

5 extremely useful features on Samsung Smart TV you may not know yet

Does your home have a Samsung Smart TV and do you use it on a daily basis to serve your entertainment needs? So do you know all the cool features introduced in this article?

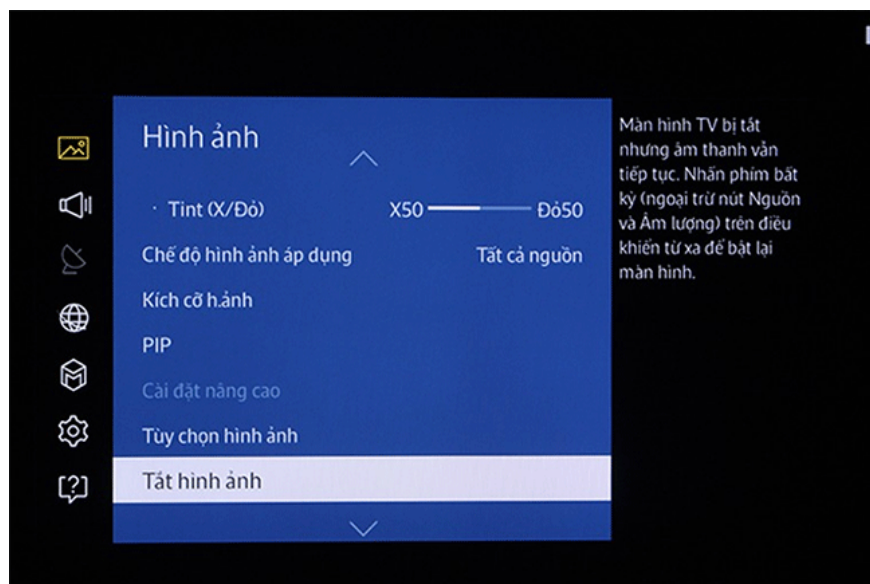

Does your home have a Samsung Smart TV and do you use it on a daily basis to serve your entertainment needs? So do you know all the cool features introduced in this article?

The following 5 features may or may not be known to you, but they all bring a lot of usefulness to you in the process of using Samsung Smart TV. Follow the article below from TipsMake.com to immediately discover those features and enhance your experience.

1. Turn off the television screen but still hear the sound

Surely quite a lot of you often listen to music on Samsung TV, suppose there are times when you only need to listen to the sound without watching the picture, how to do it? We often have the problem that when the screen is turned off, the television also stops without broadcasting, and opening the television screen to listen is quite expensive and unnecessary. At this time, the feature to turn off the TV screen but still hear the sound on Samsung Smart TV is really very useful.

- For Samsung TV 2015 series J (such as: J5500), simply press the **Menu** button on the TV control, select **Picture** , then select **Disable image** .

- For Samsung K series TVs (such as: K5500, KU6400, .), only the screen can be turned off when opening music with USB or playing music from the phone to the TV via bluetooth.

How to turn off: After playing music on TV> Select the **Disable image** icon.

2. Listen to music in HD mode

Most people think that listening to music through a television speaker will not be as attractive as the sound system or other devices that support HD audio standards. This is not wrong, but with Samsung Smart TV, it is different, you will not have to spend money to add a sound system and still be able to listen to music in HD mode. To enable HD audio mode, do the following:

Step 1. Press the **Menu** button on the TV control, then select **Audio**.

Step 2. In the Sound menu, select **Additional settings**.

Step 3. Select **HD Audio** then select **On** .

Note: This feature is only available when the audio source you play on the TV is HD audio .

Now experience always to see the change, surely you will be surprised with the sound quality that Samsung Smart TV emits, sounds more vivid and realistic.

3. Project the television screen onto a phone without a cable

Maybe you know how to use iPhone to control Samsung TV, how to upload photos to TV, . So you know how to project Samsung TV screen to your phone? Surely this is a feature not very well known to users and if you have not tried it before, it will waste the function of your Samsung Smart TV, right? This way will help you discover

many interesting things and enhance the experience on the device. You can refer to the article [Guide to Samsung TV screen projection on the phone](#) that TipsMake.com previously shared to know how to do it.

