

5 tips hidden on iPhone iOS 14 that few people know

iOS 14 was introduced by Apple with a lot of cool features for the iPhone. Helping users to use their phones in the most useful and convenient way.

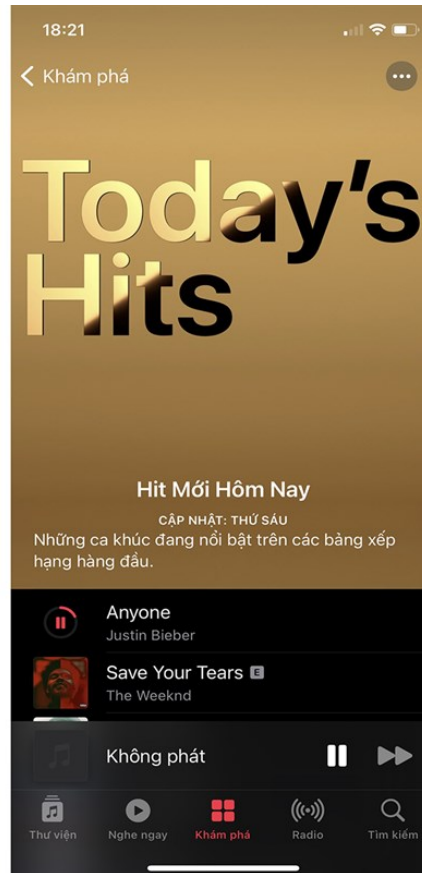

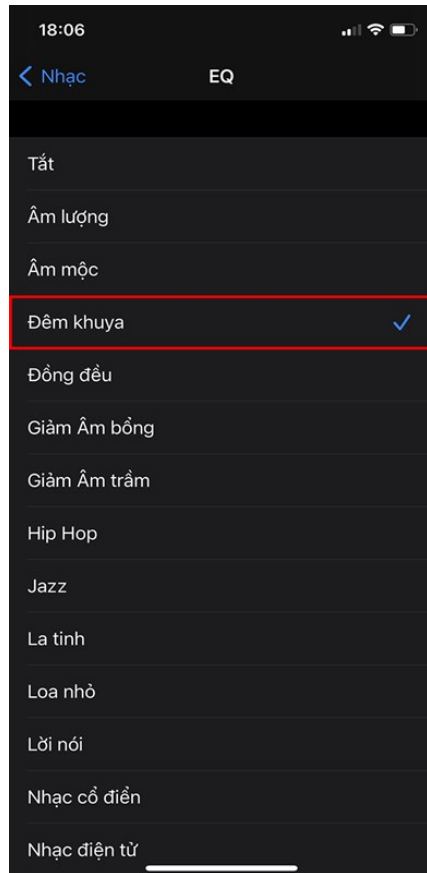

And here, I will introduce the hidden features on the iPhone that few people know about for you to exploit.

1. Make the volume louder

To have your iPhone play louder, go to **Settings > Music > EQ**.

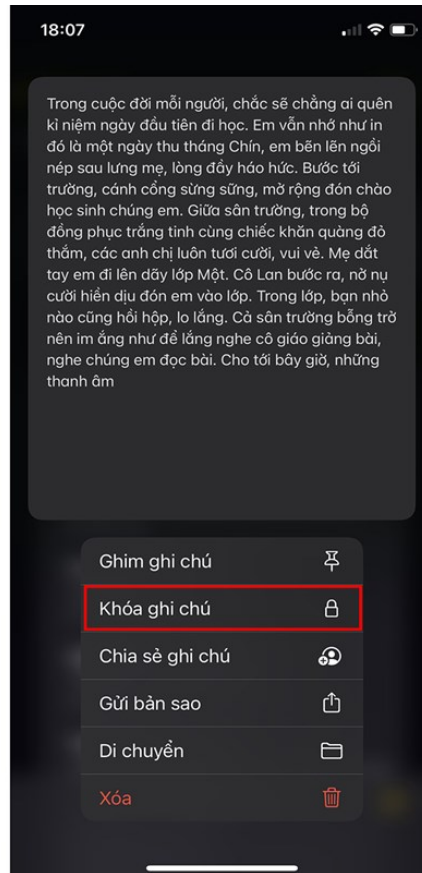

In the **EQ** section, you choose **Late Night**. Now the volume on your iPhone will be 20% louder.

