

5 cool, free virtual reality apps for iPhone

Did you know you can use Google Cardboard or other VR headsets with your iPhone? While not as high-end as the Oculus, these VR headsets are a fun way to experience VR without spending a fortune.

If you have an iPhone and VR glasses, you can play some free and super fun virtual reality games. These games will give you the exciting experience of the VR world. If you're ready to start experiencing VR, download one or all of these five games on your iPhone.

1. VR Jurassic

If you ever wanted to know the feeling of going to Jurassic Park, VR Jurassic can help you experience it. This app is also one of the best virtual reality apps for Google Cardboard.

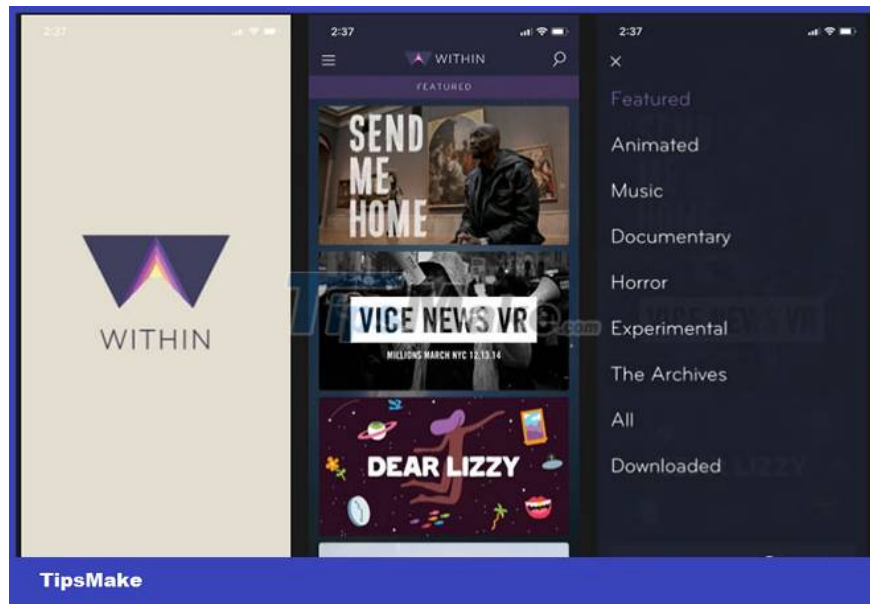

VR Jurassic is a first-person VR game that lets you interact with dinosaurs. With 3 different park modes, you can interact in whatever way suits you. The three modes are Park, Roller Coaster and Movie.

In Park mode, you can freely play around the park and go for walks with your favorite dinosaurs. You can experience all this in first person and feel like you are really in another world.

In Movie mode, you can experience a VR movie about life in the dinosaur park. In the movie, something happened in the park and you can find out what happened.

Finally, in Roller Coaster mode, you can ride a roller coaster through the park. There are more than 20 roller coasters available to experience.

2. Within VR

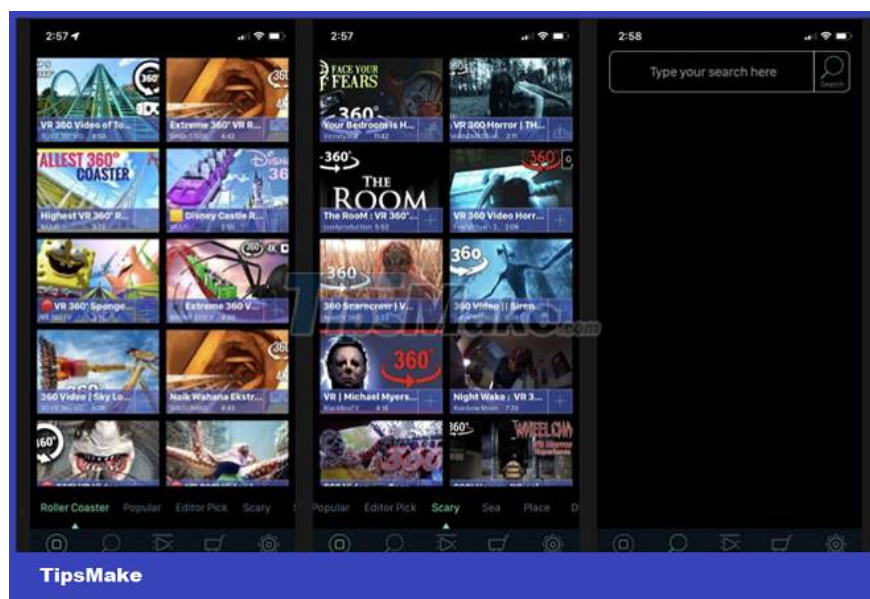

Within VR has a cinematic universe of VR movies that you can watch with virtual reality glasses. Think of Within VR as your personal 3D cinema. This app pulls content from indie VR filmmakers around the world.

Within VR takes you into the stories, so you feel like you're really there. The app features animations, documentaries, thrillers, and even music videos.

You can also download movies and shows for offline experience; This is one of the only VR apps that lets you do this for free. If you have a poor connection, this app is also useful because you won't experience any lag. For those prone to motion sickness, downloads can alleviate it.

If you're looking for a fun and engaging way to discover new shows and movies, Within VR is a great choice.

