A suitable fridge will help kitchen space more beautiful.

### Fridge design

On the market today there are many different types of refrigerators such as **mini refrigerators** , **2-wing refrigerators** , **3-door refrigerators** , **Multi Door refrigerators** , **Side by Side refrigerators** . are distinguished based on the number of wings / number of drawers Cabinet and cabinet capacity:

1. Mini fridges usually have 1 wing, less than 150 liters capacity so the cabinet design looks quite compact, suitable for the small kitchen of the motel room.
2. Refrigerator with 2 wings, 3 wings, Multi Door, Side by Side has 2 - 6 wings, with a large capacity of about 200 - 700 liters so the cabinet design is bigger and is preferred by households.

Normally, Multi Door and Side by Side cabinets will have a larger size than 2-door refrigerators and 3-door refrigerators. If your kitchen is small and medium, you should choose a refrigerator with 2-3 wings, but if your kitchen has a large area, you can prioritize the Multi Door and Side by Side cabinets.

Side by Side refrigerators suitable for large kitchens.

## Exterior design of the refrigerator

Mini refrigerators are usually quite simple designs with the main colors being silver and black, helping the kitchen space not to be cramped, stuffy, stuffy, and easy to harmonize with all types of furniture. Therefore, if you only need to use a mini fridge, you just need to choose the high, low style and color of the refrigerator.

Refrigerators with 2 or more wings when compared to mini refrigerators are extremely diverse in color, cabinet material, handle design . so you will also need to pay more attention when choosing:

1. **About the color of the cabinet** : In addition to the main traditional colors of silver, slippery black, now there are many models of refrigerators with more alternative colors such as brown, red, blue and may include additional graphics. textures or gradation effects. Therefore, you can base on the kitchen furniture style, your preferences, feng shui . to choose the appropriate cabinet color.
2. **Regarding the shell material** : Currently, many models of refrigerators with 2 wings, 3 wings, Multi Door, Side by Side are designed with a refrigerator surface with toughened glass, good scratch resistance,

easy to clean, giving a feeling of Comfort and luxury. Therefore, if you want your family's kitchen to be more modern and sophisticated, do not miss the glass-fridge!

3. **About the control panel, handles . :** Many models of refrigerators are now equipped with touch control panels, hidden handles, external ice trays . both convenient and modern. The external design refrigerators with these utilities will also help your kitchen look more comfortable and 'luxurious'.

Fridge with glass, patterned is a breaking point for the kitchen.

## **Interior design of refrigerator**

Besides design and external design, the internal design is also an important factor in deciding whether a refrigerator is really beautiful or not. Regarding the interior of the refrigerator, you will need to note a few points:

1. The drawers must be arranged appropriately according to use demand. For example, if you mainly use the freezer compartment, it is more appropriate to choose a lower freezer compartment than the freezer compartment, if you need to preserve many types of vegetables, tubers, fruits, it will need a fridge great vegetables .
2. The tray system of the cabinet whether made of plastic or glass should also ensure good bearing, easy to move to adjust the height of each compartment, easy to clean and clean. However, a refrigerator with a glass tray system will bring a more comfortable and high-class feeling.
3. Control systems, lighting systems should be arranged in a scientific and convenient manner.
