

6 tips to play Team Deathmatch PUBG Mobile

Some tips to help you get lightning fast kill in Team Deathmatch PUBG Mobile mode

PUBG Mobile version 0.13.0, the game has updated gamers a new game mode is also quite familiar to many people. As Team Deathmatch, this is a game mode that is no stranger than most current online FPS games.

Team Deathmatch will divide the player into two teams, each of 4 teams and each team's task is to reach 40 kills and the team that reaches 40 points first will win. Unlike other PUBG Mobile survival modes, when the player dies, the player will be revived in its original state and will be resurrected at a certain location and cannot be resurrected at any other point. on the map.

If anyone has ever played Team Deathmatch in other FPS titles, it will more or less have the experience to confront an enemy in Team Deathmatch in PUBG Mobile. If you haven't gone through this mode, you can check out some tips below to quickly get enough kill in Team Deathmatch PUBG Mobile.

1. How to mark the map position in PUBG Mobile
2. Instructions to reduce lag, reduce high ping when playing online games
3. PUBG Mobile player configuration on latest phones and computers

Some tips for playing Team Deathmatch PUBG Mobile

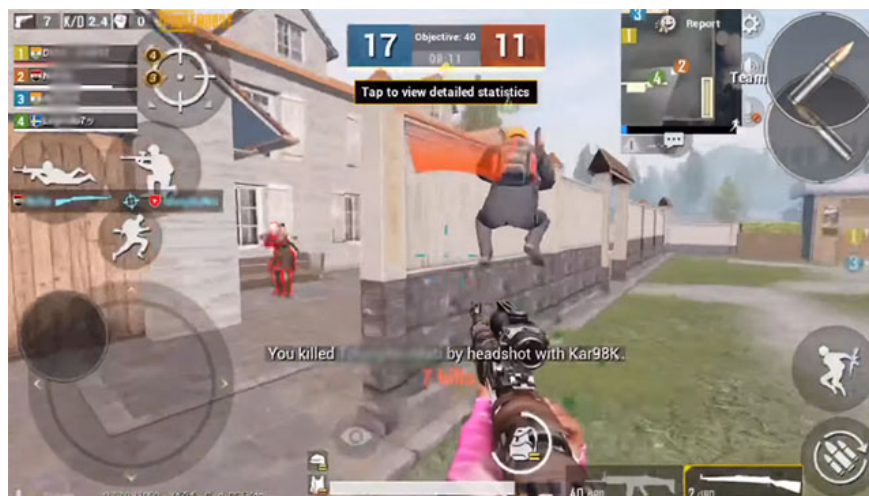

Take advantage of waiting time

Before the game, you will have a short waiting time to get used to the game (about 20 seconds). Take advantage of this time to loot the items you want, put it in a corner before the timeout. It's best to be near the revival point but don't let your teammates know.

Then when you enter the battle, go back to the area where you just threw the items you threw at the waiting time and loot to start the battle faster.

"Watch me" enemy

Specifically here is to attack the enemy to resurrect is to attack, if anyone ever played Team Deathmatch mode in Raid, there must have been a few enemies who were hiding at the revival point of the enemy team and just waiting to see Anyone who has completed the three seconds of immortality is able to kill as easily.

So is PUBG Mobile, just another thing is the immortal time in Team Deathmatch PUBG Mobile will be 5 seconds. At the end of the 5 seconds, the player who gets hit will lose blood as usual.

So when you are revived, the advice to you is to observe if any enemies are available to eat the network. Or see if any enemy is standing outside waiting, take advantage of 5 seconds of spite and rush out and beat for a battle.

How to choose weapons

Due to the narrow area, in Team Deathmatch map you should not use Sniper Rifle to confront the enemy. But you should aim for weapons with a high rate of fire, big damage like AR, SMG.

Because if you stay near the enemy's resurrection area, the firing rate will be very fast and continuous because of the very short time from death to resurrection. You also need to have quick replacement parts to be able to reload as soon as you destroy the enemy.

Try loot M249 as fast as possible

There are many people who do not know that there are M249 in Team Deathmatch PUBG Mobile mode until they get bullets from this gun. The M249 is not available at the table at the resurrection point, it will be in the house in the middle of the map and emit a yellow light.

So quickly go in and loot M249, once you've got this gun in your hand, you'll kill it easily. You can use the first waiting period above to loot M249, then throw it out when the timeout expires. So you will be holding M249 right from the start of the battle.

Use a shock absorber accessory

Due to the priority of SMG and AR, the map area is not large, so it will often have to be fired, not tap or burst. So the shock absorber accessories must be prioritized to reduce the recoil of the gun, to increase the accuracy of the discharge.

Go together

Although this is not a survival mode but going together will be beneficial, at least 2 people. Because there will be times when your teammates confront an enemy but do not kill him but only injure him.

At this time, destroying the wounded enemy will not be too difficult, this tactic is often seen in the Counter Strike series, typically CS GO.

Here are some Team Deathmatch mode tips, for those who already have experience with this mode, ambush tips will be quite fulfilling. As for the M249 password, you can try to loot the standby time as much as possible.
