

# 6 facts about women that they themselves must be surprised

Women are full of mysteries and the facts about them can surprise you. Find out about interesting statistics about women in the world below.

Are women and men the same? Of course it is because we are all human beings, but that's all, there are all personalities, love, life . It's completely different. Most of the women are full of mysteries that make the men have a headache to think about them, and the facts about women also make them surprised. Find out about interesting statistics about women in the world below.

## 1. Women say about 20,000 words a day, 13,000 more than men

This is one thing for sure, women often talk a lot, and if they meet someone who suits them, the conversation can take place all day without pause. On average, women speak about 20,000 words a day. Meanwhile, men only say 7000 words / day. There have been many surveys, and it has been shown that women speak more than men because some of the special proteins in women are higher than men. In particular, the *Foxp2* protein, or "language protein," is the reason why women tend to talk and chat more than men.

Not only that the research also shows, women say a lot when they are young, girls often have a preference to talk with their friends than boyfriends and speak much faster than male friends of the same age.

In particular, girls' vocabulary and usage of sentences are also richer and more flexible than their boyfriends.

## **2. Women spend nearly a year in their lives just to answer the question: What do you wear today?**

Most women usually spend an average of 15 minutes every morning to choose an outfit that suits their shoes and accessories.

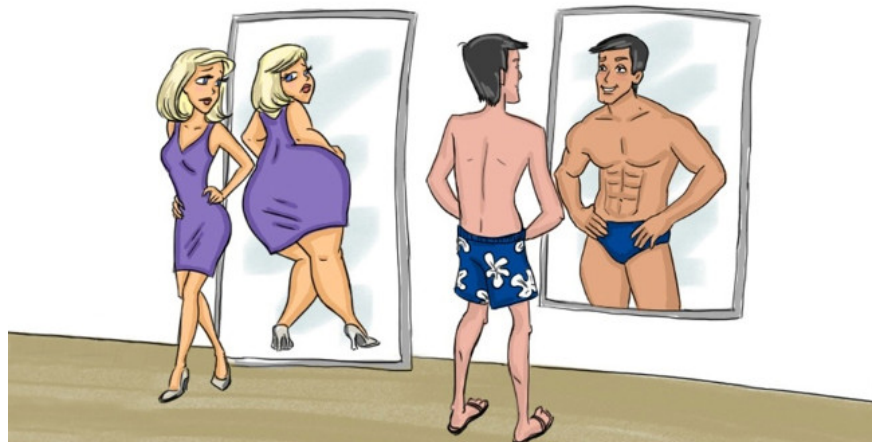

Not only will the time increase if you have an important date with your lover, they often spend a lot of time preparing clothes, shoes and accessories.

## **3. Women are often the most unstable when they say "I'm fine"**

Most women are very good at hiding their true feelings, when they are not good they often say "I'm fine" so that no one can see their weakness, and don't want to rely on anyone, this makes a lot of guys have a headache, do not know what she means? So, in any situation, boys should be hard-pressed to close their eyes and decipher what girls really think! 90% is not okay with her or at least making her bothered with you.

#### **4. Only 2% of women are confident with their outlines**

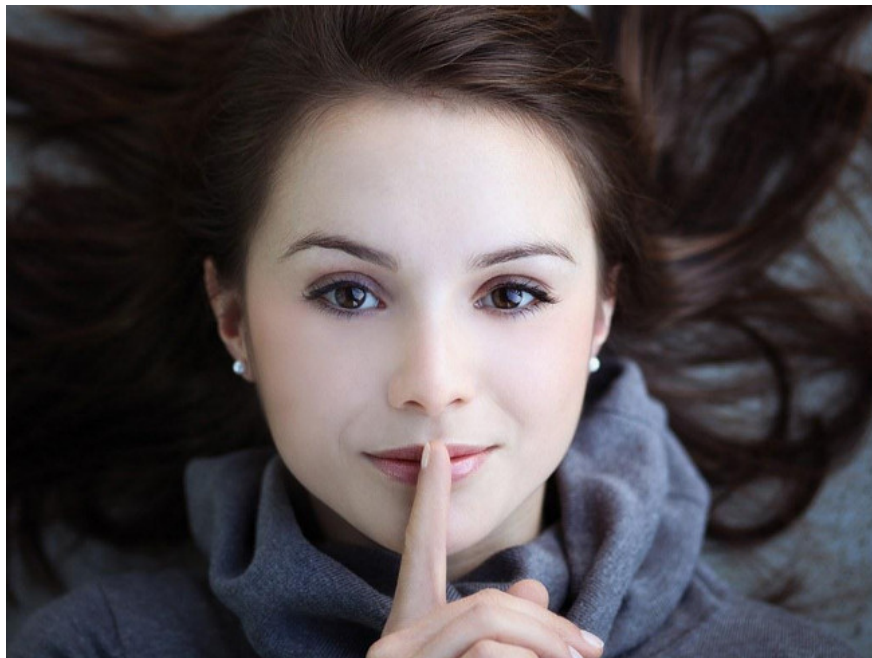

Unlike men, although women own the standard body, but mirror women still think that they are fat. On the contrary, men always think about being six-pack.

#### **5. On average in women, women eat 2-3kg of lipstick**

The lipstick is probably not separate from any woman, most women own at least 2 lipsticks in their pockets. It seems that lipstick gives women a fascinating and fascinating beauty, so no matter where you go, do women never forget to brush lipstick.

## **6. Women can only keep secret for between 15 minutes and 47 hours**

A study examining more than 3,000 women between the ages of 18 and 65 shows that up to 4 in 10 women cannot keep a secret.

More than half of them admitted that it would be easier for them to reveal their secrets if they overcame and those who often revealed their first secret were lovers, husbands, close friends or parents.

On average, a woman hears about three rumors a week and they will quickly reveal to at least one person. Three out of 10 women reveal secrets due to coercion.

Two-thirds of them feel regretful after revealing and three-quarters of 3,000 people are sure they are the ones who can keep any secrets for life. The survey also found that the average amount of time a woman can keep a secret is from 15 minutes to 47 hours.
