

5 ways to turn off iPhone not everyone knows

Although turning off iPhone is quite simple. However, for new iPhone users, I don't know how to turn off the iPhone. In the article below, Network Administrator will tell you 5 ways to power off your iPhone.

By default, your iPhone device will go to 'sleep' after it has been active for a certain period of time. However, applications running in the background still work and still consume your device battery. Therefore it is best to power off your iPhone to extend the life and save battery power of your device.

Although turning off iPhone is quite simple. However, for new iPhone users, I don't know how to turn off the iPhone. In the article below, Network Administrator will tell you 5 ways to power off your iPhone.

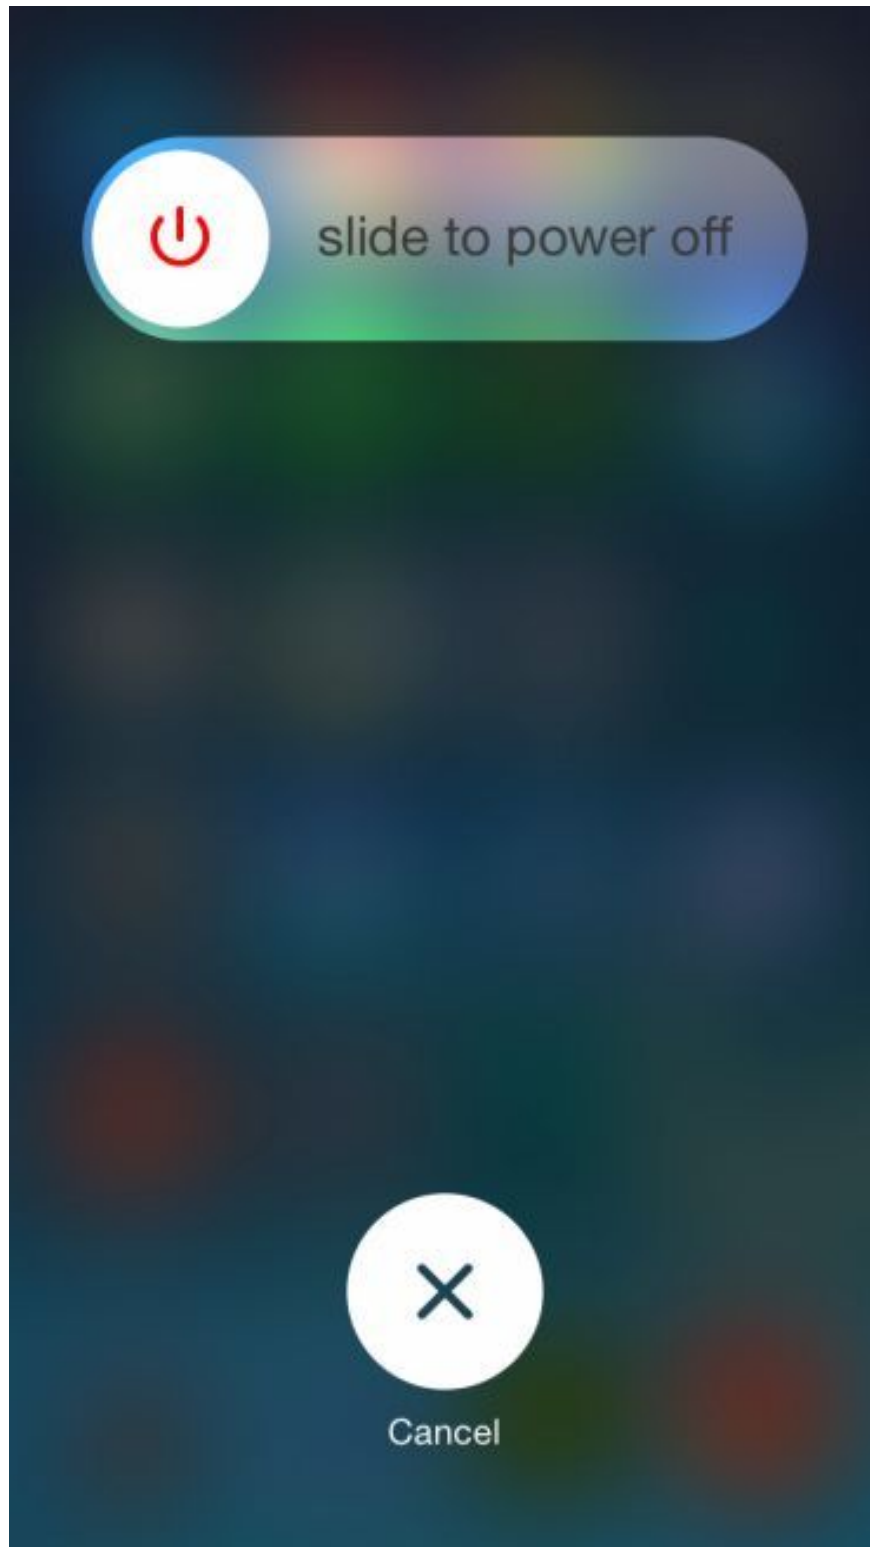

Ways to turn off iPhone

1. Turn off the power with the power key

To power off your iPhone, follow the steps below:

1. Press and hold *the Power On / Off button* in the top right corner of the iPhone phone (on the iPhone 6 series, the Power On / Off button is on the right) within a few seconds.
2. At this time, the slider appears *to power off*.
3. If you do not want to turn off the iPhone, click the *Cancel* button at the bottom of the screen.
4. If you want to turn off the iPhone power, slide the slider *to power off* to the right.
5. Once done, your iPhone will power off.

This power off method applies to all iPhone phones, from the oldest iPhone to the latest.

2. Turn off the power with the Hard Reset option

In some cases if the above steps do not work, especially when your iPhone device is locked. In this case you can use another method called *Hard Reset*.

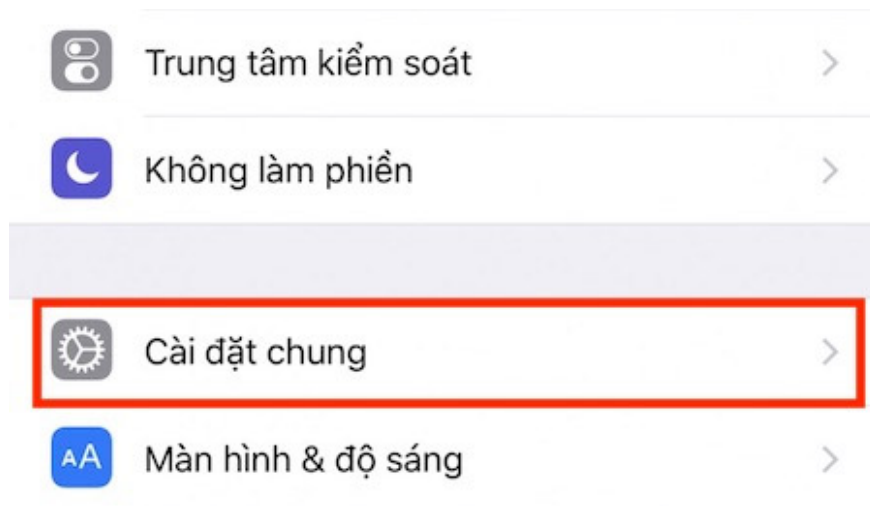

Note : Only perform Hard Reset if you perform steps to power off the iPhone but fail. To perform Hard Reset iPhone device you follow the steps below:

1. Press and hold the *Power On / Off* button and the *Home* button simultaneously .
2. Press and hold for about 10 seconds or more until the screen is black and the Apple logo appears.
3. After the Apple logo appears, release the buttons and allow iPhone to start normally.

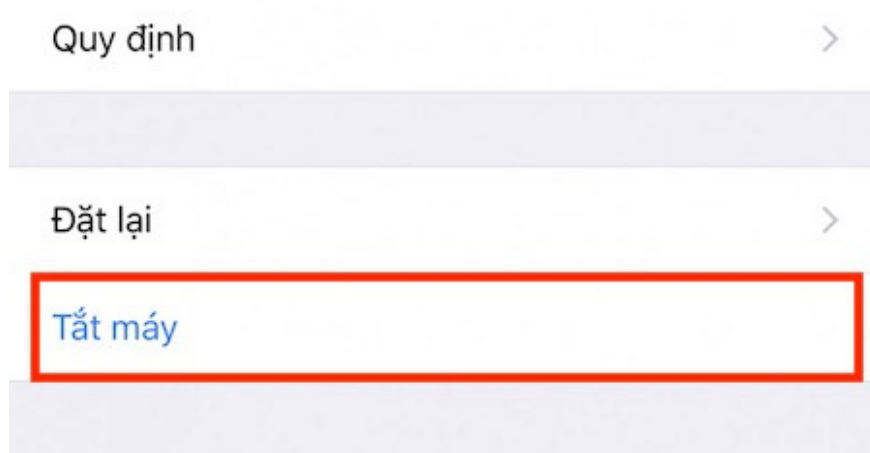

3. Turn off the power in the Settings section

In the Settings section of the iPhone, there are some functions that require restarting the computer to be used. As a result, users can power off the device through these functions without having to use the power key. This is quite useful when you don't want to affect the power key of the machine too much.

To power off iPhone in Settings, go to *Settings > General settings*.

Next, select *Shutdown* is done.

4. Turn off the power using AssistiveTouch tool

In case your power key is broken, the easiest way to turn off your iPhone is to use Assistive Touch, also known as the Virtual Home key built-in by Apple for your devices in the Settings section.

