

5 popular laptop models from Acer

Acer is known for having some of the most diverse laptops on the market, from lightweight 16-inch laptops to 2-in-1s that can function as tablets, there's something to suit everyone. everybody.

But which is the best Acer laptop for you in 2024?

Acer Swift Go 14

If you're looking for a top-notch all-rounder without the hefty price tag, the Acer Swift Go 14 is the best overall laptop the manufacturer makes.

The Swift Go 14 offers a huge amount of power despite its compact size and weight. The integrated Intel Core i7-13700H means this device is ahead of competitors that focus on lower-power chips to fit into a thin and light body. This is a top choice for high productivity tasks.

Besides its incredible power, this laptop also stands out with its beautiful OLED screen. The 14-inch 1800p OLED panel offers the right size for multitasking as well as plenty of detail from that QHD+ resolution. Outstanding colors and excellent accuracy. The 1440p webcam keeps you looking sharp and clear on morning video calls.

Acer Chromebook Spin 714 (2023)

Chromebooks offer an interesting proposition that could be ideal for workers or students, and the Acer Chromebook Spin 714 (2023) is the perfect example of that. It packs more power than most Chromebooks can handle, which is comparable to a mid-range Windows machine.

The durability of the Chromebook Spin 714 is also impressive; the battery can last for 11 hours and 6 minutes, (even up to two business days, depending on usage).

The weight of 1.4kg makes this 14-inch laptop wonderfully lightweight and ideal for carrying it around. The convertible design means it can be used as a traditional clamshell laptop as well as a tablet, providing a lot more versatility than other laptops.

The Full HD (1080p) panel offers decent detail and great colors thanks to the IPS panel hidden inside. Acer claims that the Chromebook Spin 714 covers 100% of the sRGB color space. The Acer Chromebook Spin 714 produces generally vibrant images, and its 16:10 aspect ratio makes it much better for modern workloads than its predecessor.

Overall, if you're looking for a Chromebook that can handle all-day productivity workloads, the Acer Chromebook Spin 714 (2023) is one of the best options available.

Acer Chromebook Plus 515

Acer Chromebook Plus 515 is one of the first products in the new ChromeOS laptop series launched last year. With this Acer Chromebook Plus 515 model, the 12th generation Intel Core i5 chip and 256GB SSD combine with other specs to create a fast machine. You'll be able to multitask efficiently and effectively at an affordable price.

Despite its low price, the build quality of this Acer laptop is particularly impressive. This budget Acer machine offers a professional and stylish look. Acer doesn't shy away from quality features either, with a beautifully large trackpad and integrated backlit keyboard.

The screen and audio experience don't detract from this valuable laptop either, with the 15.6-inch screen providing plenty of space for multitasking. The sound is also surprisingly punchy, delivering loud sound without distortion at high volumes. You also get up to 10 hours of battery life, ideal for a full work day.

Acer Predator Helios 16 (2023)

Acer Predator Helios 16 (2023) is the top gaming laptop choice from this brand. This Acer gaming laptop has got almost everything in terms of raw gaming power and the results are amazing. The review model is equipped with Nvidia GeForce RTX 4080, Intel Core i9 13900HX, 32GB RAM and 1TB SSD. With these specifications, this Acer laptop handles well over 100 frames per second at Ultra settings in Horizon: Zero Dawn and

Borderlands 3 gaming tests at 1080p.

You get a 16-inch 240Hz Mini-LED panel, making it a great all-rounder for classy visuals and high FPS gaming. Overall, it's a great gaming experience.

If you are tired of the overly colorful gaming laptop design, this is a suitable choice for you. Predator Helios 16 is limited in using RGB. The keyboard itself offers fast and crisp action, ideal for mobile gaming.

Acer Nitro 5 (2023)

The Acer Nitro 5 (2023) series has long been the top choice in the field of low-cost gaming laptops. Nitro 5 aims to provide 1080p gaming performance at a reasonable price. With the option specified as Intel Core i5 and RTX 4050 12th generation, the results are impressive. The Nitro 5 hit around 60 fps at Ultra settings on Returnal and Cyberpunk 2077, along with hitting over 100 fps in first-person shooter Rainbow Six: Extraction. With Nvidia's impressive DLSS technology enabled, you can also get up to 98fps in Cyberpunk 2077. That's great results!

The screen itself is a complete option, with a size of 15.6 inches, 1080p resolution and 144Hz refresh rate. It's a decent combination that works well for gaming but doesn't deliver incredible brightness and precision for media processing and creative work.

For the 2023 model year, the Nitro 5 has been slimmed down a bit and looks a bit more boxy. There's also a new blue and red design on the lid, making for a stealthy and inoffensive-looking laptop. Port selection is ideal, with Thunderbolt 4 and HDMI 2.1 being the best options. The keyboard though may not be powerful enough for some serious gamers, with a quiet and comfortable typing feel.
