

# 5 free download websites with beautiful HD wallpapers for smartphones

Since manufacturers develop technology to give users high-quality screens not only for computers but also for mobile phones, people are always 'obsessed' by the beautiful wallpapers. .

Since manufacturers develop technology to give users high-quality screens not only for computers but also for mobile phones, people are always "obsessed" by the beautiful wallpapers. . A few years ago, you could only use 1080p Full HD wallpapers, but with modern needs and devices developed with the WQHD + screen, you can search for sharp Utral HD wallpapers for your mobile phone.

Although there are many applications, provide beautiful wallpapers with supported resolutions and automatically refresh the main screen with new images every day. However, there are still hidden repositories that contain thousands of interesting images that applications do not have, so the only way to get these beautiful art pictures is to download them directly from the web that provides them. . This article will introduce you to some websites that offer free HD wallpapers for smartphones.

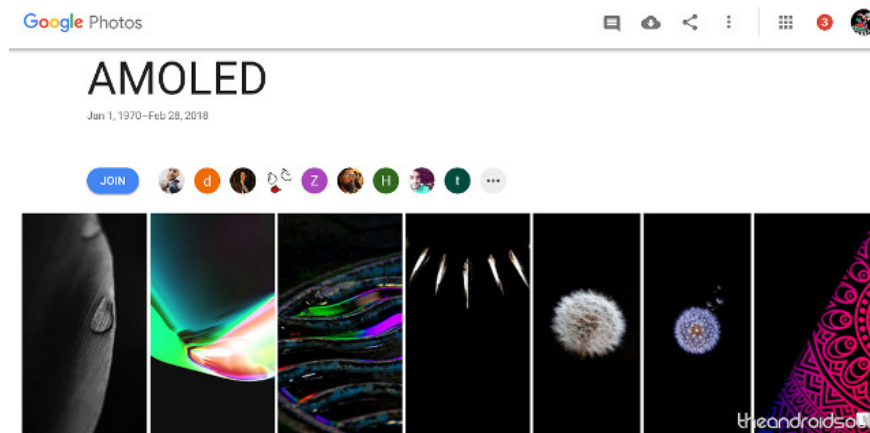

## 1. Unsplash.com

If you are tired of using the same images, consider taking a safe haven of unique wallpapers. Unlike many other free wallpaper websites, public Internet images, Unsplash is a collection of high-definition images provided by the large photographer community. You can download free wallpapers and follow your favorite creators by signing up for a free account.

## 3. Pexels.com

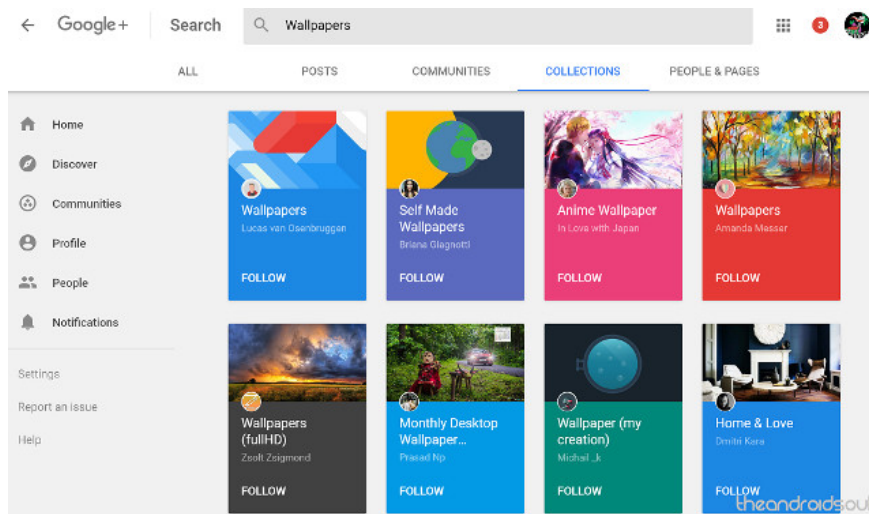

You do not need to use ugly or poor quality watermark images, because everything is on Pexels with CC0 license and it is important for free. With over 160 different genres, Pexels offers many high-resolution images. However, this is not the best part of it, Pexels is rated and ranked high on the list of sites that offer good images, in which the highlights here are all contributed by photographers. Family and creators each received awards.

## 4. Reddit.com/r/wallpapers/

Not only is the place to find the most interesting video, Reddit is also a unique wallpaper repository that you can't find anywhere else. Most of these wallpapers are created and shared by users on Reddit. These wallpapers are packed in Full HD quality, QHD and this list is updated every hour, so you will always have new images to use.

## 5. Google+

With the rise of social media giants like Facebook and Twitter, Google+ has simply never reached that potential. However, Google's social platform has become a very private community with like-minded people sharing their

interests freely, and including their love of wallpaper. Although there is a long way to go, but Google+'s Collections is a 'home' for hundreds of thousands of "residing" wallpapers from the most popular mobile wallpapers to self-created wallpapers.
