

5 highlights of pure Vietnamese operating system VOS 2.0 on Vsmart Live

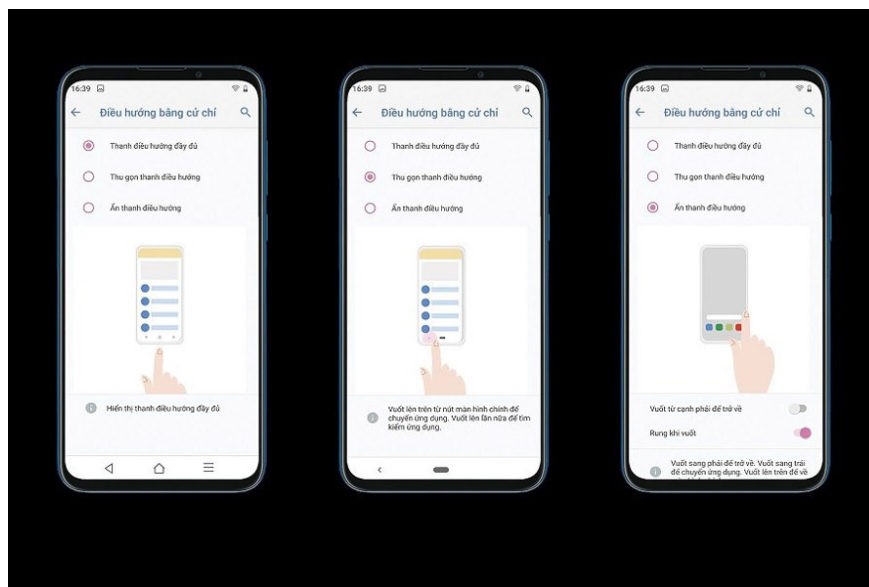

VOS version 2.0 has an easy-to-use interface and has many features that appear only on deep customized smartphones that have made a strong impression on technology enthusiasts.

The newly launched Vsmart Live phone of VSmart under Vingroup runs Vietnamese pure operating system VOS version 2.0 has an easy-to-use interface and has many features that appear only on deep customized smartphones that have made a strong impression with technology enthusiasts.

Here are 5 notable points on VOS 2.0 operating system:

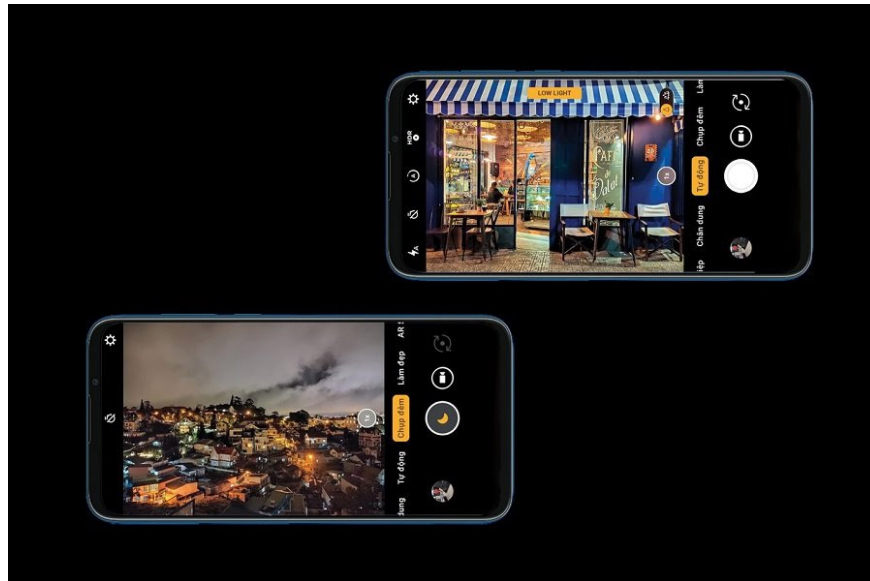

Gesture swipe feature

Gesture swipe feature on VOS 2.0 is evaluated by the technology relatively smooth, almost no delay when manipulating.

To return to the main screen, users only need to swipe from the bottom up, to return to the previous item swipe from the left to display the multitasking interface swipe from right to left. Users can access the settings to change these options.

Integrated camera AI

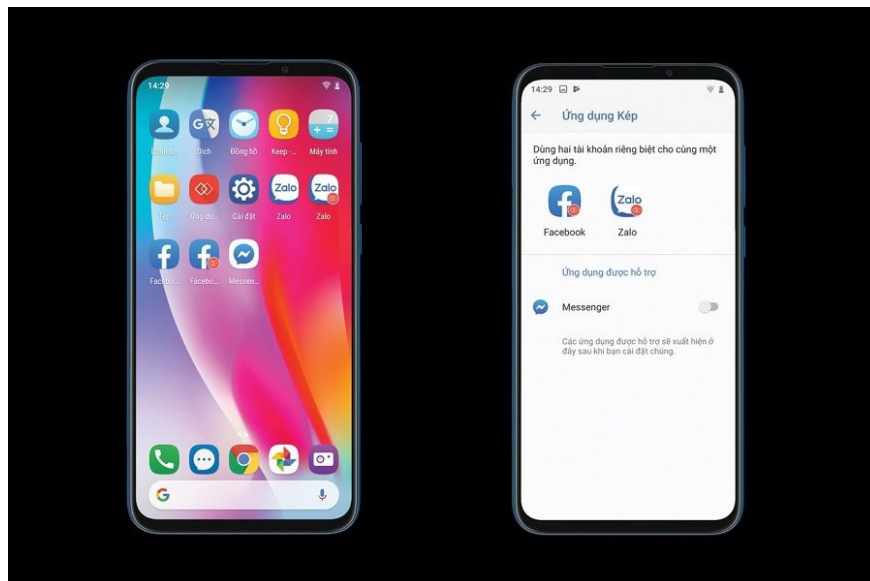

Camera interface on VOS 2.0 version is more intuitive, easier to use than VOS 1.0.