To do this, you first need to activate AssistiveTouch by going to *Settings*> *General Settings*> *Accessibility*> *Assistive Touch*.

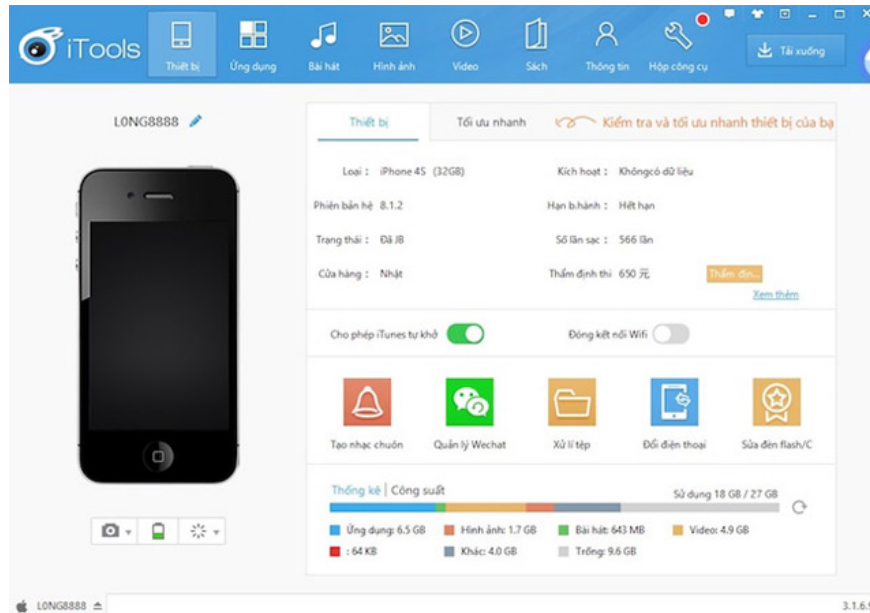

At this time, the device will display the virtual home key icon on the screen, you just need to press the virtual Home key and select Device and hold the icon *Lock screen* until the machine appears *Slide to turn off the power* is possible successful shutdown.

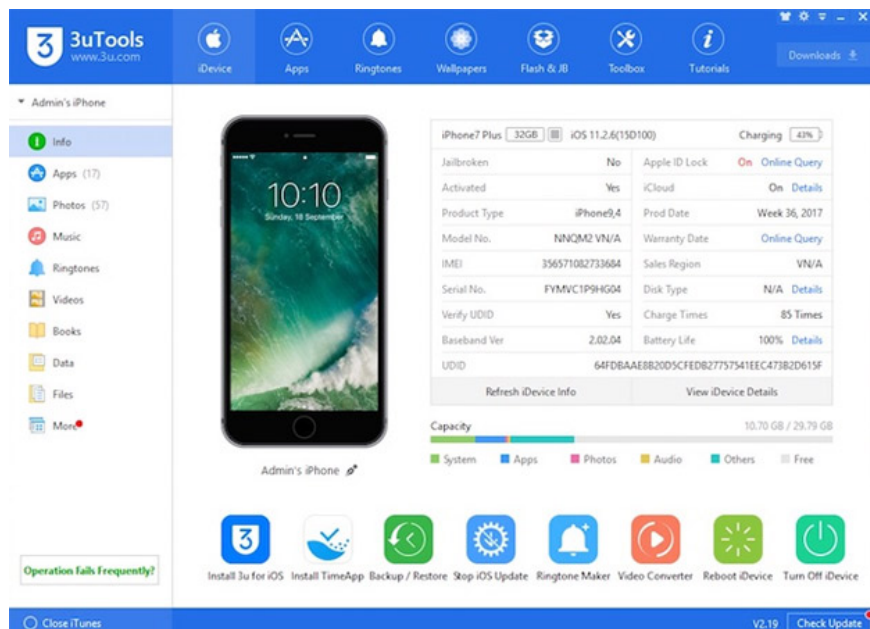

5. Turn off the power by software

If you feel that the way to turn off iPhone on the same time is too much, you can ask for support from 3rd party applications to make the iPhone power off easier and more convenient. Some of the applications on the computer today that support iPhone power off are: iTunes, 3uTools, Tongbu, . these applications work when the device has iTunes installed.

1. Download iTunes software for Windows.
2. Download 3uTools for Windows software.

Using these software to power off the iPhone, simply go to the main menu interface and need to find the *Shut Down* or *Turn Off* button to *turn* off the device quickly.

How to turn on the iPhone source again

If you want to power on your iPhone again, follow the steps below:

1. Press and hold *the Power On / Off button* until the Apple icon appears on the screen.
2. When the Apple icon appears, release the hands at the buttons and wait for the iPhone to restart.
