

6 simple ways to backup phone numbers in Android phone contacts

Contacts are one of the most important data on your phone and what happens if you accidentally lose all your contacts or lose your phone. Meanwhile, the entire contact phone number in your contacts will not fly but fly. Therefore, in order to avoid possible bad situations, it is best to back up your phone contacts on accounts or other secure storage devices such as memory cards and computers.

Contacts are one of the most important data on your phone and what happens if you accidentally lose all your contacts or lose your phone. At that time, the entire contact phone number in your phonebook will also "fly without flying". Therefore, in order to avoid possible bad situations, it is best to back up your phone contacts on accounts or other secure storage devices such as memory cards and computers.

In the article below, Network Administrator will guide you 6 simple ways to backup contacts on your Android phone.

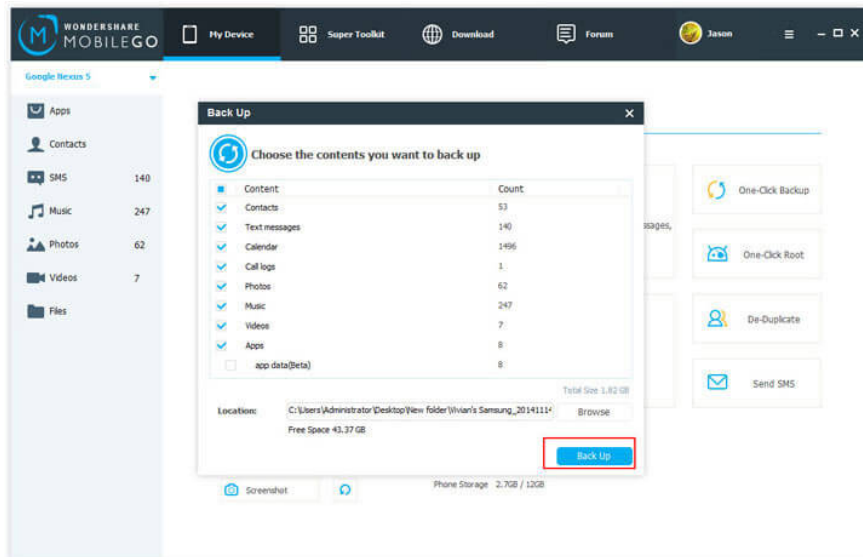

How to backup phone numbers in Android phone contacts

1. Back up your Android contacts using the Android MobileGo contacts backup application
 1. Before performing a backup of Android contacts:
 2. Steps to take:
2. Back up contacts to Gmail
3. Back up contacts on your Android phone with a USB cable
4. Use Mobile Trans to backup your contacts with just one click
5. Back up contacts with Google Contacts app
6. Back up contacts with Samsung's Contacts app

1. Back up your Android contacts using the Android MobileGo contacts backup application

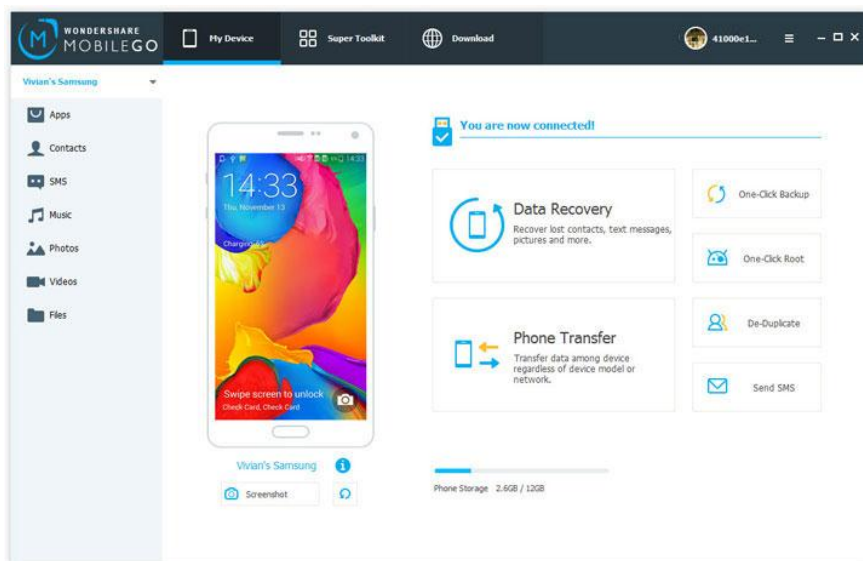

Before performing a backup of Android contacts:

