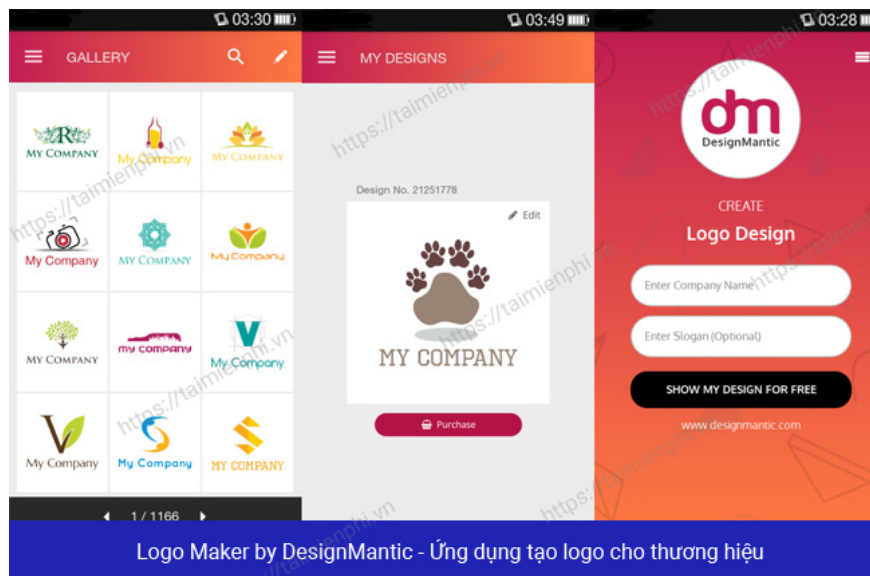

LogoScopic Studio provides users with a wide variety of logo templates categorized by specific themes and over 200 different fonts to assist them in the design process. You can refer to, combine, or modify these elements to create your own unique logo design.

Finally, this **logo design application** allows you to export your logo file in high quality for use in large-format printing.

4. *Logo Maker by DesignMantic*

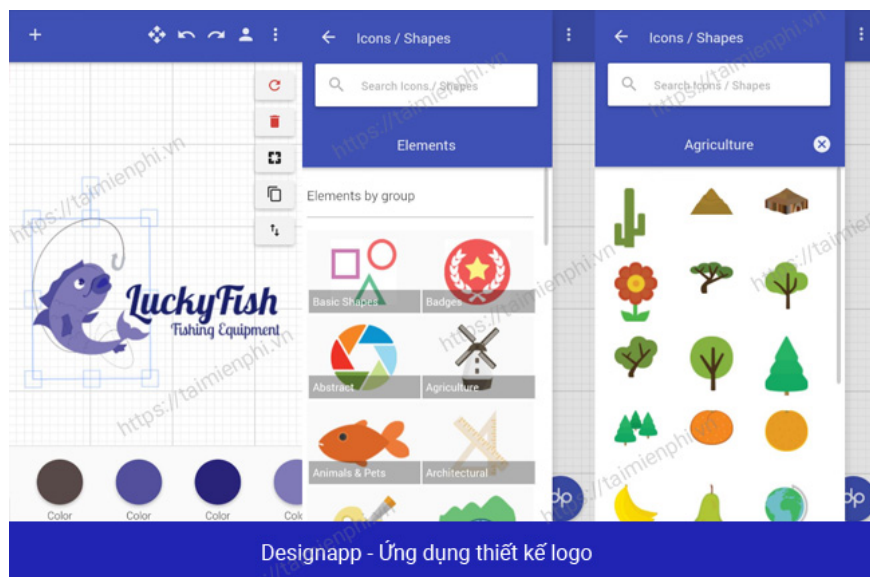

The DesignMantic app is one of the simplest and most convenient tools to help you design a logo on your phone in just 3 steps.

First, you choose a pre-designed template. DesignMantic has prepared many options to meet your logo design needs for branding, business, and more. Second, you customize the logo to your liking. This tool also allows you to choose based on your own ideas. Finally, in the third step, you simply download your finished product as a JPG, PNG, or PDF file and use it wherever you want.

5. Designapp Graphics Design

Similar to the **logo design apps** on mobile phones that we just introduced, DesignApp also develops features to provide maximum support, helping users create a high-quality logo without spending too much time.

Using Designapp, you work with completely free graphic design resources, including over 1000 diverse templates ranging from shapes, badges, and icons, all essential for logo design. All these templates and details are vector files, meaning your final product will have high resolution and can be printed in large sizes.

If you're a professional designer, don't hesitate to showcase your logo to the Designapp user community. You might even sell your design at an attractive price.

If you want to create a professional logo yourself quickly and affordably, the **5 logo design apps** for mobile phones that Taimienphi has just introduced are the best choices. Hopefully, after reading this article, you will soon choose a tool that suits you and create beautiful and impressive logo designs. Good luck!
