

5 ways to take screenshots on Galaxy Note 8

Screen capture is one of the essential features of smartphones. However, not all phones have the same screen capture method. Today, TipsMake.com will guide you to screen Samsung Galaxy Note 8 screen in many different ways.

After launching the Samsung Galaxy S8 and S8 Plus duo, users continue to welcome the company's new product Galaxy Note 8. The device generally has many similarities with the Galaxy S8, along with other upgrades. . The camera on the device will work better, with the S Pen with many changes. Especially the smoother experience without frame dropping status that limits the feeling of twitching, or the optimal software for face detection and iris sensitivity.

And if you have a Galaxy Note 8 in your hand, you can experience 5 ways to take different screen shots. With these 5 ways, you can change the way you take photos and use them to suit your needs.

1. Frequency handicap from AZ how to take screenshot of Android device screen

1. Take a screenshot of the Note 8 screen using Bixby assistant:

Like other virtual assistants like Siri, Google Assistant, . Bixby will support users a lot during the process of using the device. And with Note 8, we just need to activate Bixby Voice and **use the Take a screenshot command to take a screenshot** . Soon, the device screen will be captured easily.

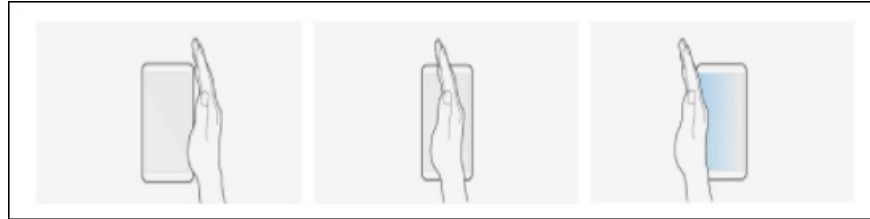

We press and hold the Bibxy button on the left side of the Note 8 device before executing the voice screen capture command.

2. Take Note 8 screen by gesture:

To take photos of Galaxy Note 8 device screen using gestures, users must first set up installation in the system.

We go to **Settings (Advanced) > Advanced Features (Advanced Features) > Palm Swipe to Capture .**
Users then activate this feature by **switching to On mode .**

So to take photos of Galaxy Note 8 screen, users only need to swipe from right to left on the screen.

< SMART CAPTURE

ON

Show additional options after capturing a screenshot. With Smart capture, you can:

- Capture hidden areas of the screen.
- Draw on the screenshot.
- Crop the screenshot.
- Share the screenshot.

3. Screen capture with power button and volume key:

This key operation is extremely familiar to users, most Android smartphones take screen shots with the power button and volume down key.

After pressing the key combination above, the device will vibrate and have a ringing tone to notify the device screen capture successfully. To review photos, swipe down from the notification bar and click on **Screenshot Captured** .

4. Use the S Pen to take a screenshot of Note 8:

On the Note 8 series, the S Pen has the ability to interact more with users. We can take notes on the screen or take screenshots with Screen Write support in the pen list.

We just need to **launch Air Command** , then click the **Screen Write** option. Then select the area you want to take a picture or add a note to the image if you want.

Finally when done, press Crop, Share or Save to to complete the screenshot editing process.

5. Take photos of Note 8 screen in rolls:

To take a full-screen picture like taking a photo of a document page or a newspaper page, you can use the scroll mode. We just need to press the Power button + volume down button at the same time. After the preview screen screenshot appears, press Next to Scroll Capture to activate the auto-scrolling feature and capture it into a long-format picture.

To capture to the desired content, simply touch the screen to stop the scrolling feature.