1. Prepare: your Android phone, a USB connector cable, a Windows / Mac computer / laptop, the Wondershare MobileGo app for Android.
2. Back up your contacts to accounts: Back up any contacts and phone numbers to supported accounts on your Android device. Log in to accounts on your Android phone, now on the Windows screen will display your contacts list (note: only on Windows).

Steps to take:

Step 1: Set up your Android phone

To begin the process, first download and install the contacts management application for Android devices - Wondershare MobileGo for Android to your computer.

1. Download Wondershare MobileGo for Android to your Windows computer and install it here.
2. Download Wondershare MobileGo for Android to your Mac computer and install it here.

After the installation has finished, run the application. Use a USB cable to connect your Android phone to a computer or connect via Wifi.

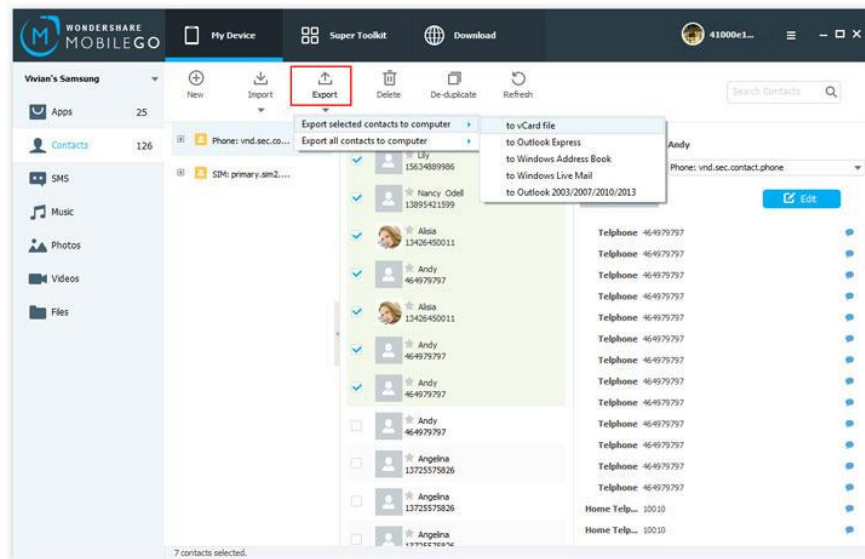

Wondershare MobileGo for Android will automatically detect your device and display it on Windows windows. Here you click the **Contact** tab in the left pane to access the contacts management window.

Note:

If you connect your Android phone to the computer via Wifi, you must download and install the apk file MobileGo application.

1. Download MobileGo apk file for Windows here .
2. Download MobileGo apk file for Mac here .

Step 2: Backup Android contacts

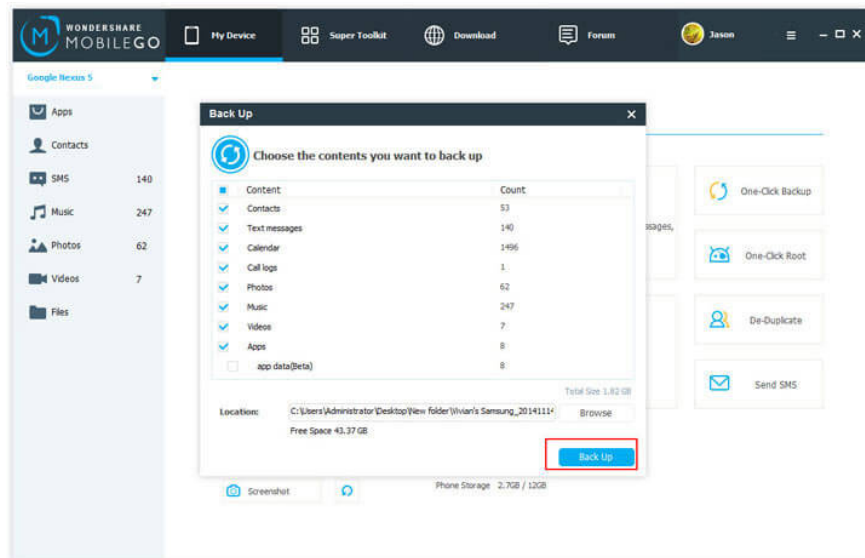

On the contacts management window, select the phone numbers you want to backup, then click the **Import / Export** button to open the Dropdown Menu.

