With the right AI apps, you can create text, images, etc. – all from the convenience of your mobile app. Let's explore great free AI applications that help you get the right creative tools through the following article!

1. ChatGPT

If you do a lot of writing then you'll definitely appreciate having ChatGPT on your iPhone too. This chatbot was released in November 2022 and had a profound impact on the world. There are many web apps based on ChatGPT that you can use even on the go, but the official ChatGPT mobile app is still the top choice when it comes to AI text generation.

ChatGPT on iOS gives you free access to GPT 3.5, which while not the latest version, offers impressive flexibility in handling a variety of tasks, from drafting emails to generating sentence ideas. creative story. The app's user interface is clear and intuitive so even people who are not tech-savvy can use it easily.

Furthermore, the voice mode feature adds an extra layer of convenience, allowing you to issue queries and commands without lifting a finger. This is especially useful when multitasking or on the go.

2. Draw Things

Draw Things is an AI image generator that runs directly on your iPhone's powerful hardware (at least if you have a recent iPhone model), allowing you to create anything from photorealistic images to animated illustrations. model, using available Stable Diffusion models.

Save Generated Images to

Disabled ▾

Generated images can be saved to a folder of your choice. This makes it easier if you use external applications to organize your generated images.

Use CoreML If Possible

Automatic (No) ▾

CoreML consumes more memory and may not be suitable for many mobile devices. It takes approximately 70 seconds to load for the first time. However, in return, it is about 50% faster. It is best to enable 'Keep Model in Memory - Preload' alongside it to reuse the first time load.

Use CoreML for LoRA

Automatic (No) ▾

For LoRA models, CoreML can be leveraged. However, each change in weights, different LoRA models, or their combinations will generate a new CoreML model, incurring model compilation which can take several minutes.

Downloading Model: deliberate_v2_q6p_q...

10,75 MiB / 782,32 MiB

Although it is a mobile application, Draw Things supports LORA: Compact Stable Diffusion models designed to make small modifications to default checkpoint models.

Note that the Stable Diffusion models that Draw Things uses to create AI images can be very large (a model is often several GB in size). If you don't have much space left, free up some iOS memory before proceeding with the installation.

3. Reface

Reface is the favorite iOS app for making people laugh, thanks to its incredibly realistic and sometimes downright funny face swapping capabilities. The sheer joy of swapping your face onto a celebrity's body or inserting yourself into iconic movie scenes is incredibly exciting. And you don't have to be a tech expert to get the most out of Reface; With just a few taps, you're ready to create content that's sure to make you laugh.

However, Reface's utility goes beyond providing giggles. The same technology that powers those fun face swaps could be harnessed for more practical purposes, such as trying out different hairstyles or creating professional-looking photos.

While many of Reface's features are available for free, you can only access the full suite of tools, including some more advanced editing options, with a subscription, starting at \$3.99/week .

4. ToonMe

ToonMe is an innovative app that magically turns your photos into animated or cartoon-style images. If you don't have artistic abilities but like the idea of ??drawing your own cartoons to get likes on social networks, make your profile photo stand out, or just for fun, this app will be right for you. With just a simple upload of a selfie, ToonMe will do the job of providing you with a hand-drawn quality portrait that looks like it came straight out of an animated movie.
