

6 Criteria for choosing a good PC headset with mic

HACOM would like to introduce to you how to choose the best PC headset with mic in 2021 for those of you who are looking to choose for work, study, and entertainment.

PC headsets with mic are always chosen by everyone when needed to work, study or entertain with computers - especially PCs; simply because this product helps create a private space for the user or more simply, helps the user avoid noise and focus on work most effectively.

Choosing a good headset with mic for PC for long-term use, do you know how? Let's explore with TipsMake the criteria for choosing a PC headset with mic you should know

1. Choose according to the purpose of use

Similar to other popular headsets with mics, headsets with mics for PCs will also be divided into many types with different prices. Depending on your purpose of use, choose a suitable headset with mic for PC. This will save you costs effectively as well as significantly maximize performance.

2. Choose PC headset with mic according to price

The price will also fluctuate greatly from the headset models with mic for PC from hundreds of thousands to several million dong, of course, this is also like our grandparents often say "expensive but worth it" - With high-end headphone brands, the cost will be very high, in return you will enjoy the right quality. From clear sound, good bass beats, durability along with great after-sales service.

3. Choose a headset with a mic specifically for PC

Similar in purpose of use, many companies and brands also have product lines of PC headsets with mic - specifically designed, suitable and convenient for the user group. You do not need to worry, or have a headache comparing features, or checking the quality of PC headsets with mic, whether they are good or not.

4. Choose a PC headset with a mic of your own design

Similar to the design classification of headphones with microphone, there are also many types, the most popular are on-ear and in-ear. Depending on your preferences and the most convenient level, you should consider choosing a model:

1. On-ear headphones: The headphones are designed in a closed form, helping users to use them comfortably for long periods of time, as well as focus more on work. On-ear headphones are often designed to be large and bulky, more suitable for users in private spaces, requiring quietness.
2. In-ear headphones: These are in-ear headphones, usually compact and sporty in design. In-ear headphones usually have a microphone attached to the connecting wire. The characteristics of this type of headphone are fashionable and compact, but difficult to use for a long time, because it causes discomfort and ear pain.

5. Choose a PC headset with a wireless or wired mic?

Wireless PC headsets with mics come in a variety of designs, depending on the buyer's preferences. To choose the best wireless PC headset with mic, you should consider the product's fit, with in-ear, over-ear, or wired designs.

Wireless headphones (bluetooth) are the current trend of young people, the microphone will be attached to the ear, with a compact design, long battery life gradually replacing traditional headphones with mic for PC.

Wired PC headsets with mics are still chosen by gamers or people who need to study/work online, due to better signal reception/transmission when the mic is plugged into the PC's connection ports (3.5 jack or USB).

6. Sound quality of PC headset with mic

This is a very important criterion for choosing a headset with a mic for your PC. You need to carefully consider the sound quality, including the input signal (headphones) in terms of volume, bass, tone,. to the received signal: clear, no jerking, lag, good signal, fast response.

At this point, you must have made a suitable choice for yourself with the products of headphones with mic for PC, you can refer to the models of headphones with mic for PC at [TipsMake](#) here. Wish you success!