From this Dropdown Menu, click **Export selected contacts to computer** or **Export all contacts to computer**.

Now a new menu appears, where you can choose to back up contacts to Outlook Express, Outlook 2003/2007/2010/2013, vCard files, Windows Address Book, and Windows Live Mail.

Step 3:

On the main window, click **One-Click Backup** . Now the Backup screen appears, allowing you to back up all contacts, calendar (messages), messages, call logs, applications, music, playlist information, videos and photos.

To back up contacts on your Android phone, simply uncheck other items, then click **Back up** .

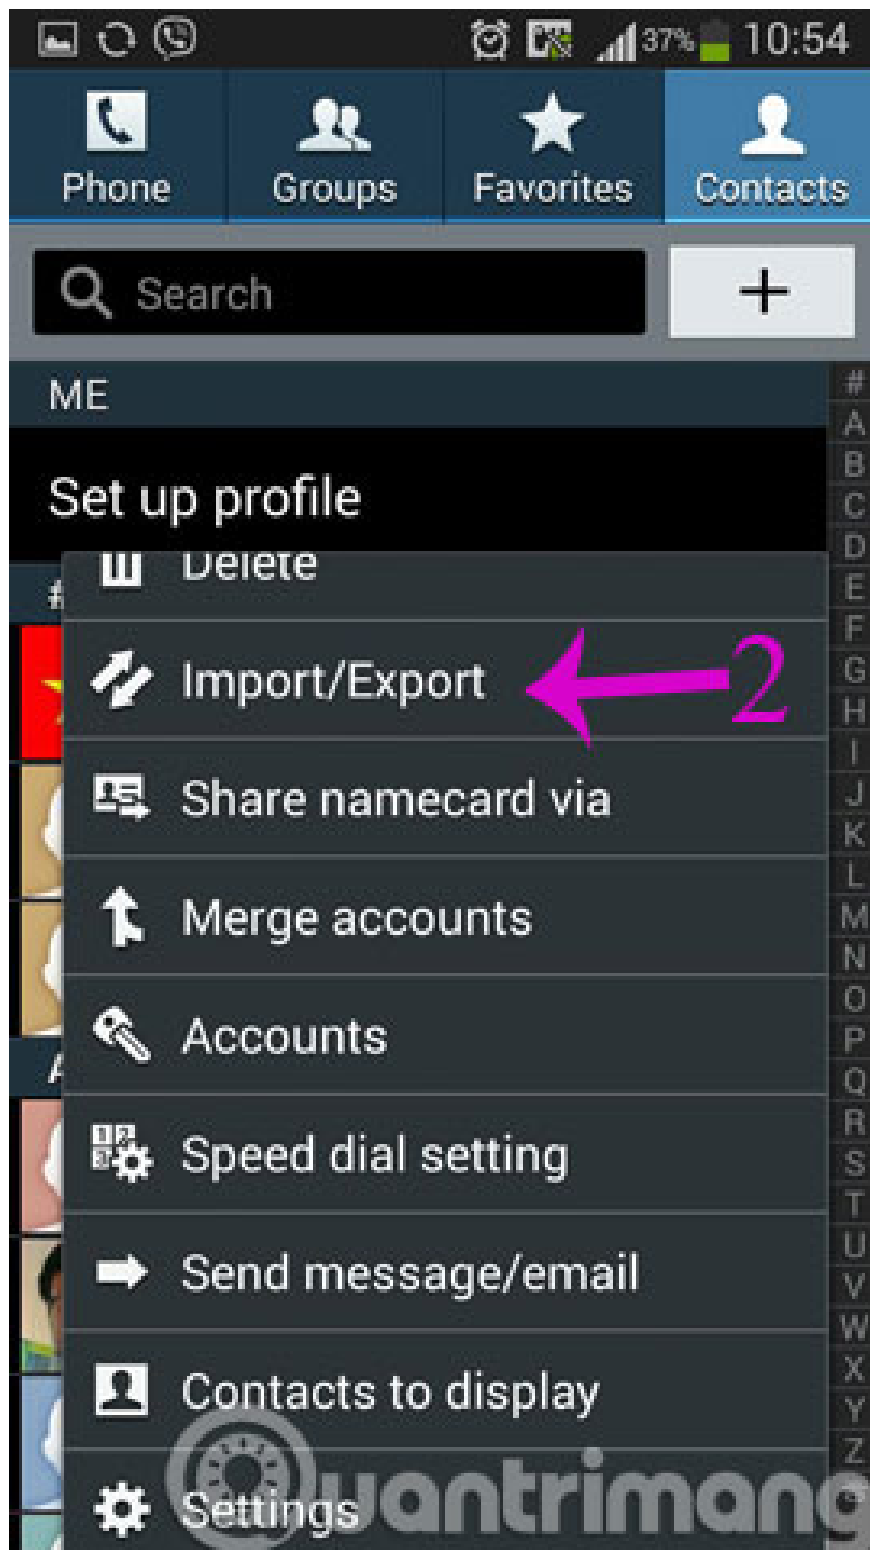

In addition, you can refer to detailed steps to backup Android contacts using the MobileGo Android contacts backup application in the video below:

2. Back up contacts to Gmail

Step 1 :

From the phone's main screen, tap **Contacts** . Next, click on the **Custom** button (*each will be placed in a different location, as in this article is the button to the left of the Home button*) and then select **Import / Export**.

Step 2 :

