1. 11 useful tips to "learn" from restaurant chefs
2. How to preserve beef, after 30 days, still soft like new
3. 12 food quality testing tips to avoid poisoning

Sugar is a very familiar spice for any family, this spice is often used to make drinks or prepare daily dishes. Not only is it a spice, but white sugar also has great use in caring for houses and gardens.

If you are not aware of these uses, please refer to our article below.

1. Deodorize coffee grinder, blender

After grinding meat or long use process, the blender, coffee grinder will smell very uncomfortable. Although many people have used specialized cleaning products, they can also fly away. In order to help housewives to ease their efforts to clean these devices, there is a very simple way: before you wash your coffee grinder or blender, just pour in the sugar and give it. Grind a few minutes. Sugar will absorb unpleasant odors.

2. Clean stains on hands

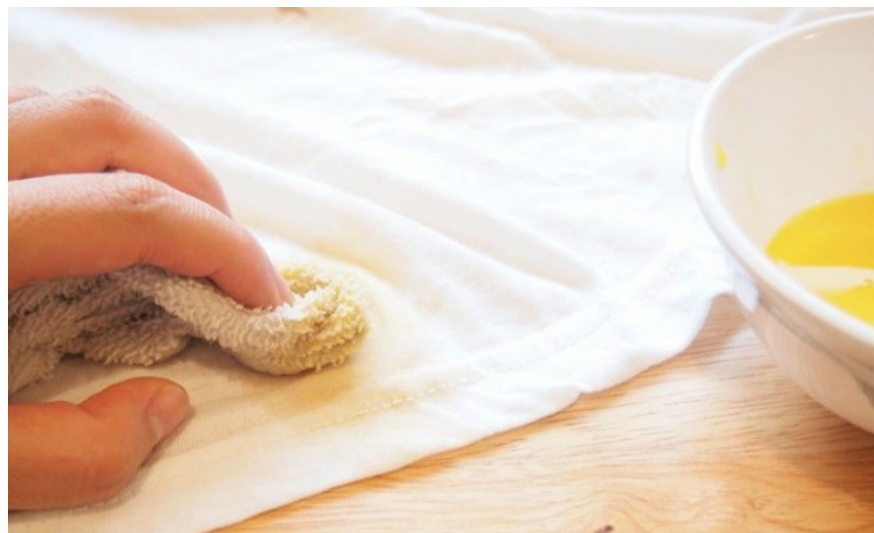

Have you ever been in a situation where your hands were covered with oil and grease and washed and washed many times and your hands were still not clean? To eliminate this unpleasant feeling, add a little sugar to the hand washing soap, rub well and rub your fingers. You will be surprised by the results.

3. Keep flowers fresh for long

Vinegar, aspirin . are the familiar spices to help the flower stay fresh. Besides the spices, sugar, white vinegar and warm water are also a very simple way to keep the freshness of flowers. Sugar provides essential nutrients for flowers, while vinegar restricts bacteria to grow and grow in the bottle.

4. Remove stains, dirt on clothes

With dirty clothes, especially white clothes, there is a very simple way to remove stains on it. Use half a cup of sugar, add water to the paste, then spread the mixture over the soil. After 30 minutes, take the laundry to normal, then the clothes will be "white as new".

5. Kill insects

There is an extremely simple way to destroy the hateful insects that live on the trunk of the tree, which is to take a moderate amount of sugar, and immediately put it in the soil to get rid of the insects in the tree. Or you can make traps to catch insects by mixing honey, sugar, water to boil, pour on the sticky side of the sticky paper and hang it on the wall, soon flies fly in and get caught immediately.

6. Bee trap

Bees often like sweet things, so you want to trap obnoxious bees to harm your garden, then you can prepare the following mixture: 1/2 cup of sugar with 2 cups of water and put in a saucepan Boil with a little black pepper. After the mixture has cooled down, pour it into a jar, open the lid. Bees will find traps in the road and get stuck in this solution.
