Points to consider when choosing to buy aluminum cutting machines

If you want to own an accurate and quality aluminum cutting machine, please note the following points:

Determine the work needs : Aluminum cutting machine is divided into many types such as mini aluminum cutting machine, one-head aluminum cutting machine, 2-head aluminum cutting machine . Depending on the nature of the work that users can take choose the device accordingly. For example, for small and medium-sized factories, it is recommended to use a double-head aluminum cutter. For large-scale factories, you should choose a specialized aluminum cutting machine.

Accuracy: The accuracy of aluminum cutting machines is also an important factor that users need to consider when choosing to buy this product. Absolute accuracy is when cutting 45 degree angle and joining together must be tight, not creating gaps.

Origin of products : Currently, there are many brands of aluminum cutting machine in the market, however, please choose a brand from a reputable brand, highly appreciated by users. Some suggestions for you like: Makita, Ingco, Bosch, Total .

Suggest some cheap, accurate aluminum cutting machines that are used today

1. Gomes aluminum cutting machine GB-1229

Gomes cheap aluminum cutting machine GB-1229 is a product used in many areas of construction and business of aluminum window glass. Products with small compact design, advanced technology applications bring more convenience to users when using.

The machine operates with a capacity of 1.650W, achieving no-load speed of 6,000 rpm providing high efficiency at work. The product is warranted for 3 months and currently has a selling price of VND 1,700,000.

2. Shearing machine Makita JN3201

Makita JN3201 is a product from a famous Japanese brand that specializes in manufacturing and trading tools and tools used by users worldwide. The device is equipped with a powerful capacity of up to 710W, providing precise cutting capabilities to improve work efficiency.

The product is made of 2 main materials: plastic and steel with high strength, durability and heat resistance. Besides, the blade of the machine is also a remarkable thing. It is made from a very sharp specialized steel material, not rusty, so it provides precise and highly aesthetic cutting. Currently, Makita JN3201 aluminum cutting machine is selling for 10,300,000 VND and is guaranteed for 6 months.

3. Versatile cheap aluminum cutting machine Total TS42182551

As a product from famous German brand, Total TS42182551 is used quite popular and is appreciated for quality. The machine is made of durable aluminum alloy, has good bearing capacity, durability with time and designed to bring more convenience to users.

The base section is ruggedly designed, ensuring anti-slip when in use. Combined with rubber grip handles, machine operations are easily performed, limiting unfortunate accidents. Currently the product is being sold for VND 3,190,000 and has a 6-month warranty.

4. Aluminum cutting machine Stanley Stel 721

Stanley Stel 721 operates with a powerful capacity of up to 1,500W that will help you perform the tasks correctly and efficiently.

Using Stanley Stel 721 you can be assured because they are designed quite smartly, placing high safety issues for users such as: The handle is covered with anti-slip rubber, integrated insulation system Effective, equipped with anti-vibration function that does not cause fatigue when operating.

Products are warranted for 6 months and are sold at: 3,699,000 VND.

5. Hyundai HCA255 aluminum cutting machine

Hyundai HCA255 cheap aluminum cutting machine has a strong and durable structure. The handle of the D-shape design makes it easy to adjust and manipulate without fatigue.
