

5 simple ways to fix Snapchat error hanging on iPhone

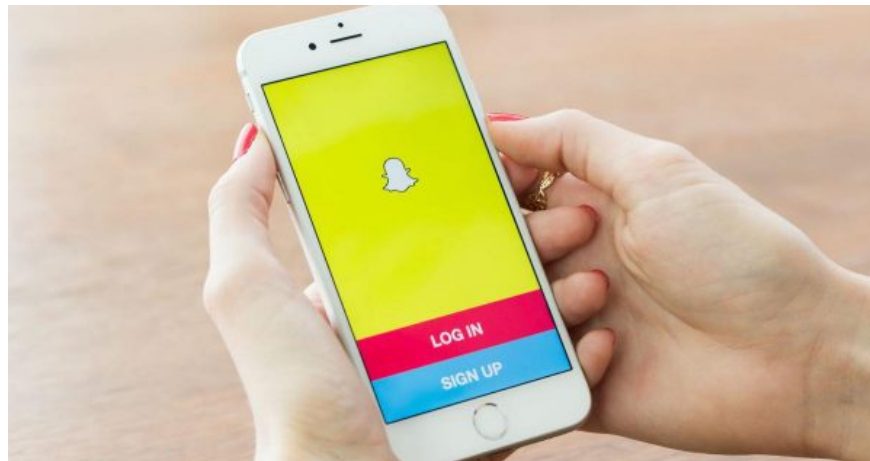

In addition to messaging applications such as Zalo, Viber, ... Snapchat is also an application that is making clouds wind. However, like some other applications, in the process of using Snapchat, users cannot avoid errors. One of the most common errors is that Snapchat errors are suspended, unresponsive on iPhone devices.

In addition to messaging applications such as Zalo, Viber, . Snapchat is also an application that is making clouds wind. However, like some other applications, in the process of using Snapchat, users cannot avoid errors. One of the most common errors is that Snapchat errors are suspended, unresponsive on iPhone devices.

So how to fix this error, please refer to the following article of Network Administrator.

If your iPhone has no Snapchat application, you can download Snapchat to your phone and install it here.

1. Force Snapchat to close

When the application does not respond, hangs, the easiest way is to restart the application. After booting is complete, the application can resume normal operation.

Click the **Home** button 2 times, on the screen you will see a list of applications that you used recently. Find the Snapchat app, then swipe up on the screen to close the app. Finally reopen Snapchat to see if the application is still corrupted.

2. Update the latest Snapchat version

Snapchat

Version 9.18.0.0, 63.2 MB
Oct 28, 2015

UPDATE

* Slow-mo, fast forward, and rewind filters! After recording a video, swipe to try them out.

* Have an iPhone 6s or 6s Plus? Force press the Snapchat icon on your home screen to send a Chat or add a new friend.

If the Snapchat application on your iPhone device is not updated, this is probably the cause of the error.

So in order to fix the error, you access the App Store and check if the app updates are available. If you have the latest version of the application downloaded and installed.

3. Restart your iPhone

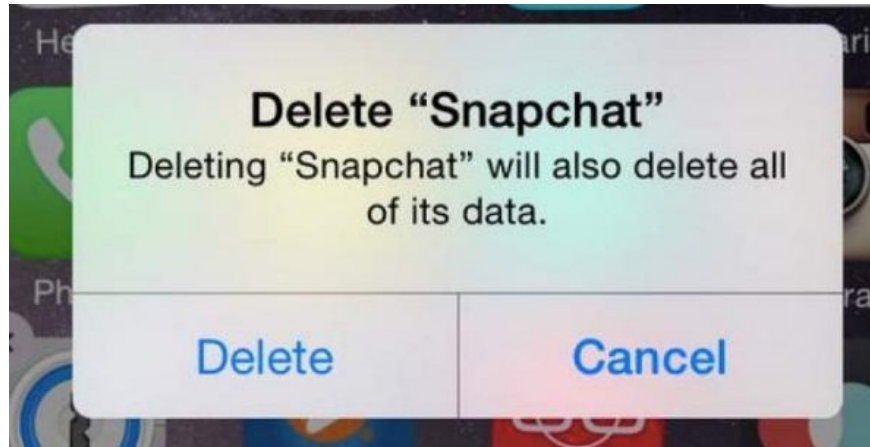

Whenever your iPhone device fails, it will cause errors on the application. Therefore the best solution in this case is to restart your iPhone phone.

Press and hold the **Sleep / Wake** button (power on / off) until a message appears on the screen, drag the slider to turn off your iPhone device.

Then press and hold the **Sleep / Wake** button (power on / off) to open the phone.

4. Uninstall Snapchat on your device and then reinstall the application

Find the Snapchat icon on the Home Screen screen. Click and hold on the icon until you see the application screen vibrate and an X icon appears.

Click the **X** icon to delete the application.

Next visit the App Store, download and install the new Snapchat application.

5. Some other solutions

5.1. IOS update

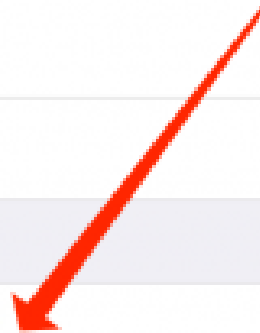

iOS 9
Apple Inc.
1.0 GB

With this update your iPhone, iPad and iPod touch become more intelligent and proactive with powerful search and improved Siri features. New multitasking features for iPad allow you to work with two apps simultaneously, side-by-side or with the new Picture-in-Picture feature. And, built-in apps become more powerful with detailed transit information in Maps, a redesigned Notes app, and an all-new News app. And improvements at the foundation of the operating system enhance performance, improve security and give you up to an hour of extra battery life.
