

5 web browsers support Dark Mode / Night Mode for Android phones

Using applications that support the dark interface, night mode is really necessary, it will help us reduce the negative effects on the eyes. And in this article, Network Administrator will share with you 5 web browsers for Android phones that support Dark Mode / Night Mode.

When using the phone for a long time, users are likely to experience eye fatigue and discomfort, which is due to the screen intensity being too bright, especially the amount of blue light emitted from the phone screen. Therefore, using applications that support the dark interface, night mode is really necessary, it will help us reduce the negative effects on the eyes. And in this article, Network Administrator will share with you 5 web browsers for Android phones that support Dark Mode / Night Mode.

1. How to turn on the dark background interface on iPhone applications
2. How to activate Dark Theme on YouTube for Android
3. How to install the Dark Mode interface for all Windows 10 screens

1. Firefox

In fact, this feature has not been built into the web browser by Mozilla developers. However, the solution for this is very simple, just by installing similarly capable add-ons (dark mode or night mode) on Firefox browser is also quite good, still giving you the experience great.

1. Download Firefox for Android

Using the dark background for Firefox browser, download and install the add-on "Simple night mode for Quantum" or "Dark Fox".

2. Opera Browser Beta

Although the dark screen mode is currently only released on the trial version of Opera and is not really complete. However, if you only use it at sensitive times, you can still download Opera Browser Beta and experience it.

1. Download Opera Browser Beta for Android

How to activate is easy, go to Opera browser> Click on the *O* icon (red) to open the function settings list> Select the *Night mode* item .

When the new dialog box appears, select *Enable*, then the browser interface supports the dark background like in the picture.

← Night mode

Enabled

Brightness

Use dark theme

4. Samsung Internet Browser

At first in beta, this is just a small feature that helps users reduce screen brightness when using Samsung Internet browser at night. However, after being officially released with the name Night mode, this feature has brought users a night experience a much more pleasant way.

