

# 57.7 billion pixels photo taken of a stretched Bentley in a picture in Dubai

As we know Dubai is one of the richest and most luxurious cities in the world. This is the convergence of the most advanced and expensive goods in the world and multibillion-dollar buildings.

As we know Dubai is one of the richest and most luxurious cities in the world. This is the convergence of the most advanced and expensive goods in the world and multibillion-dollar buildings.

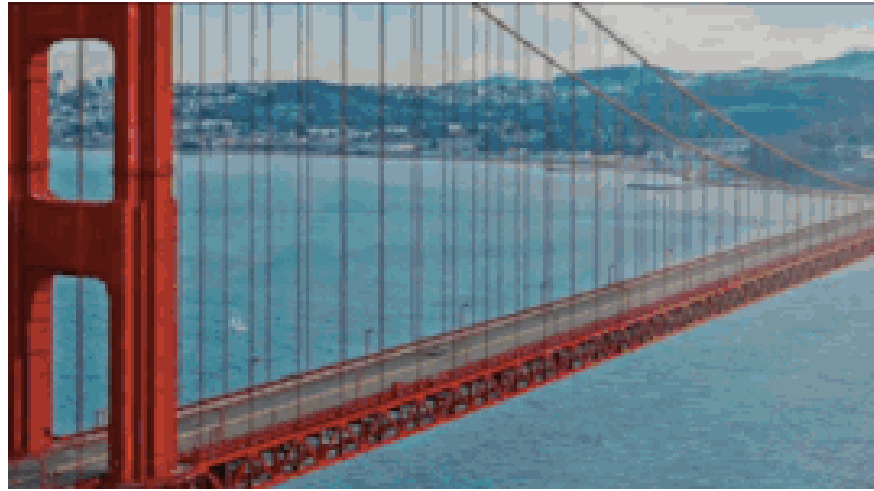

To help us know more about the city's beautiful scenes and their modern technologies. Therefore, recently luxury car manufacturer Bentley has just released a panoramic photo of Dubai city 57.7 billion pixels that many viewers must be amazed. Not only that, the picture can be enlarged to see the smallest details of the Bentley Flying Spur W12 in the street.

To capture this unique image, Bentley had to use a special dedicated camera and was placed on one of Dubai's tallest buildings to get this photo.

Previously, Bentley also released a 53 billion pixel image to introduce the Mulsanne on the Golden Gate Bridge in California. The special thing about the 53 billion pixel photo at that time was when the zoom was maximized, users could clearly see the Bentley logo on the headrest inside the car's seat, even the stitches on the car seat.

To get the picture we see the smallest detail on the Bentley Flying Spur W12, the staff takes 48 hours to achieve this masterpiece and this photo was created from 1,825 frames. individually and to be able to download photos to the computer takes 18 hours. Doing such a photo is a challenging task because the camera must withstand temperatures of 40 degrees Celsius and 25km / h winds.

To avoid the temperature and wind to make this photo is not simple. Bentley had to contact NASA to order the right technology. If you zoom in on the image, you will find the Bentley Flying Spur W12 as shown below:

If you want to see the smallest details of the Bentley in this photo, you can enlarge the 57.7 billion pixel image here.