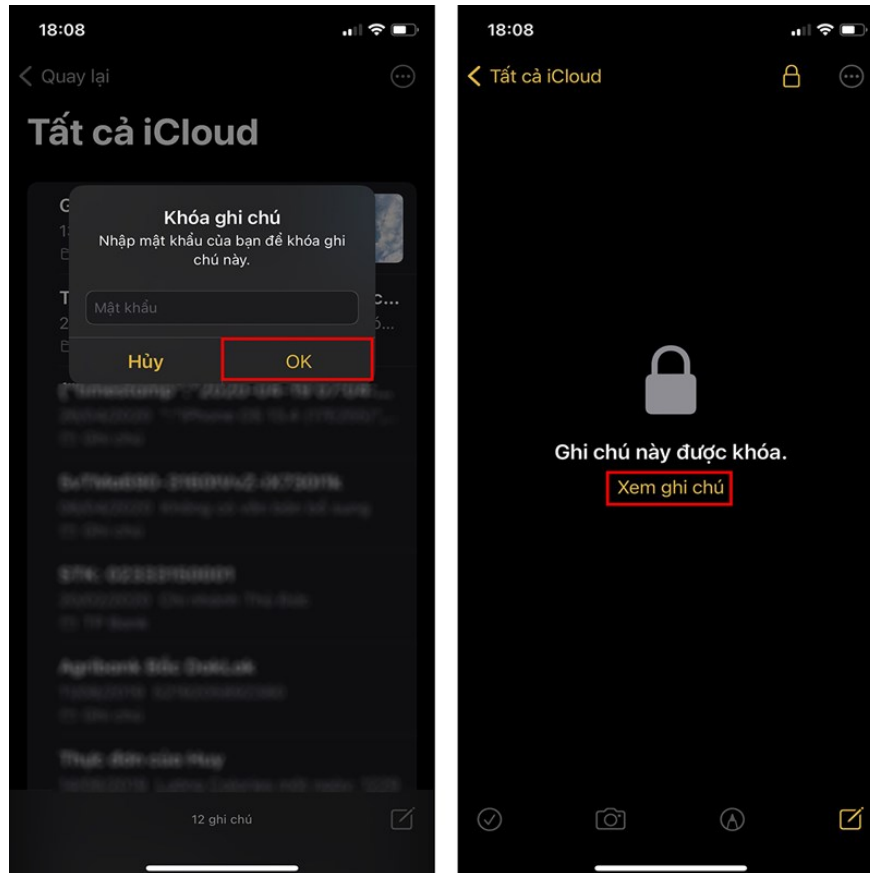

2. Password lock for important content

You often have to take note of important content and want them to be secure. Go to the **Notes** app > long press on the note> select **Lock Note** .

Note : For older iPhone models from iPhone 6/6 Plus and below, you swipe from right to left on the note and select the **Lock** icon .

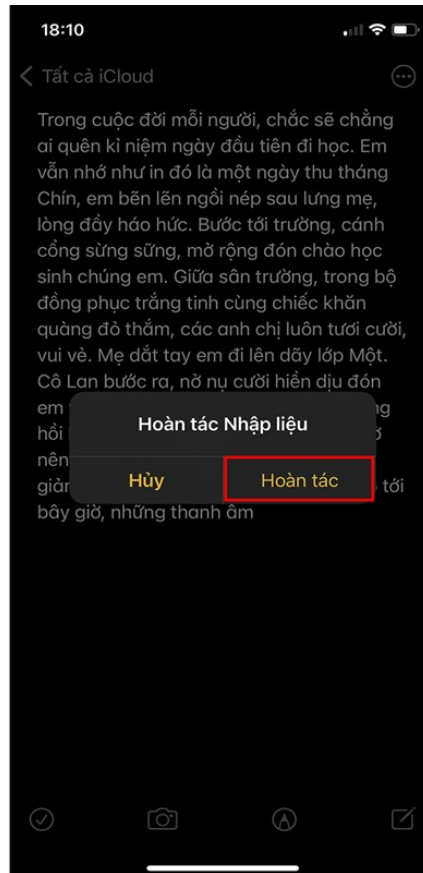

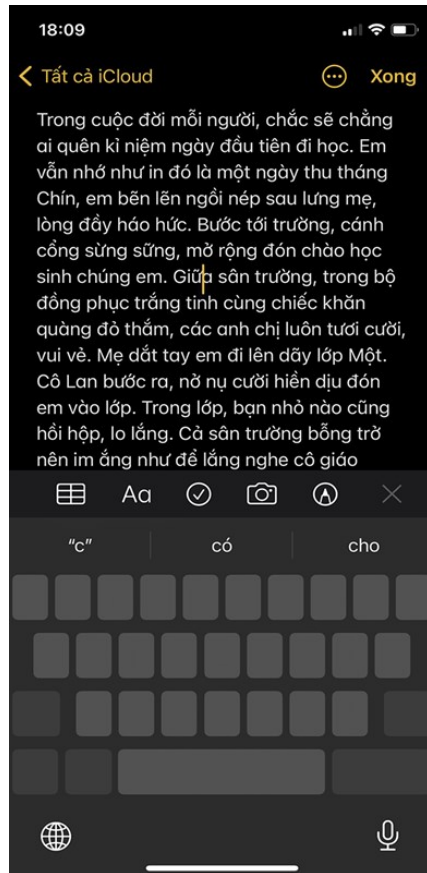

Enter your password and click **OK** . Your password is now required to view that note.