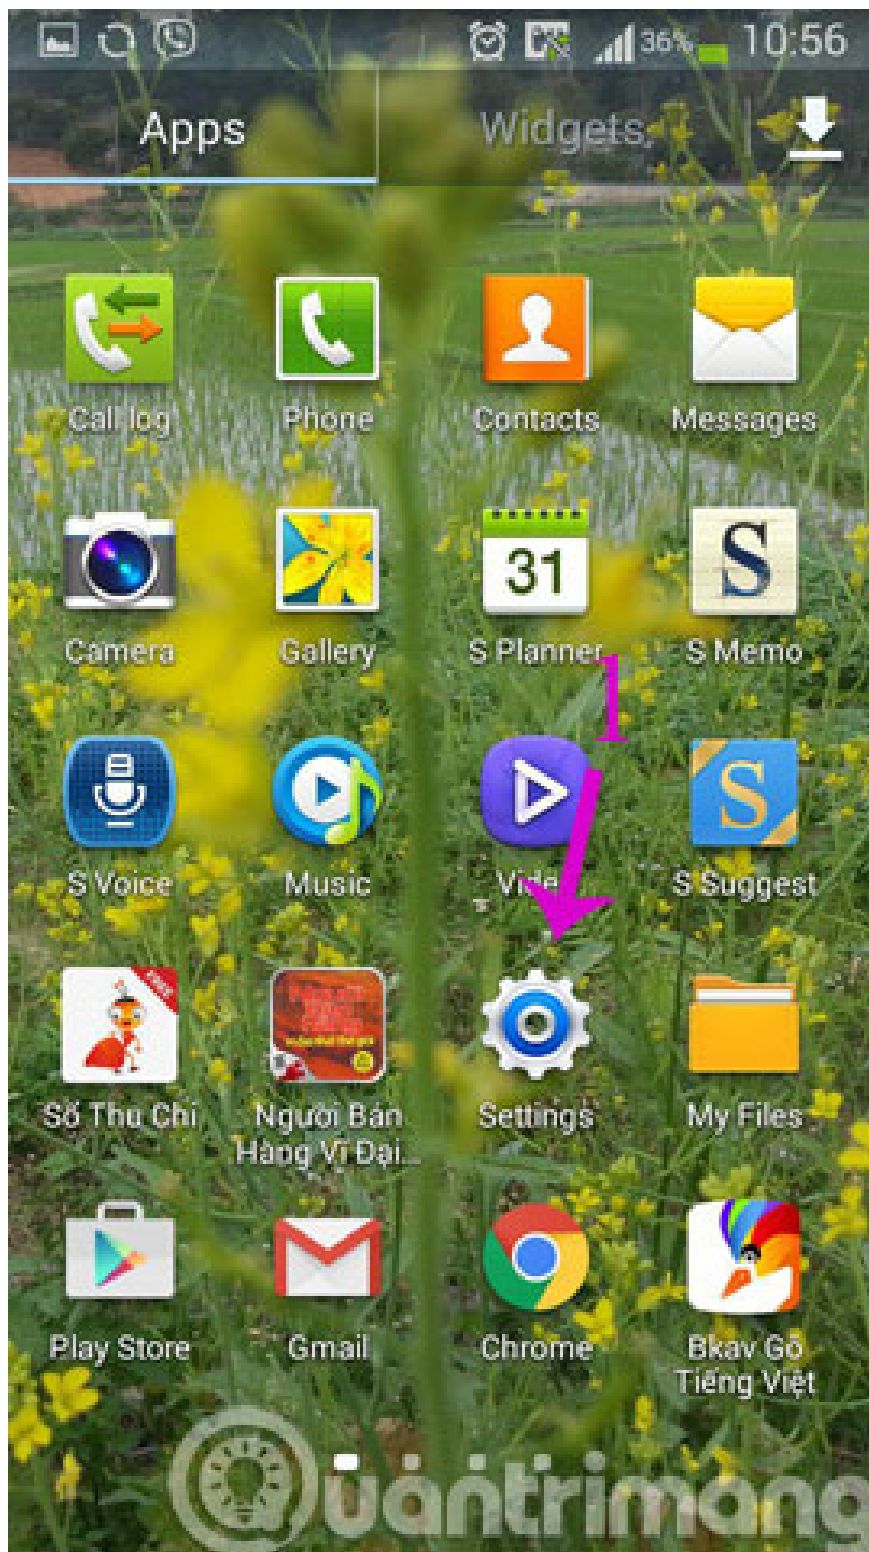

On the new window that appears, click **Export to USB Storage** to copy contacts to the memory card.

