

5 Websites to Add Music to Video Online for Free 2024

Have you ever had a headache trying to find a way to combine good music without copyright? Hoang Ha PC will help you discover free online music mixing websites.

1. YouTube Studio

No need to introduce much, surely everyone knows that the largest audio platform is Youtube. Every day, millions of music files of various genres are uploaded to the website. Therefore, you can easily choose a suitable song for your video. Not to mention, Youtube is also a website to combine music into videos online for free. Therefore, you will have thousands of surprising ideas when exploring the music treasure here.

In addition, Youtube also makes users excited thanks to modern video editing tools. The web interface is intuitive, friendly and easy to use. The time for uploading or downloading files is shorter. However, the limitation of Youtube is that it limits the songs in the library and requires a Google account to access.

2. Add Audio To Video

After Youtube, you must know Add Audio To Video is a website **that merges music into videos online for free**. The advantage of the website lies in processing all file formats such as **mp3, mp4, avi, mov, wmv**. The main function of Add Audio To Video is to merge audio or music into video. All operations are performed online on the website such as uploading the audio and clips to be selected. Then, you wait a few minutes for the music processing to be completed. So without having to be good at technology, you can still make a video to your liking.

Besides the advantages, the disadvantages of the web are that the video editing tools are limited. In addition, after only a few hours, the history of uploaded files will be completely deleted. That is why, you need to store the files on your computer instead of on the web in case you need to edit them again.

3. Online Converter

If you are not good at technology, Online Converter is the **music mixing website** for you. Because the tools and operations here are extremely simple and easy. In particular, **Online Converter** can help you insert new sounds

while still keeping the original sound. In case the video is longer than the music file, the sound will automatically repeat. In addition, the upload and download speed is strong and the output is of high quality.

For **Online Converter** , you always have two options before inserting an audio file. One, you will check the box to replace the existing audio in the video. Two, you agree to keep the existing audio file and insert new music. In short, Online Converter is a simple and suitable free online music to video website for everyone.
