

5G smartphones will be released in 2019

In 2018, a number of countries have started deploying 5G networks and many big names in smartphone manufacturing have confirmed that they will launch 5G smartphones in 2019.

The 5G network is at least 10 times faster than 4G, which is expected to open a new era, completely changing the user's experience. In 2018, a number of countries have started deploying 5G networks and many big names in smartphone manufacturing have confirmed that they will launch 5G smartphones in 2019.

The first 5G smartphone launched in 2019 is probably Samsung Galaxy S10.

The P30 or Mate 30 is a 5G smartphone that will be released by Huawei next year.

Recently, Pete Lau - CEO of OnePlus also confirmed that the company will bring the 5G smartphone to market next year. This means that the company's 5G smartphone is likely to be OnePlus 7 or OnePlus 7T.

Oppo also participated in the 5G phone race when he confirmed that they successfully connected the customized Oppo R15 smartphone to the 5G network.

Another Huawei mobile phone brand Honor also participated in the race.

At the end of October, Xiaomi confirmed that Xiaomi Mi Mix 3 5G will be released in the first quarter of 2019.

Sony has also confirmed its first 5G smartphone, the Xperia XZ3, which will be released next year.
