

5 useful hidden features on YouTube

YouTube has a lot of useful improvements, but these are hidden features that few users recognize.

YouTube has a lot of useful improvements, but these are hidden features that few users recognize.

Cut videos on YouTube

Sharing videos with friends is one of many actions done on YouTube. But sometimes you just want to share a part of the video. How?

When the video is running, right-click the point you want to cut and select 'Copy video URL at current time', so you copied the URL of the cut video. When others open this URL, the video will start running from the section you clicked right.

Search for the original video

Music search on YouTube sometimes annoys you because there are so many people uploading videos by themselves and naming the famous singer or musician. To find the original video of the artist or group, search at [youtube.com/disco](https://www.youtube.com/disco). However, this feature only works with foreign language songs (such as English, French) without giving the Vietnamese song results.

Easier editing

If you record a video vertically but want to share it horizontally or vice versa, visit youtube.com/editor. Here, the user can edit (including alternate) the existing videos or upload new videos.

Personal storage

YouTube keeps a list of videos they think you love. When you sign in to your YouTube account (Google account), YouTube displays a list of videos based on the list of videos you watch or share the most (for example, on social networks).

Watch video remotely

Access YouTube from [Youtube.com/leanback](https://youtube.com/leanback) address, you will be able to view the video in zoom mode with black background and white text with large font size. It is also possible to search with the virtual keyboard if you want to remotely click to enter the name of the video you want to watch.
