

5 mobile screen models most worth owning today

4 options worth considering, promising to meet the requirements of the most demanding users at many different job levels.

The screen is one of the extremely important positions on electronic devices today. This is where the user primarily interacts with the device, as well as plays a decisive role in the user experience. For this reason, the display quality as well as the support features of the panels are increasingly improved and richer.

If you are looking to buy a mobile screen to serve your advanced usage needs, below are 5 options worth considering, promising to meet the requirements of the most demanding users. at many different job levels.

INNOCN 15.6 inch OLED 1080P FHD portable monitor

Thanks to the stunning 15.6-inch FHD OLED display, you're guaranteed to enjoy outstanding visual clarity with this INNOCN portable monitor. 100000:1 color contrast and 400 nit brightness deliver vivid, sharp images and perfect blacks. The monitor offers USB-C and Mini HDMI connectivity, making it compatible with a variety of PCs, laptops, smartphones, and game consoles.

For an OLED display of this size, the 15.6-inch FHD OLED display is very competitively priced. It boasts some cool features, such as an eye care mode for added comfort and an impressive 1ms response time, ideal for low-latency gaming. On the other hand, the built-in speakers are serviceable but unlikely to disappoint.

For added convenience, the monitor comes with a removable magnetic stand and is easy to prop up anywhere. Combine this with incredible HDR performance and there's a lot to love about this lightweight and portable

display.

AOC I1601FWUX 15.6-inch USB-C enabled portable monitor

Some portable monitors can be too expensive, but there are some great options at lower prices. For those on a budget, the AOC I1601FWUX 15.6-inch USB-C powered portable monitor is one of them.

It offers Full HD resolution with a 60Hz refresh rate and an IPS display that offers a 5ms response time. There's no HDMI input, so connectivity is via a single USB-C input. It works in portrait or landscape mode, and the auto-tilt feature makes it easy to rotate the screen. The built-in blue light filter and flicker-free display also make this monitor comfortable to use.

It may not offer all the functionality of some other portable monitors, but if you're just looking for an additional screen that provides high-quality images, this is what you need.

NexiGo 300Hz 17.3 inch mobile monitor

The NexiGo NG17FGQ 17.3-inch portable monitor is an impressive set of products that will satisfy on-the-go gamers. Compatible with PlayStation 5, Xbox Series X/S, Switch, laptop and PC, it suits all your mobile gaming needs. Its large 17.3-inch display offers 1080p resolution, an impressive 300Hz refresh rate (via USB-C), and full IPS coverage.

A 3ms response time means this portable monitor can reliably deliver lag-free visuals to keep up with your games. G-SYNC compatibility via USB-C delivers ultra-smooth motion without tearing. Integrated eye care technology helps protect your eyes from fatigue while playing.

However, this monitor does not have a built-in battery, meaning it is powered from the device it is plugged into. Dual stereo speakers deliver decent sound, and a 3.5mm wired headphone port is on the outside. A foldable cover is also included, which doubles as a handy display stand.

UPERFECT True 4K mobile display

With stunning 2160p images, the UPERFECT True 4K portable display is a great choice for anyone looking for a 4K portable display. True 4K IPS panel technology delivers outstanding visual clarity from any angle, making it an ideal candidate for graphic design or photo and video editing. The screen also offers wide viewing angles of up to 178 degrees.

With 100% Adobe RGB, 600 nits brightness, and a 1500:1 contrast ratio, colors pop on this display. With a slim design of 0.4cm and weight of only 680g, you can easily take this 4K screen anywhere you want.

ASUS ZenScreen MB16AMT 15.6 inch Full HD portable monitor

Anyone who is used to their laptop's touchscreen should consider the ASUS ZenScreen MB16AMT 15.6-inch Full HD portable monitor. This lightweight IPS touchscreen offers ultra-responsive 20-point touch functionality, making your finger swipes smooth and precise.

It can be used in both landscape and portrait orientation and offers 1080p resolution with a 16:9 aspect ratio and a wide 178-degree viewing angle. It's ideal for editing, annotating, and drawing documents on the screen. The 7,800mAh battery provides about 4 hours of battery life on a single charge, and it supports USB-C and micro-HDMI connectivity with your other devices.

ASUS ZenScreen comes with a stylus and a foldable Smart Case to stand upright. When not in use, the stylus can also be used as a temporary prop thanks to the smart pen hole in the bottom corner of the screen.
