

# 5 MX Player tricks you may not know

The most popular application for running videos on smartphones or tablets is undoubtedly MX Player. Check out these top 5 tips to improve your experience with MX Player and let you see the true power of this application.

The most popular application to run videos on a smartphone or tablet is without a doubt, it is MX Player. It has many features, options with high customization, can run in 10 video file formats, and provides HD quality. Check out these top 5 tips to improve your experience with MX Player and let you see the true power of this application.

## 1. Play video in background

Open **Settings**> **Player** and enable this option to enjoy videos running in the background when you are using another application. This option will be great when you watch music videos or listen to songs.

## 2. Use MX Player as a music player

Turn on the **Audio Player** option and check the **Background play (audio) feature** from the settings.

### 3. Run online videos

Leave MX Player as the default video player and all videos will be played through this application. You can also stream MP4 or MKV files online by taking the URL of that video, then accessing the '.' menu and clicking on the **network streaming** to paste the URL, and everything will be ready.

### 4. Customize subtitles

You can search for subtitles online by going to **Subtitles> Synchronize** and then making adjustments. You can also set the height, default language, font, color or size of subtitles.

## 5. Split-Screen mode (split screen)

If your Android device runs Android Nougat or Oreo, you can use split screen mode and work on two apps at the same time.

1. Split screen uses 2 applications on Galaxy S8 / S8 Plus

Other interesting options are highly customizable (change the theme, screen type or gesture), continue watching recently played videos, lock the player while streaming video (so as not to accidentally touch the screen and interrupt video), hide files and folders, synchronize all settings on all devices and more.

**Download** : MX Player (MX Player is free, but contains ads, you can buy for \$ 5.99 to remove ads.)
