

5 Hottest Online Video Merging Software 2024

Online video merging software is the most popular video editing tool today. Let's learn about the most popular software through the following article.

1. WeVideo - Professional Cloud-Based Video Collage

One of the hottest online video editing software at the moment is Wevideo. This software has a simple interface but a very eye-catching design. This is also a highlight that helps WeVideo attract a large number of users. Wevideo has three flexible editing modes including: School, Work and Home. With these 3 modes, the software allows users to edit videos in groups. In addition, you can also upload and store these videos on cloud computing platforms such as Google Drive,.

The next advantage of Wevideo is that you can record audio or video without using an additional player. However, Wevideo still has a small disadvantage that it will be attached with a logo after editing and is limited to some video formats.
