Tired of tangled cords and outlet battles? Eliminate clutter with a multi-port USB charger. These compact devices keep your phone, tablet, laptop, etc. organized, freeing up outlets and helping you avoid unnecessary clutter.

UGREEN Nexode 140W USB-C GaN charger

UGREEN is giving long-standing charging brands like Anker a run for their money with innovative products like the Nexode 140W USB-C GaN charger. This power-packed device has a 140W output, providing lightning-fast charging for demanding laptops like the 16-inch MacBook Pro, while ensuring efficient and safe operation with GaN technology. .

But Nexode's power goes far beyond charging a device. Its dynamic power distribution ensures optimal charging for multiple devices. Even with three devices plugged in, it maintains a higher output of up to 65W over two USB-C ports and up to 22.5W over USB-A, so you can rely on this charger to quickly top up. power your devices, no matter how many devices you have.

UGREEN Nexode 35W USB-C GaN charger

If you're looking for an affordable, versatile charger that can handle all of your mobile devices, the Nexode 35W USB-C GaN charger from UGREEN is a great choice. This compact and travel-friendly charger boasts USB-C and USB-A ports, allowing you to power both new and older devices simultaneously on the go or at home.

It delivers up to 25W and 7.5W for dual device charging and goes up to 35W for single device charging, providing enough power to charge not only your phones and tablets but also lightweight laptops, like MacBook Air. Additionally, PPS charging support means you can quickly charge your Pixel 8 Pro or Galaxy S23 Ultra without needing a separate charger.

Anker 735 charger (Nano II 65W)

Looking for a compact and powerful charger that can handle three devices at once? The Anker 735 charger (Nano II 65W) may be the perfect choice. Although its power is slightly less than that of the UGREEN Nexode 140W, its surprisingly affordable price makes it an attractive choice.

Two USB-C ports provide up to 40W and 12W of power when used at full capacity and up to 65W for a single device, ensuring fast charging for most laptops, phones and handheld devices such as the Steam Deck. You can even power a low-power device like a headset or camera thanks to the third USB-A port. And rest assured, Anker's reliability and advanced features like GaN technology keep your devices protected and charged efficiently.

UGREEN Nexode 100W USB-C GaN charger

Whether you need to charge 2 laptops or power 4 devices at the same time, this 4-port 100W charger from UGREEN meets your needs. Not only does it free up valuable sockets, but it also minimizes clutter on your socket or bag thanks to its GaN technology and foldable plug.

The UGREEN Nexode 100W USB-C GaN charger delivers a full 100W of power when charging a device, making it suitable for everything from 13-inch to 15-inch laptops. While charging four devices will naturally slow things down, you can still expect between 30W and 45W of power from the two USB-C ports, enough to power laptops, tablets, and phones. 13 inch smart. The remaining ports will keep your smartwatch and other peripherals continuously charged.

Anker 7-in-1 USB-C Charging Station (100W)

Instead of plugging directly into an outlet, Anker's 7-in-1 USB-C Charging Station (100W) fits neatly on a table or nightstand, allowing you to charge up to 7 devices at once. It's perfect if you want easy access to your device while it charges. Plus, you never have to grope for an outlet, especially at night.

Two USB-C ports power the laptop, while two USB-A ports and three AC outlets help power the rest of your devices for a combined output of 100W. If you need more power, the UGREEN Nexode GaN 200W charger is a pricier alternative, but it doubles the power and number of USB-C ports, allowing you to handle more devices, especially Especially laptops consume electricity.
