Please continue to explore the unique and useful inventions listed in Time Magazine's 50 Best inventions of 2018.

1. The 50 most wonderful inventions of 2018 by Time Magazine (Part 1)

## **Netgear Wi-Fi Orbi Voice and Orbi Voice**

Netgear's Wi-Fi Orbi set includes a Router and a Satellite, capable of providing wireless coverage to every corner of your home without having to set up 2.3 wifi sets in the home. When you open the wifi, the Satellite will sync directly the wifi wave and the password from the Router so wherever the Satellite is located, it still ensures strong wifi.

Netgear Orbi Wi-Fi (left) and Orbi Voice (right).

Orbi Voice is both a Router and a Alexa integrated smart device. Users use Orbi Voice to control indoor compatible devices via the App on the phone.

### **GPS device detects LynQ**

LynQ is a device that integrates GPS and long-range radio frequencies with two connected and synchronized devices displayed on a small LCD screen that is both a compass and a road map. This set of devices allows owners to connect with family members and pets to find them quickly in case they get lost.

In particular, LynQ has built-in GPS, so it works well without any Wi-Fi, phone, or an App.

### **Bose Sleepbuds**

Bose Sleepbuds is a headset that can emit pleasant sounds from nature such as the sound of waves, rustling leaves . to serve people who have difficulty sleeping or headache because of the sounds coming from around.

Sleepbuds has a very small size of only 1cm (long and wide) and weighs only (about 1.4g so users can safely use it without feeling pain or discomfort.
