

5 cheapest 10-inch tablets in Vietnam

Just spend an amount equal to 1/3 of high-end tablet models, users can own a tablet with a large 10-inch screen with a good configuration.

Just spend an amount equal to 1/3 of high-end tablet models, users can own a tablet with a large 10-inch screen with a good configuration.

Archos C906

(Price is about 5 million VND)

The Archos tablet features an ultra-slim (6.5mm) design on a large 9.7-inch IPS screen. Equipped with 1.2 Ghz Cortex A8 processor, 1Gb Ram with 16Gb internal memory, external memory card support. It uses two cameras: the front 1.3 Megapixel and the 5 megapixel back.

This tablet model can connect to the internet via wifi and 3G USB. Acho C906 is pre-installed with Android 4.0 operating system.

Gemei G9

(Price is about 5 million VND)

Equipped with 9.7-inch multitouch screen, Gemei G9's *'power'* is in 1.5 GHz A10 processor chip configuration, 1Ghz Ram, Wi-Fi connection, 3G USB usage, support 3D graphics for games and videos, is one of the few products that use Vietnamese.

Built-in HDMI port, with this function Gemei G9 is considered a smart and economical alternative to Internet TV. Just connect the machine to the TV, whether watching movies online or the latest movies you have downloaded, the sound and images are transmitted with extremely high quality on TV.

With 7000 mAh battery capacity, Gemei G9 allows users to chat Yahoo, surf the web or listen to music (with the use of headphones) for hours continuously. It is also equipped with 2 Megapixel and 5 Megapixel cameras for taking photos, video or video chat.

KNC MD902

(Price is about VND 3.8 million)

This is a state computer with the same design as the Samsung Galaxy tab 10.1 today. It has a fairly compact design with a thickness of 9.3mm and a weight of 630g.

Regarding hardware MD902 uses multi-touch IPS screen 9.7 inch 1024x768 resolution, Cortex A10 processor speed of 1.5 Ghz, 1 Ghz Ram with 16 GB internal memory. MD902 can watch videos in standard formats FullHD 1080p MKV, AVI, RMVB, FLV, VOB, DAT, WMV . allows users to satisfy the need to watch high quality movies right on the screen of this device.

A10 Teclast

(Price is about VND 3.7 million)

Like the above products, the Teclast A10 tablet connects 3G via USB slot on the camera body. This is also one of the 9.7 inch tablet products cheapest in Vietnam market today.

Machine is equipped with ARM Cortex A8 1Ghz chip, 1Ghz Ram, internal memory is only 8Gb, supports memory card slot up to 32Gb, 0.3 Megapixel camera front and 2 Megapixel back.

Another advantage of Teclast A10 is that it supports a variety of connection ports: HDMI, USB 2.0 and mini USB.

CutePad A10S

(Price is about VND 3.4 million)

The feature of viewing glasses-free 3D movies is the strongest point of the CutePad A10S '*cute*' tablet model. The screen size is quite large plus 1080p video support, so the 3D effects display quite sharp, ensuring the authenticity and floating effects typical of 3-dimensional movies.

The device owns the processor Allwinner A8, speed 1.2GHz, Ram 512Mb, 4Gb internal memory supports external memory card up to 32Gb, 1.3 megapixel camera, connect wifi, HDMI, use 5000 mAh battery. Works on Android 4.0 platform (Ice Cream Sandwich) with friendly interface in Vietnamese.