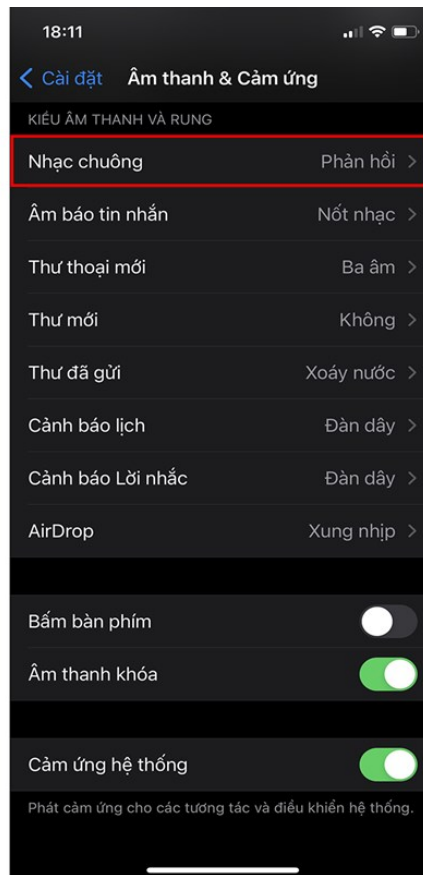

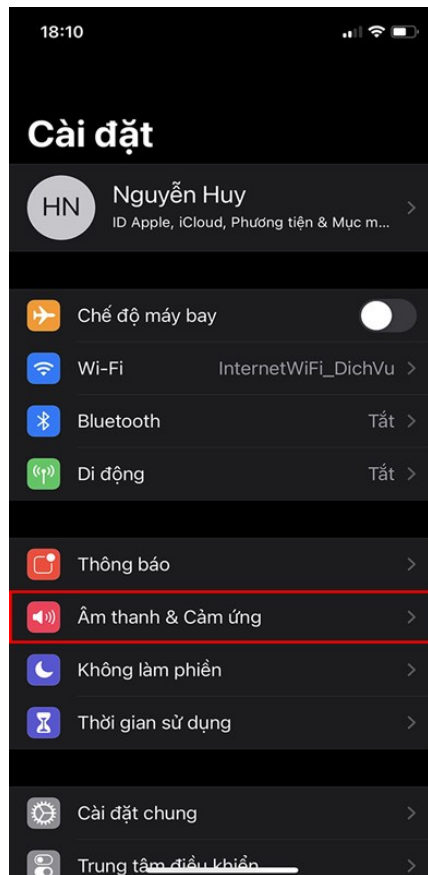

3. Correct spelling mistakes and delete whole paragraphs with just one action

Press the spacebar (**Space**) and start sliding, you will have a moving cursor, useful for quickly spelling some words in any text. Also, if you accidentally type a very long message but realize that you have to delete it, shake your iPhone to **Undo** delete the text.