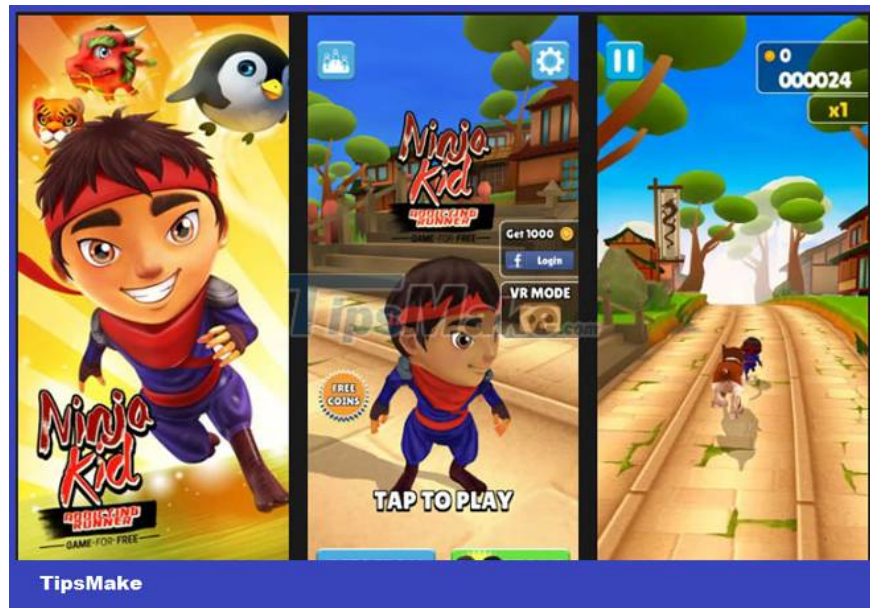

3. VR

VR is another great virtual reality movie app that has a lot of content that you can watch on your iPhone with VR glasses. VR Movies Player has a very realistic interface, giving it a lifelike feel. If you have VR glasses, you can feel completely immersed in the experience.

While VR doesn't have as much content as Within VR, VR specializes in horror movies. So if you want to experience horror movies in VR, then this is the app for you. Be warned, however, that the experience can be so real that it makes you jump out of your seat.

4. Ninja Kid Run VR

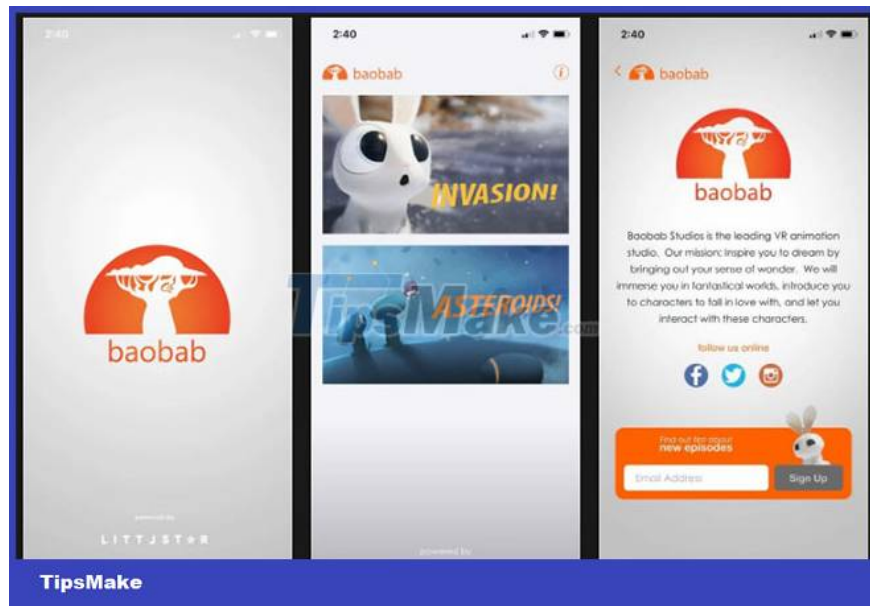

Ninja Kid Run is a popular game on the app store. It is similar to Temple Run and other racing games. After gaining popularity after its initial launch, Ninja Kid Run has been re-released in VR mode, so you can continue to play the game in a real-life experience.

Just like the original Ninja Kid Run, you play as a ninja racing through the city. To avoid obstacles, you can jump, drop ducks and shoot stars to avoid obstacles along the way. As you keep running, you can collect coins. You also have the opportunity to compete with your friends and see who gets the highest score.

While similar VR games can be difficult to play, Ninja Kid Run is just the opposite. It is very easy to learn and you can quickly understand how to play.

5. Baobab VR

If you have young children in the house who want to experience a fun app in VR, consider downloading the Baobab VR app. Also, consider downloading some of the best augmented reality games for kids.

Baobab is an application designed by the director of the famous movie Madagascar. He teamed up with the Emmy award-winning Baobab studio to create a unique production.

Baobab VR features a variety of cartoons for kids, each offering an immersive VR experience. With several programs available with healthy content, Baobab VR is a safe app for kids.

You also don't have to watch shows in VR all the time. You can watch shows in 360 if your child doesn't want to wear VR glasses but still wants to enjoy one of the app's shows.

VR glasses are usually very expensive, but there are also inexpensive options that fit your iPhone. By placing your iPhone in a VR headset, you can experience the thrill of virtual reality without spending too much money.

With so many great games and cool apps available for VR glasses, you can enjoy a lot of fun with your iPhone. There are even VR apps for kids available, so your kids can enjoy the fun too.

Over time, more and more people are experiencing applications in virtual reality. So now is a good time to start and learn how to enter this exciting world.