4. Scanning for viruses

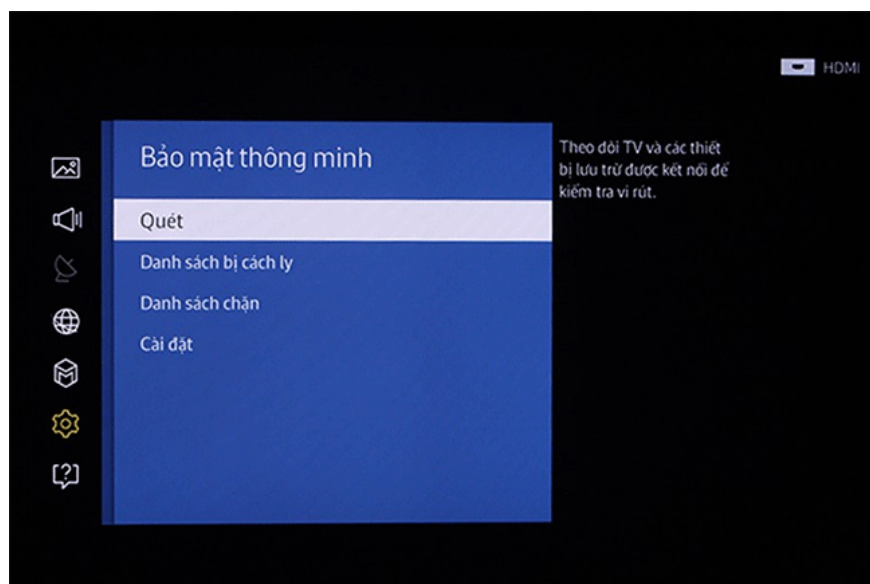

Similar to computers or mobile devices, smart TVs like Samsung Smart TVs are also targeted at viruses and malware. The online entertainment world is always in danger, so users have to be careful to protect the television as well as keep their information secure when surfing the web, online Facebook, reading e-mail, . on TV . Fortunately, with Samsung Smart TV, you can prevent this threat by very simple operations:

Step 1. Press the **Menu** button on the TV control.

Step 2. Select **System** , then **Security information** and then **Scan** .

Step 3. At this point, the TV will scan the television as well as all the devices that are connected to the TV, then the results will be displayed on the television.

Step 4. If you see the TV displaying malicious code, select the malicious code and select **Quarantine**.

In addition, in the **Information security** menu you can select **Settings and** then set the following options:

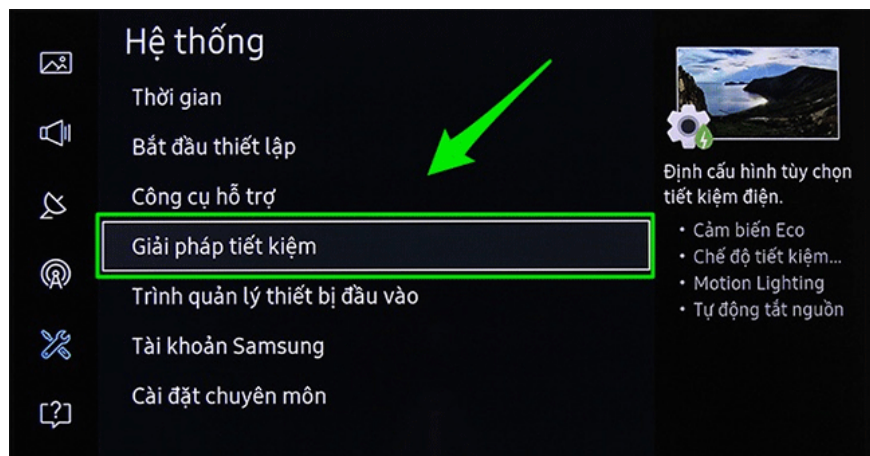

- To prevent TV harmful **virus** select **Virus removal** .
- To protect the TV from unauthorized intrusion, select **Network security** .
- To automatically scan when the TV is turned on or connected to other devices select **Automatic scanning** .
- Let the TV set the malicious code found on the block list select **Auto-isolation** .