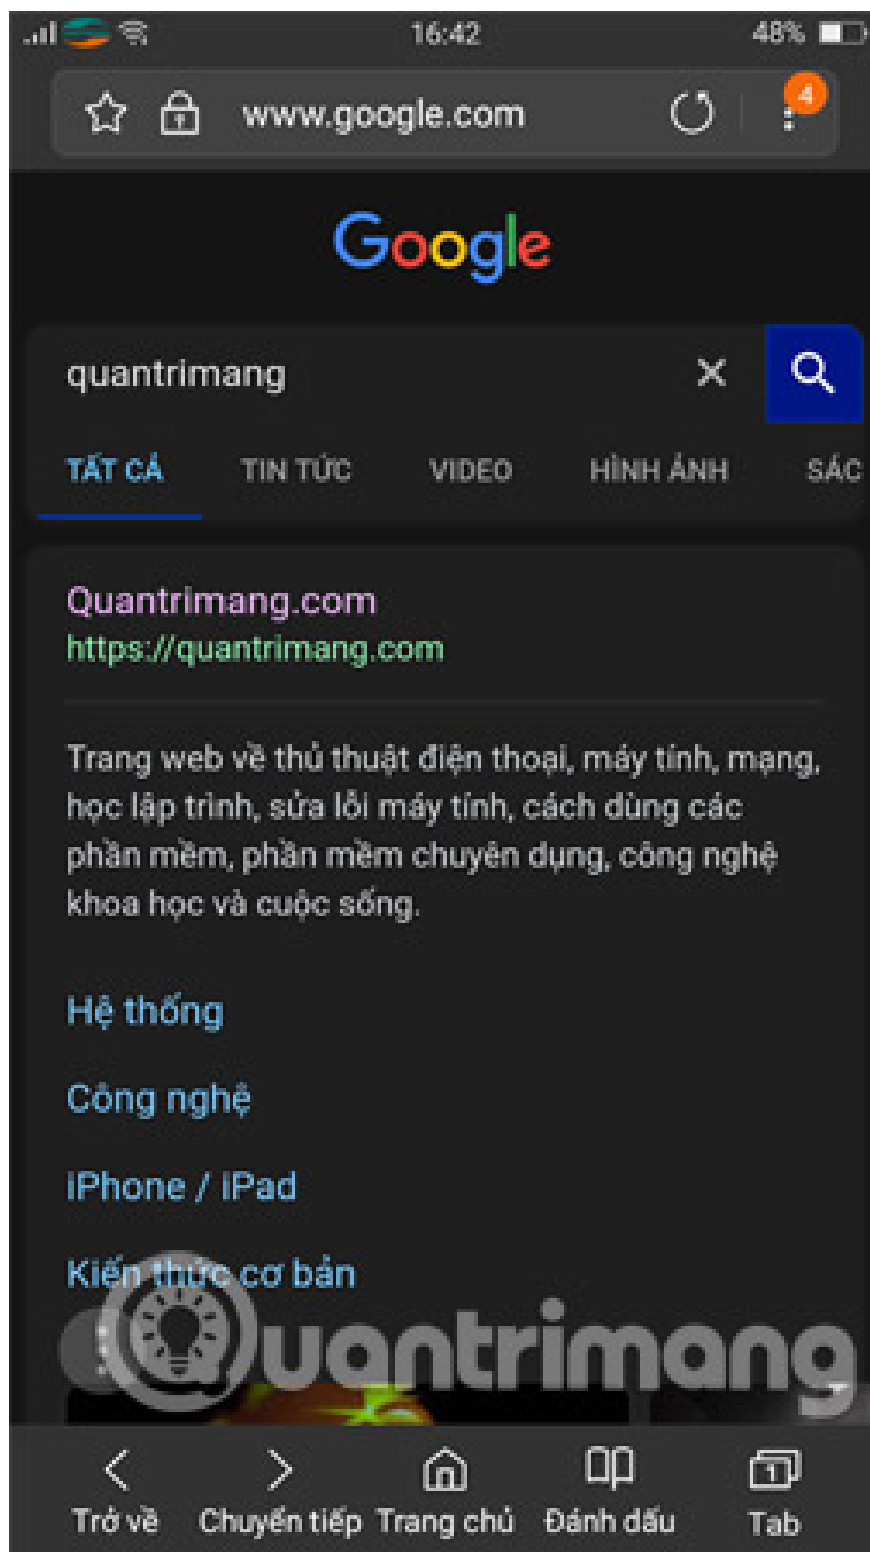

1. Download Samsung Internet Browser for Android

You can easily use the Samsung Internet browser's dark background mode with just 2 basic settings. First of all, move to the quick set function list (circle icon on the left corner of the interface) and then activate Night Mode to finish.

Now, you can surf the web on Samsung Internet Browser with night mode.