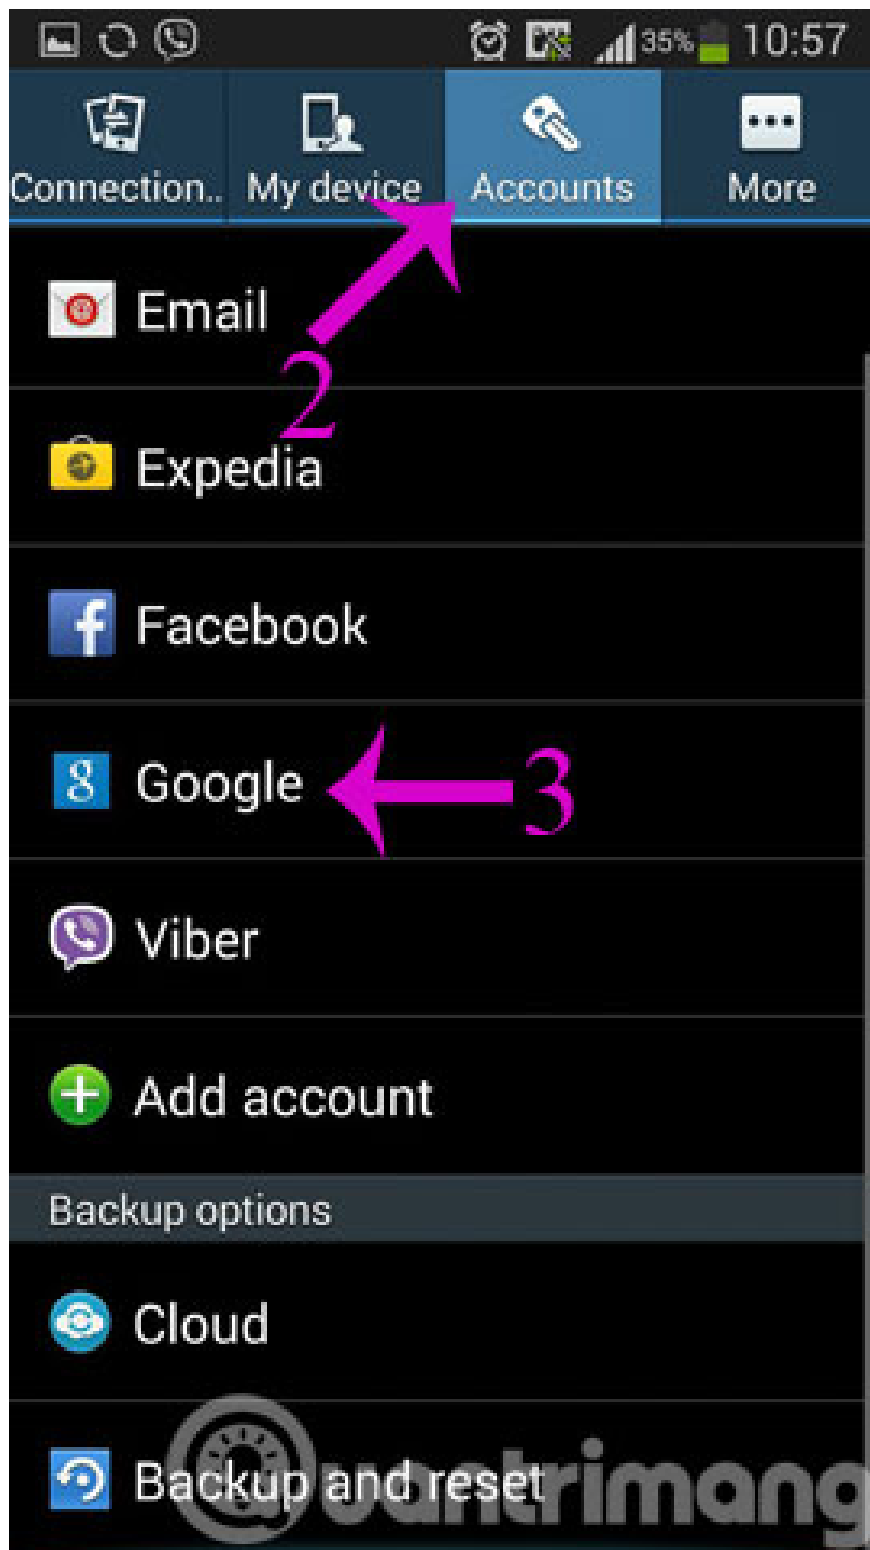

In addition, if you regularly connect to the Internet via Wifi or 3G, you can implement the plan to synchronize your contacts to your email box according to the steps below.

Step 1 :

From the main screen, click **Settings** then select **Accounts** and click on **Google** account

Step 2 :

Next select a Gmail account (if there are many) and then click **Sync Contacts** to proceed with syncing contacts

