Here are the next unique and helpful products for human life to be included in Time Magazine's list of the 50 best inventions of 2018.

1. The 50 most wonderful inventions of 2018 by Time Magazine (Part 1)
2. 50 Time Best Inventors of 2018 by Time Magazine (Part 2)

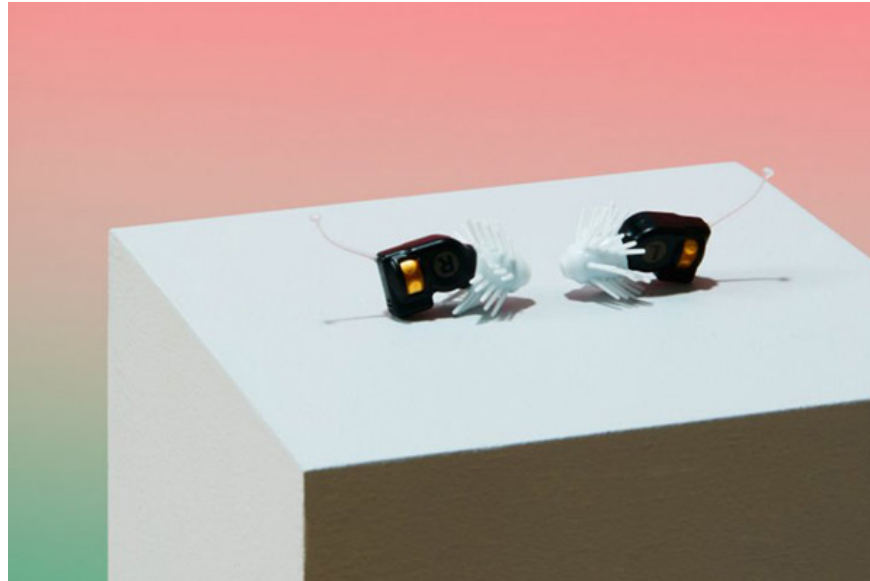

Electric wheelchair Model Ci

WHILL's Model Ci wheelchair is designed to be removable, convenient for transportation. Vehicles designed with "Omni-Wheels" wheels can 'climb' up to 5cm, moving over obstacles. Model Ci's speed is about 16km / h.

Eargo Max hearing aid device

Compared to traditional hearing aids (large size, lack of aesthetics, cream and accessories), Eargo Max hearing aids are superior to their small size like a built-in headset. bring comfort to wearers.

In particular, Eargo Max is rechargeable for use, light water resistant and difficult to damage. This hearing aid is suitable for people with mild to moderate hearing loss.

Universal Made In lid

This is the lid for the cookers made from stainless steel silicon covered with 3 different designs to fit all the standards of the kitchen cooker on the market and help avoid the undesired escape of steam when heated.

Robot Arm - Panda

Robot Arm - Panda developed by Franka Emika, a robot company in Germany to serve small businesses. Thanks to the rotation design with 7 different axes, Panda is quite flexible, can perform many actions that require high meticulous to replace human hands. Panda helps increase productivity without having errors.

IRobot Roomba i7 + vacuum pump

Roomba i7 + not only vacuums faster but also smarter. Thanks to the integration of Amazon's Alex Assistant and Alexa smart solutions, Roomba i7 + can even answer some of the owner's questions and perform vacuuming when receiving orders (including remote) of master. After completing the work, the Roomba i7 + will automatically move to its own charging dock (integrated vacuum) to 'put' all the dirt into a small bag with good biodegradability.

Bracelets eliminate bad habits

This is a product developed by HabitAware founded by Aneela Idnani to help users eliminate bad habits. This Keen bracelet keeps track of a person's repeated actions and is able to judge whether it is bad action (sucking hands, biting nails .) If the user does this too Many, Keen will vibrate to help users gradually eliminate this bad habit.

Model 3 smart water heater

Heatworks models develop direct hot water heating with charcoal, only heating the water when the user needs it, completely different from other hot water bottles on the market using a metal bar heating method. This helps users avoid having to wait for long hot water, leaking water bottles or short-circuiting, and it can help save electricity costs about 240 USD / year. This smart water heater can be used via the App on Smartphone to make it convenient for people to use. Specifically, users can adjust the hot water temperature on the App (within the safe temperature range set by the manufacturer), Model 3 will immediately heat the selected temperature.

Model aircraft specializing in relief deliveries

Zipline - a start-up startup company has launched Zips, a new generation unmanned aircraft that can fly at speeds of 120 - 160 Km / h and carry relief medical goods up to 4 kg. Zips may be able to deliver 500 times in 1 day.

Harry Potter wand - Kano Coding Kit

The Kano wand, developed by Kano Computer, works similarly to the witch wand in the Harry Potter series, which can turn the color of the potion, the apple up, and turn the giant into . on Tablet or computer screens. Of course, children must play through puzzles to use the 'transformation mantra'. This helps children learn about technology as well as learn law and creativity through magic.
