

5 software should have on laptop to help increase performance 3 times

Here are 5 software that should be on the latest laptop in 2021 that you should install to help you increase performance by 3 times. Check it out in this article by HACOM!

Laptops in the current 4.0 era are an indispensable item for everyone, from office workers, technicians, students, etc. Currently, there are too many softwares created to serve the needs of work, study and entertainment, but not all of them are necessary and to install all of them, you need a computer with a really powerful configuration. Let's find out with TipsMake about 5 softwares that should be on your laptop to help increase work efficiency below!

Picture 1 of 5 software should have on laptop to help increase performance 3 times

In this article, TipsMake recommends that you use licensed software to fully utilize the features and avoid other problems such as laptop being infected with viruses,.

1. Licensed operating system for laptops

Operating system is one of the required software for laptops, PCs and is also the environment for setting up and installing other applications and software. There are many popular operating systems such as: Windows, Mac OS, Linux,. And Windows is the most popular operating system today with many versions such as: Windows 10, Windows 8, Windows 7, Windows XP,. for many laptop systems.

Windows 10 is the latest version of the Windows operating system. Outstanding features of the licensed Windows 10 operating system:

a. Increase security when buying genuine Windows

In addition to the risk of containing viruses and malware, pirated Windows also comes with many risks when you update Windows. However, when using genuine Windows 10, you will not need to worry about those things and Microsoft also ensures that bug fixes will be continuously updated on your device completely free of charge.

b. The computer will have fewer errors and operate more stably.

When using cracked Windows versions, the original operating system files have been modified, which does not guarantee that the data is complete and does not work at its full potential. In fact, pirated Windows users will

often encounter errors such as blue screen, black screen, loss of sound, computer crashes, etc. and have to frequently reinstall Windows.

So genuine Windows is one of the **software that should be on a laptop**, no! it is definitely a must on a laptop. It helps increase your work efficiency, minimizing the risk of data loss due to operating system errors.
