

5 best selling netbooks in Vietnam

The following netbooks have asserted themselves in the domestic market because of their own strengths in design, features and healthy batteries.

The following netbooks have asserted themselves in the domestic market because of their own strengths in design, features and healthy batteries.

Netbooks have been on the world market since 2007, but a year later really exploded. Here are 5 best-selling models in Vietnam in the past.

1. Acer Aspire One

The Acer Aspire One has 4 colors with attractive design and price.

Born after Asus Eee PC but Aspire One has created a big buzz when overcoming Asus netbook pioneer in sales. The first version of the Acer company with an 8 GB SDD drive was not warmly welcomed, but the design was very attractive with four colors: blue, white, brown and pink.

Later, the machine used hard disk drive with large capacity 80 GB HDD, Atom processor 1.6 GHz, 1 GB RAM, and many common connections such as USB, Wi-Fi and the price is quite soft. with other competitors. Products quickly become the first choice for those who want to buy netbooks in Vietnam.

It has a 8.9-inch screen that weighs less than 1 kg and has two choices of operating systems (Windows XP or

Linpus Linux Lite). The 10-inch version has the newly introduced Macbook touchpad.

Acer Aspire One 8.9 inch version 8 GB about 5 million; version uses 120 GB hard drive about 7 million.

2. Asus Eee PC 901

The Eee PC 901 with a 6600 mAh battery runs for over 6 hours.

The first version of Eee's Atom chip was released late, so the market share seemed to be quite late and lost market share to Acer. However, with the brand of high quality Eee PC 901 motherboard with 8.9-inch screen still confirms its position and is chosen by many consumers.

This machine has a fairly fast boot time (within 15 seconds). It uses a 20 GB SSD with user-friendliness, however, it also supports 20 GB customers online storage. The keyboard is still quite cramped, but the supplied battery has been greatly improved to run more than 6 hours.

In addition, connectivity is also a strength of the Eee 901 when both Bluetooth connectivity and Wi-Fi standard n (currently the highest standard of Wi-Fi) are also available.

Reference price: VND 7.5 million for a 20 GB SSD.

3. HP Mini-Note 2133

HP Mini Note 2133 with alloy shell.

Not owning a strong configuration, but the Mini-Note 2133 is widely accepted by consumers as the pioneer in creating a wide keyboard design when the screen is equivalent to only 8.9 inches.

Besides, the elegant anti-scratch metal shell looks more attractive. The device is only supported VIA C7-M ULV 1.2 GHz processor (slower than Atom 1.6 Ghz), 1 GB RAM.

Machine is currently discounted to about 5.2 million, the version uses 4 GB SSD.

4. Dell Inspiron Mini 9

The Dell Mini 9 has an impressive speaker for netbooks.

The famous computer company Dell is still waiting for many people with the Inspiron Mini 9. It has many features that are required for a netbook: 8.9-inch screen, large keyboard, rugged casing, microprocessor Atom,

wide storage space, lots of connectivity . In addition, the Dell Mini 9 is more attractive in the external speakers than many other netbooks.

However, the weakness of the netbook's ability to heat and battery life has not been resolved in this product.

Reference price in Vietnam: VND 7.5 million with Intel Atom 1.6 GHz configuration, 1 GB RAM, 16 GB SSD hard drive, Intel GMA 950 VGA.

5. Astone UMPC

The first Astone UMPC netbook in Vietnam has a touch screen.

This machine appears on the market quietly because there is no official distributor. Astone UMPC has a special design: a 7-inch screen with touch capabilities and a 1.3 megapixel webcam on the right and a dedicated space due to VoIP telephony and computer features.

The device is only integrated with Via C7-M 1.2 Ghz processor, 1 GB RAM, 60 GB hard drive and weighs only 0.85 kg. However, this is the most connected support product out there in addition to Wi-Fi, Bluetooth also has DVI port, GPS global positioning, DVB support terrestrial digital TV, 3G / CDMA.

Not as much attention as the above models, but Astone UMPC is considered a new breeze on the Vietnamese mini laptop market.

The machine currently costs about 5.9 million dong, the version uses 60 GB hard drive.