<  Google

Accounts

 
Sync turned off

 
Sync turned off

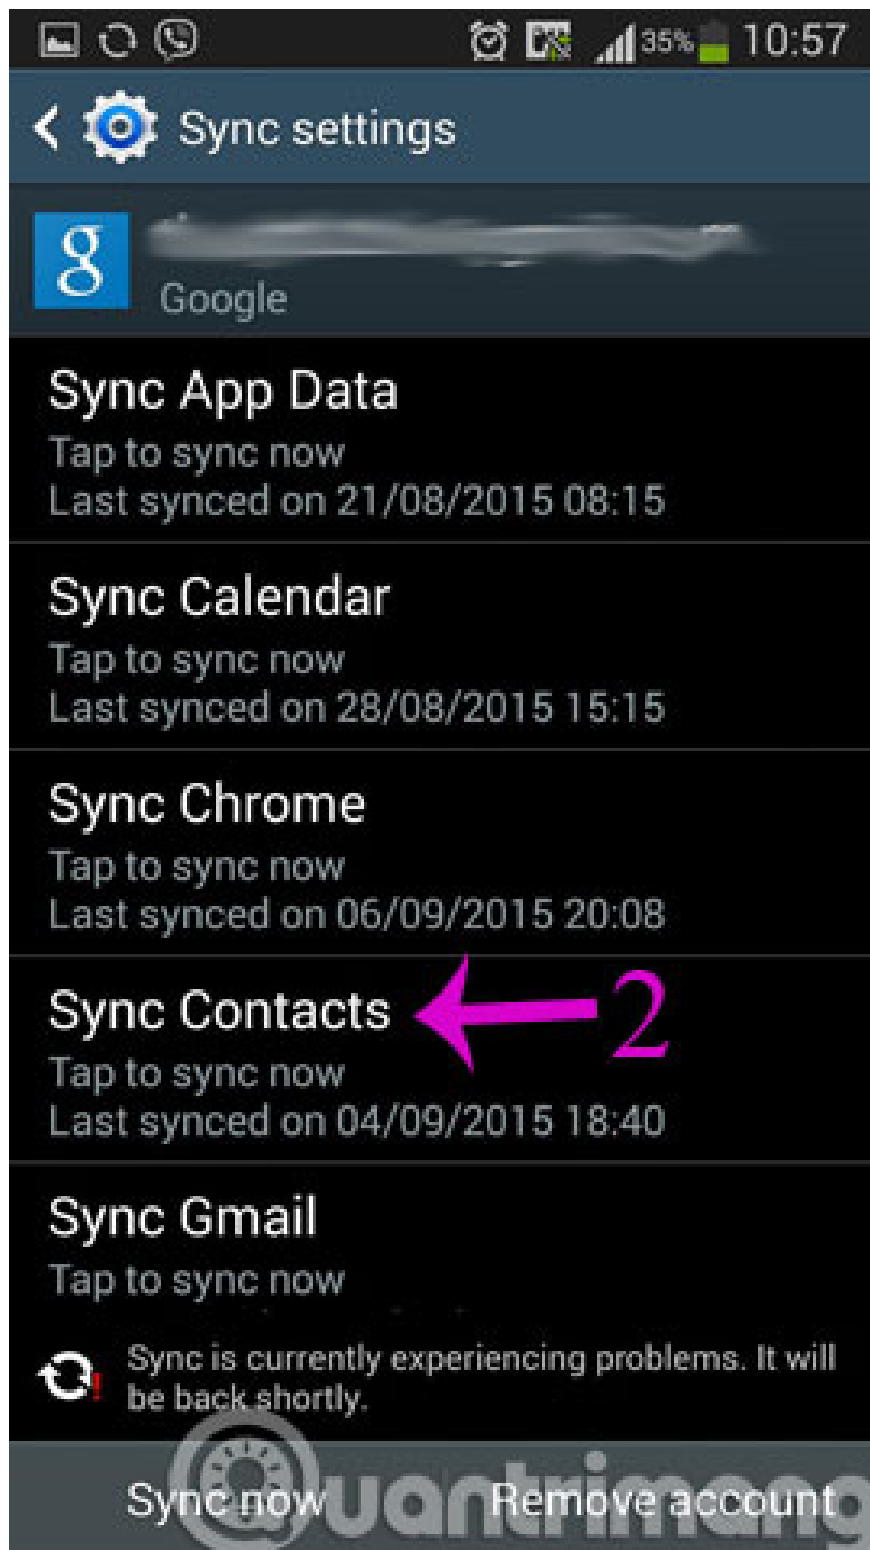

Privacy

Search

Location settings

Ads

Now, when having trouble or switching to a new Android phone, you just need to enter this email address, the entire contacts will be synchronized to.

3. Back up contacts on your Android phone with a USB cable

Step 1:

On your Android phone, click the Contacts application. Then click on the button in the left pane of your Android phone to open the Menu. Here, click **Import / Export**.

Step 2:

Next, click **Export to USB storage** or similar options.

Step 3:

This is similar to how you back up your Android contacts to an SD card memory card. Your contacts will be saved in the vCard file.

Use a USB cable to connect your Android phone to your computer.

Step 4:

Finally find the vCard file on your Android phone, copy and save it on your computer.

4. Use Mobile Trans to backup your contacts with just one click

Backing up contacts is also important, especially if you change your phone or if you lose your phone, you still have your phone number of friends and relatives saved.