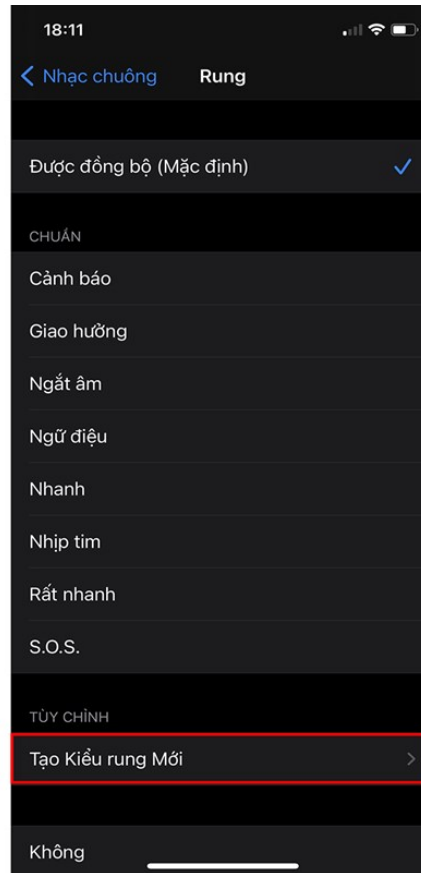

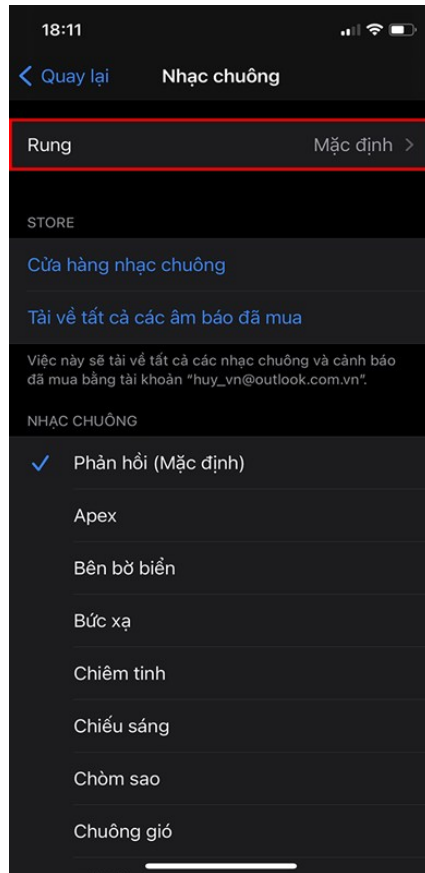

4. Create a unique vibration pattern for any contact

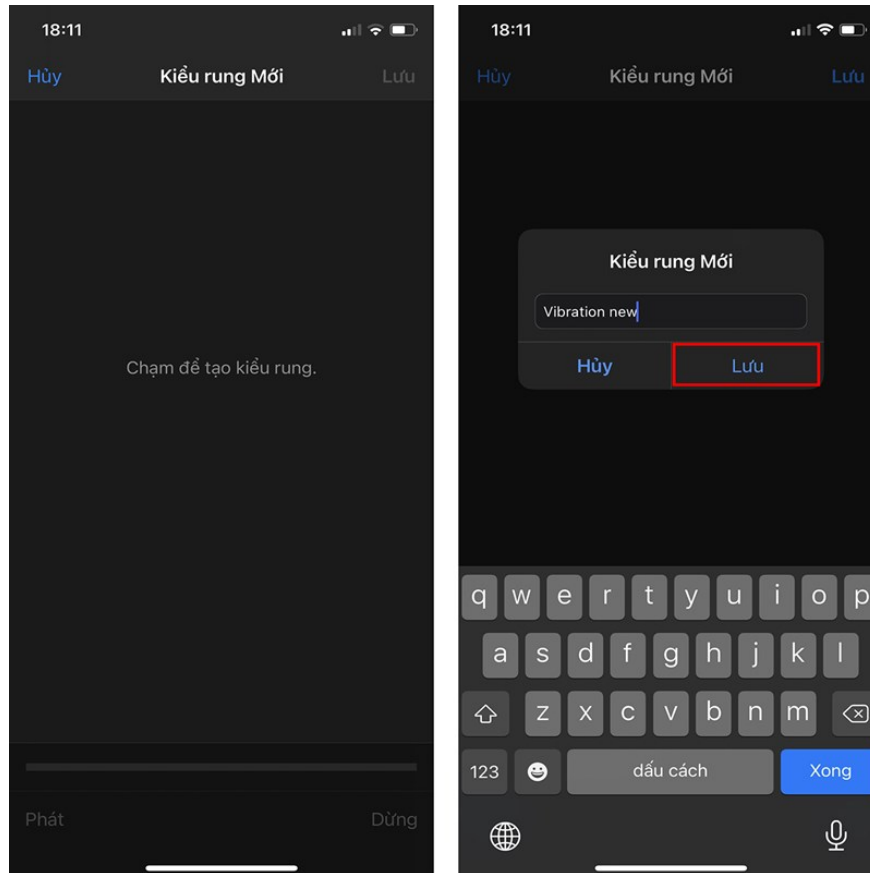

You go to **Settings** > **Sound & Touch** > **Ringtone** .

Next, choose **Vibrate** , scroll down to **Customize** and choose **Create New Vibrance** .

Finally, you touch the screen to create a new vibration pattern. Then give it a name and hit **Save** . You can now set a new vibration pattern for your contacts.

5. New features of iOS 14 make many people wonder

If you just own an iPhone 12 or just upgraded to iOS 14, don't be afraid of the blue or orange dots appearing on your phone screen. A green dot indicates the camera is on, and an orange dot indicates Micro is on. For example, when you use the TikTok app, two blue and orange dots appear simultaneously, indicating that the app is using both the camera and the microphone. This will help to control your iPhone battery life.

Wish you all have fun and have great experiences on your iPhone. Remember to press Like and Share your support.
