

5 laptops have the same power as desktop computers

If you want to play games and enjoy multimedia content but don't want to stick to your desktop system at home, laptops with screens above 17 inches will be a wise choice.

If you want to play games and enjoy multimedia content but don't want to stick to your desktop system at home, laptops with screens above 17 inches will be a wise choice.

Gateway P-171XL FX is equipped with high-speed Intel Core 2 Extreme 2.8 GHz, 3 GB SDRAM, 400 GB hard drive, HDMI and eSATA ports to provide strong performance and gaming compatibility. Price: 2,000 USD - 2,900 USD.

Gateway's 17-inch P-6831 FX system does not have a high-resolution screen like P-171XL FX but is preferred for only \$ 1,250 - one of the cheapest laptops using Nvidia GeForce 8800 graphics card, 3 RAM GB, 1.6 GHz Intel Core 2 Duo processor and 250 GB hard drive

The HP Pavilion HDX is a vivid example of a laptop with a 1080p screen. This 20-inch device is equipped with the latest CPU Intel Core 2 Duo Penryn, Nvidia GeForce 8800 graphics card, 2 GB RAM, 250 GB hard drive and can choose between Blu-ray drive and HD DVD. Price: 2,000 USD.

Apple MacBook Pro 15 inch uses screen with LED backlight to save power, Intel Core 2 Duo 2.4 GHz, 2 GB SD2 SDRAM, 160 GB hard drive but no media card reader. Price: 1,800 USD.

Dell XPS M1730 integrates Intel Core 2 Extreme 2.8 GHz chip, 2 GB SD2 SDRAM, 400 GB hard drive, 17-inch Logitech GamePanel LCD screen, backlit keyboard and can play media content without start the machine. Price: 3,000 USD - 4,000 USD.