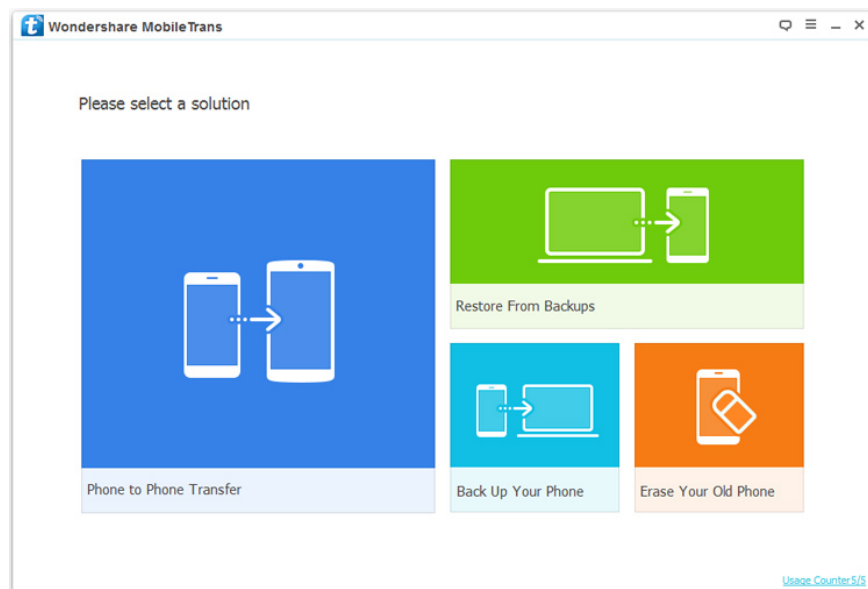

And MobileTrans will help you make the perfect backup of contacts on your Android phone. With MobileTrans you can backup all data or simply backup contacts on your phone with just one click.

Not only that, with MobileTrans you can also backup contacts on social networks like Facebook, Twitter, . and both Outlook, Gmail or Microsoft.

1. Download MobileTrans to Windows computer and install it here.
2. Download MobileTrans to your Mac computer and install it here.

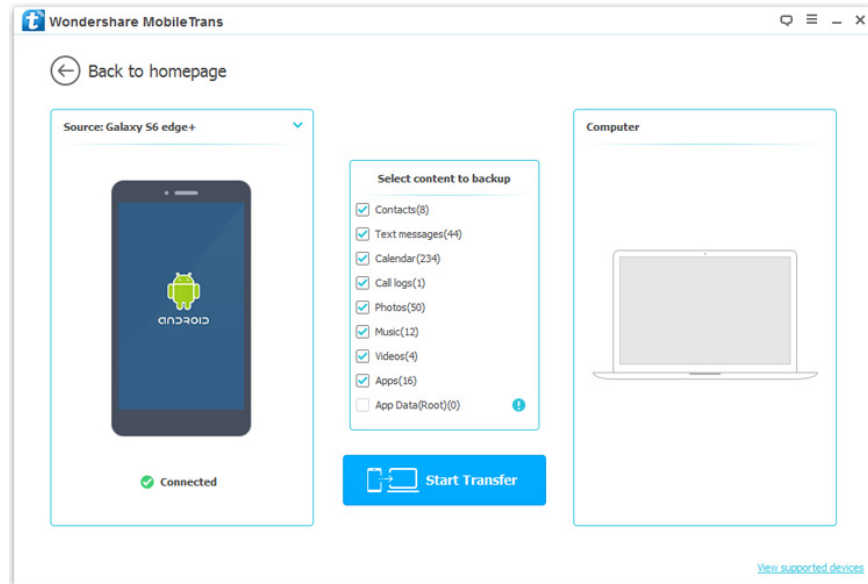

Step 1:

Connect your Android phone.

Step 2:

Click on **One-click to Backup** to back up contacts on your Android phone.

5. Back up contacts with Google Contacts app

If you are using the Google Contacts app (or can download it for free in Play Store), you can easily backup your contacts with this application.

To make a backup, open the app, swipe from the left to open the menu, tap the **Settings** option and then touch the **Export** option (you may have to scroll down to see this option).