VOS 2.0 adds many shooting features such as night photography, AR Sticker shooting beauty, taking photos to remove fonts .

Users just need to open the camera, hold up the camera and get the best quality photos in the mid-range smartphone segment because Vsmart Live will automatically calculate and switch between modes.

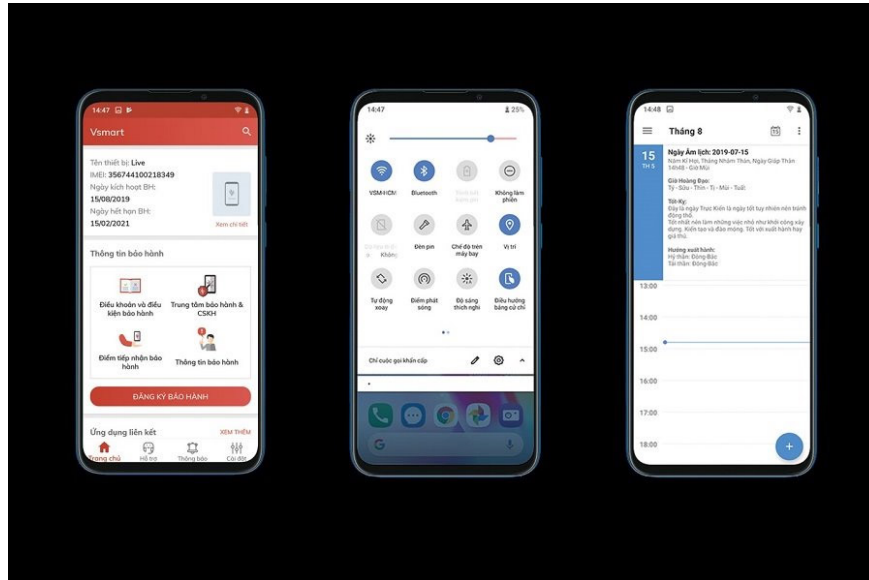

Dual application

This feature allows users to duplicate commonly used applications such as Facebook, Facebook Messenger, Telegram, Zalo, Viber . to be able to simultaneously use multiple accounts on their smartphones.

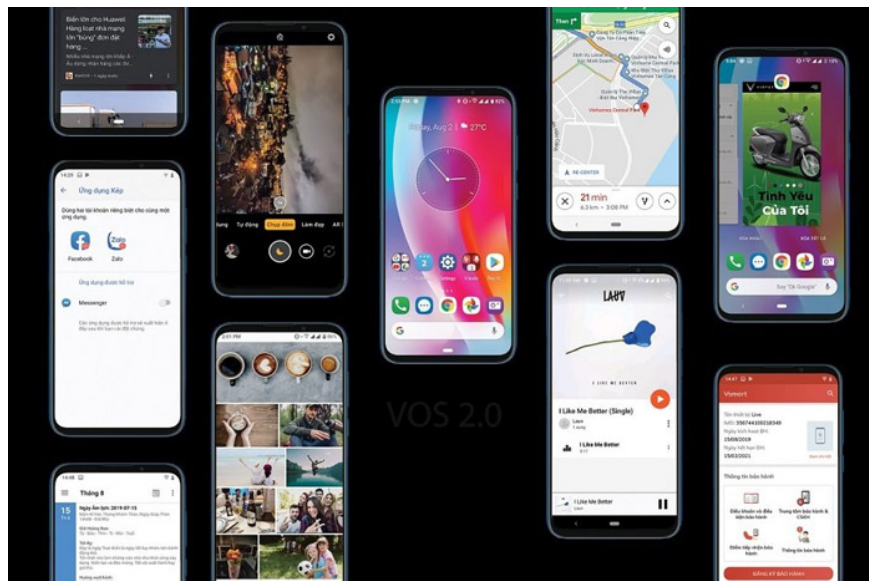

To distinguish, the cloned applications will have a red icon on the icon in the main screen.

Easy to use interface

Compared to the completely pure interface Google and the icons do not have too many changes on VOS 1.0, at VOS 2.0, the icons have been much more refreshed, creating very different accents on the main screen of Vsmart Live.

Customization enhances the user experience

With the desire to enhance the user experience, Vsmart has added a number of new useful features for VOS 2.0. For example, integrated screen capture, screen recording, turn off the screen into the navigation bar above; Delete all applications running in the background with a single operation.

With the customer care application, users only need 3 touches to report the error, 3 minutes to register for warranty if there is a problem during using the machine.

1. Design and configuration of Vsmart Bee, Vsmart's cheapest smartphone, costing VND 1.39 million
2. Vietnam is going to have Lotus social network, revolving around content, giving tokens to users