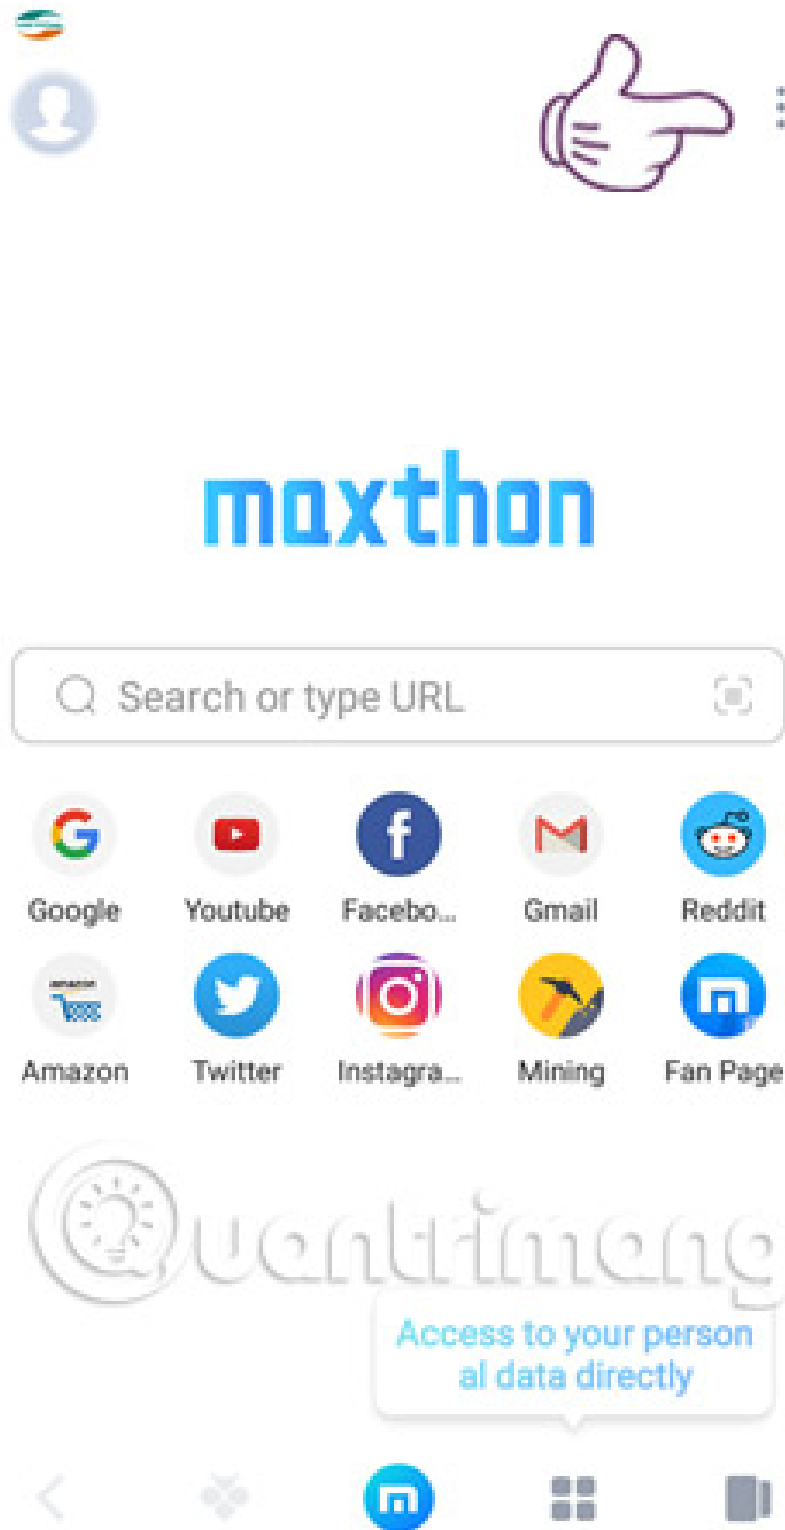

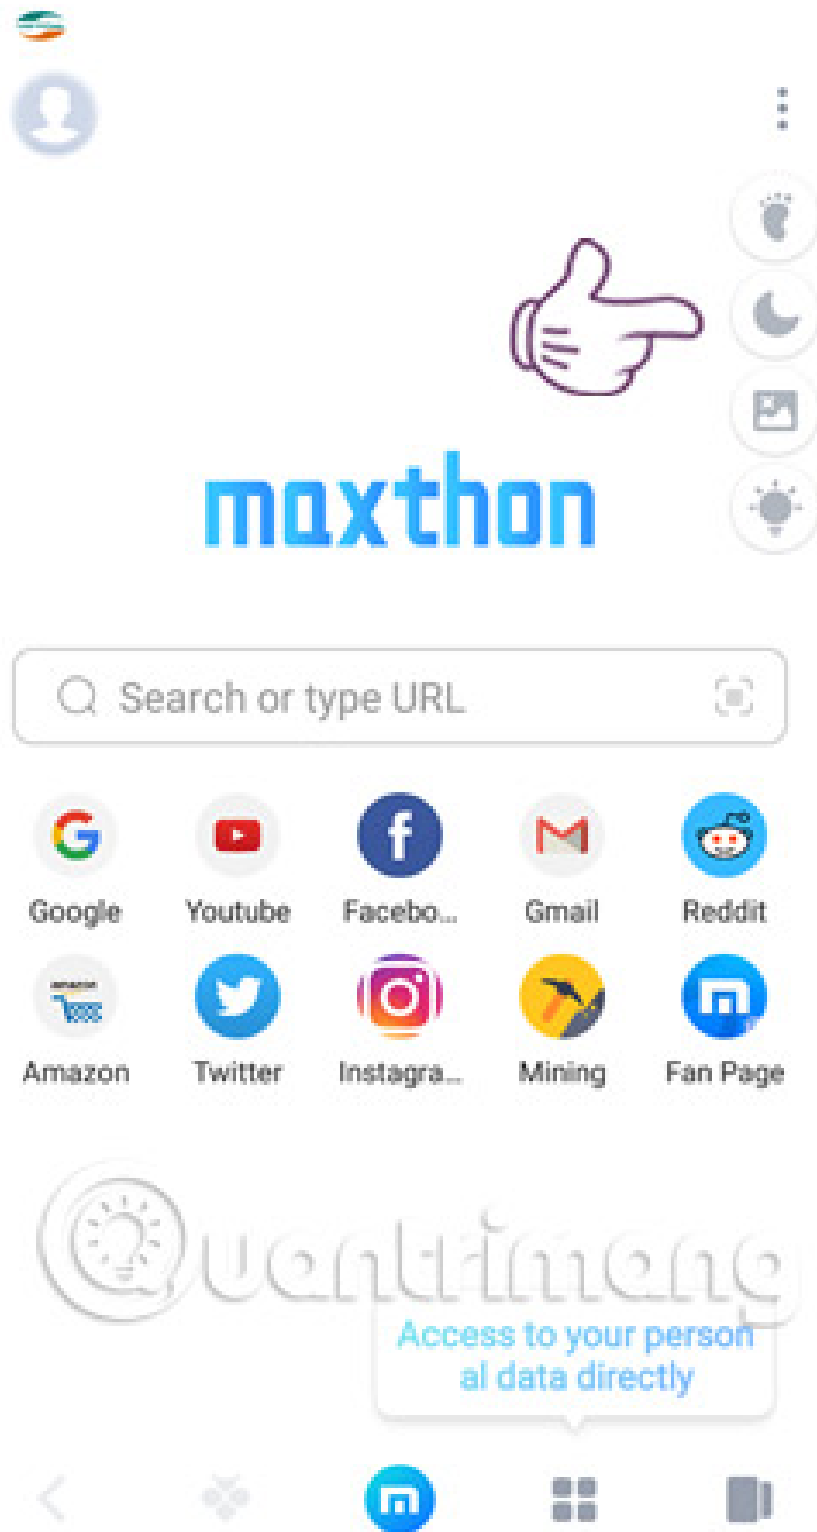

5. Maxthon Browser

Add a web browser that supports Dark Mode / Night Mode for Android phones that you should refer to as Maxthon Browser. This is a great tool to help you surf the web with a black interface more comfortable than light from a bright web interface.

