

## 6 best gaming motherboards in 2019

Here is a list of 6 good gaming motherboards, worth buying the most today, please refer.

The mainboard is the bridge between the components in the computer system with each other and with the peripherals. Owning a good mainboard, you will have the basis to build your PC staging.

Here is a list of 6 good gaming motherboards, worth buying the most today, please refer.

### **Gigabyte Z390 Aorus Ultra**

Gigabyte Z390 Aorus Ultra is considered to be one of the best motherboards in 2019.

Chipset Z390 Memory (4) DIMM, 64GB, DDR4-4266 PCIe slots x16, x16 (x8), x16 (x4), (3) x1 Video ports  
HDMI USB ports (10) rear IO, (7) internal Storage (3) M.2, (6) SATA Network Ethernet, 1733Mbps 802.11ac  
Lighting Heatsink and DIMM slots RGB, (2) RGBW headers

Just looking outside, any gamer is super pleased with this mainboard with I / O armor, M.2 slot protection, thick heatsink pieces from aluminum monolithic . all are extremely polished. meticulous.

Gigabyte Z390 Aorus Ultra can support up to 3 M.2 ports and has a beautiful RGB system.

Reference price: 6,490,000 VND

### **ASUS ROG Strix Z390-I Gaming**

Chipset Z390 Memory (2) DIMM, 32GB, DDR4-4500 PCIe slots (1) x16 Video ports HDMI 2.0, DisplayPort 1.2 USB ports 7) rear IO, (1) front IO, (4) internal Storage (2) M.2 , (4) SATA Network Ethernet, 866Mbps 802.11ac Lighting Edge RGB, (1) Addressable Aura RGB

There is a compact design, just a little bigger than the palm, but ASUS ROG Strix Z390-I Gaming is extremely powerful not inferior to the regular ATX, Micro-ATX motherboards in terms of specifications. This is the perfect choice for small PC systems. However, ASUS ROG Strix Z390-I Gaming has a slight drawback in ports.

Reference price: 6,090,000 VND

### **ASUS ROG Maximus XI Hero Wi-Fi**

Chipset Z390 Memory (4) DIMM, 64GB, DDR4-4400 PCIe slots (2) x16 (x16 or dual x8), x16 (x4), (3) x1 Video ports HDMI, DisplayPort USB ports (8) rear IO, (7 ) internal Storage (2) M.2, (6) SATA Network Ethernet, 866Mbps 802.11ac Lighting Heatsink RGB, (2) Aura RGB, (2) addressable Aura  
ASUS ROG Maximus XI Hero Wi-Fi is one of the best motherboards with the Z390 chipset right now, which is a great choice for those who are looking for a nice mainboard line, from a big brand and performance. Great overclocking.

Reference price: 7,580,000 VND.

**MSI MPG X570 Gaming Pro Carbon WiFi**

Chipset X570 Memory (4) DIMM, 64GB, DDR4-4400 PCIe slots x16, x16 (x8), x16 (x4), (2) x1 Video ports  
HDMI USB ports (8) rear IO, (4) internal Storage (2) M.2, (6) SATA Network Ethernet, 2.4Gbps 802.11ac  
Lighting Three zone RGB (3) RGB header

MSI MPG X570 Gaming Pro Carbon WiFi is integrated with X570, AMD's new line of chips that should be ready to support the full exploitation of the recently released Ryzen 3000 CPU series.

The MSI MPG X570 Gaming Pro Carbon WiFi supports the 4th generation PCIe connection protocol standard for twice the bandwidth of 3rd generation, helping to increase the data transfer speed of the hard drive and support Wifi connection. 7,465,000 VND.

### **Gigabyte Z390 UD**

Chipset Z390 Memory (4) DIMM, 64GB, DDR4-4266 PCIe slots x16, 2 x16 (x4), 3 (x1) Video ports HDMI  
USB ports (6) rear IO, (4) internal Storage (1) M.2, (6) SATA Network Ethernet  
Although there is no eye-catching appearance, Gigabyte Z390 UD possesses advanced features of Z390 chipset,  
can be overclocked and is very affordable.

Reference price: VND 3,150,000.

**ASUS TUF H370-Pro Gaming Wi-Fi**

H370 Memory Chipset (4) DIMM, 64GB, DDR4-2666 PCIe slots x16, x16 (x4), (4) x1 Video ports D-Sub, HDMI, DisplayPort USB ports (7) Rear IO, (6) inside Storage (2) M.2, (6) SATA Network Ethernet, 1.73Gbps 802.11ac Lighting Edge RGB, (1) Aura RGB header

Although H370 is not a new chipset, it can still meet what a mid-range gamer needs. From the name of this mainboard, it is also clear that it supports wifi connection.

H370 possesses durable, affordable components that are a reasonable choice for gamers with tight budgets.

Reference price: VND 4,018,000.