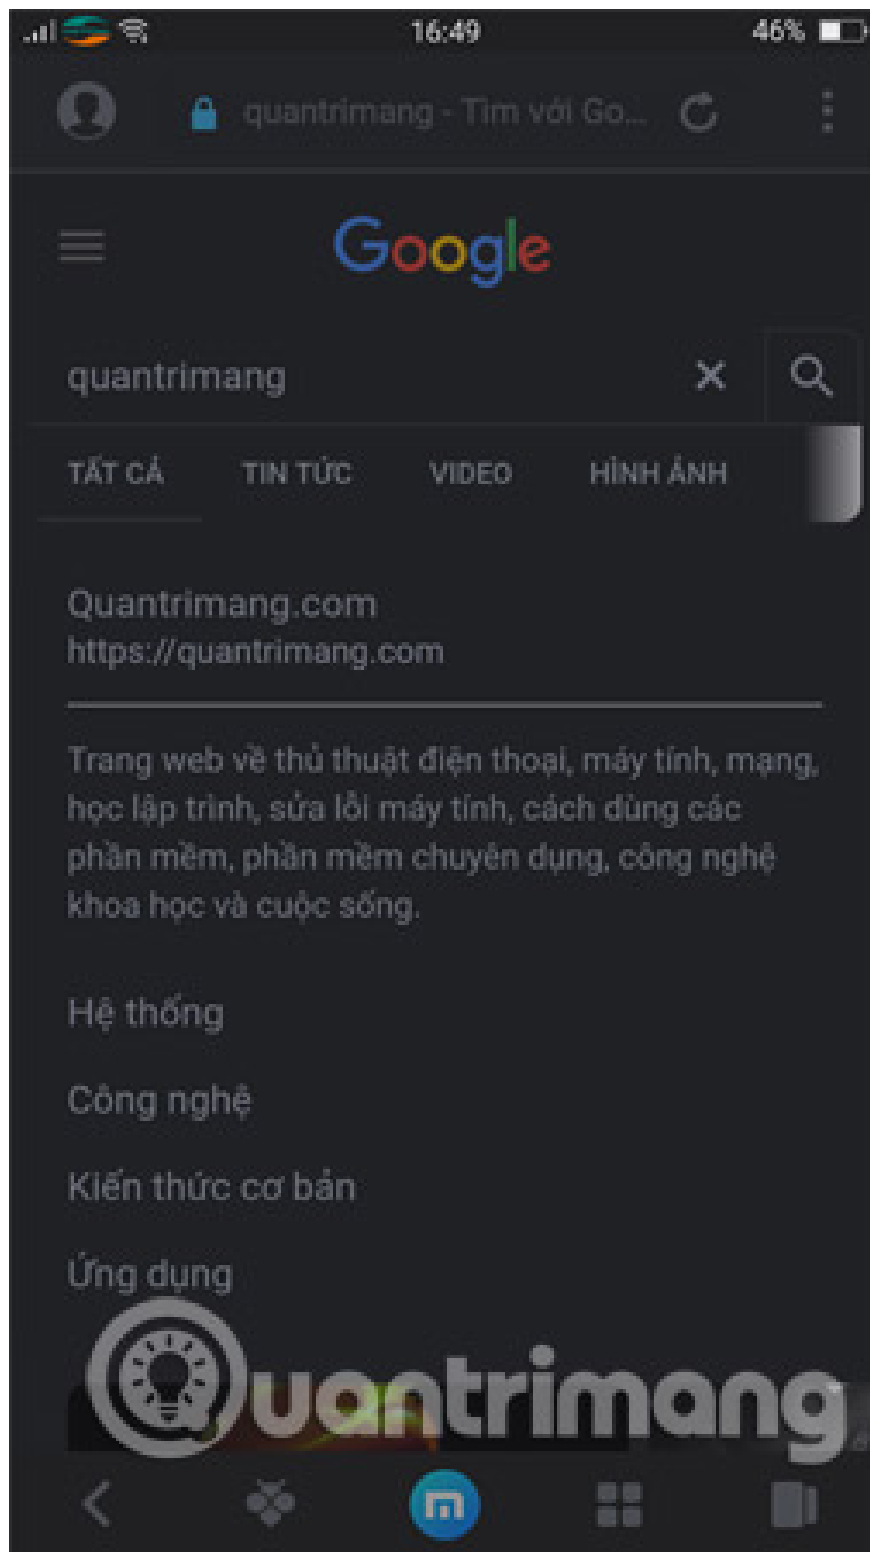

1. Download Maxthon Browser for Android

To activate Maxthon's Night mode, simply click the three dots icon in the upper right corner of the address field to open the list of advanced settings. Then, select the moon shaped icon to successfully activate Night mode.

Similar to the browser for Android above, Maxthon Browser also allows you to use Dark mode only after a few basic settings.

Above are 5 web browsers that support Dark Mode / Night Mode for Android, please refer to and choose for yourself a suitable browser to protect your eyes, avoid eye strain, eye pain when reading press, watch movies, . for too long.
