

6 Ways to Turn Off Win 10 Update Permanently Fastest 2024

If the automatic update mode of Win 10 makes you feel uncomfortable. Let's refer to the article about 6 ways to permanently turn off Win 10 updates below with Hoang Ha PC!

1. Disable Win 10 Update Using Services.msc

If you are too tired of waiting for updates before turning off your computer, disabling **services.msc** is one of the fastest and easiest **ways to disable Win 10 updates** permanently. But note that when you practice this method, the command to request automatic updates will no longer appear even if you restart your computer, you need to do the opposite if you want to update Win. Follow the steps below to disable this mode.

Step 1: Press the Windows + R key combination to activate the **Run** program . Then, enter **services.msc** in the **Open** field and click **OK** .

3. Block Windows 10 Updates With Microsoft

Instead of trying different ways, try the fix provided by the manufacturer, which is both effective and easiest to solve. After some reactions from users, Microsoft has also shown a way to permanently disable Win 10 updates that you should follow.

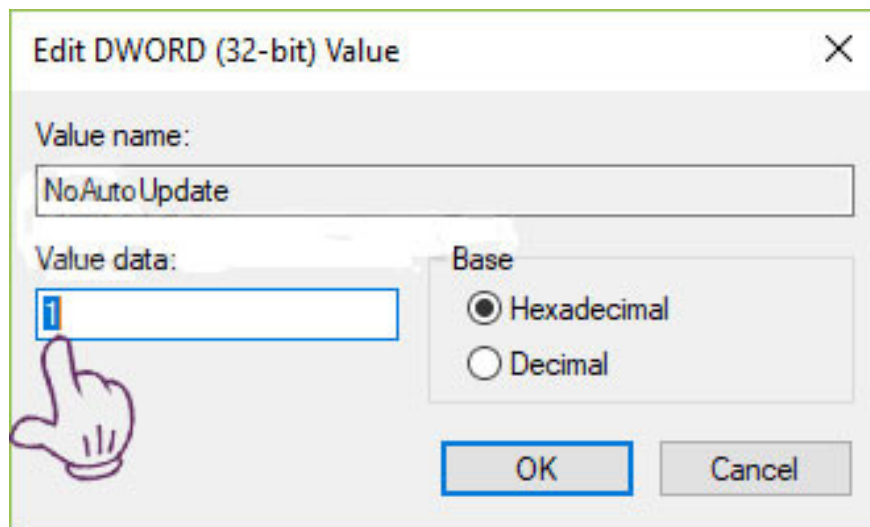

Step 1: Press the **Windows + R** key combination and enter the keyword **Regedit** in the **Open** box . And press **OK** .

Step 2: Type the following syntax into the search bar after the **Registry Editor** window opens

HKEY_LOCAL_MACHINE > Software > Policies > Microsoft > Windows > WindowsUpdate > AU

Step 3: After the **AU** folder appears, double-click to select **NoAutoUpdate** . When the **Setting** menu appears, click **1** in the **Value data** box and click **OK** .

4. Turn Off Win 10 Update Permanently By Setting Up WiFi Connection

Turning off Win 10 updates permanently by resetting Wifi mode is a way to delay the update process of this operating system until you want to update Win again. However, this method can only be done for computers connected to Wifi, while wired computers are not supported.

Step 1: Click on **Start Menu** and select the **Settings** icon as shown in the picture.

5. Use Software to Turn Off Windows 10 Update - Show Or Hide Updates

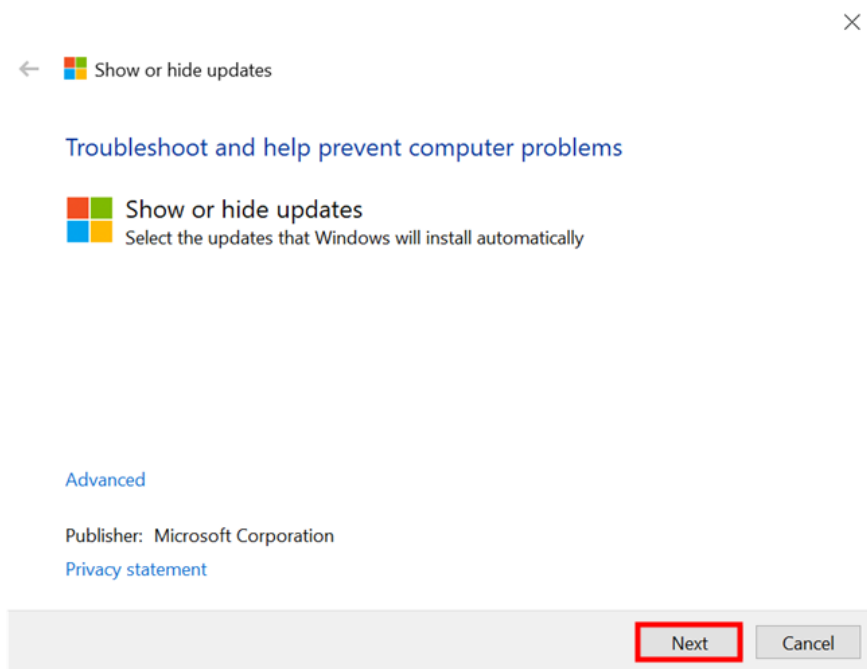

Besides the usual ways to fix errors or update Win 10 by changing the settings on the computer, there are still specialized software for this task. Typically, the software **Show or hide updates** is used to permanently disable Win 10 updates. First, download the software to your computer and follow the steps to unzip it. Then follow the

steps below:

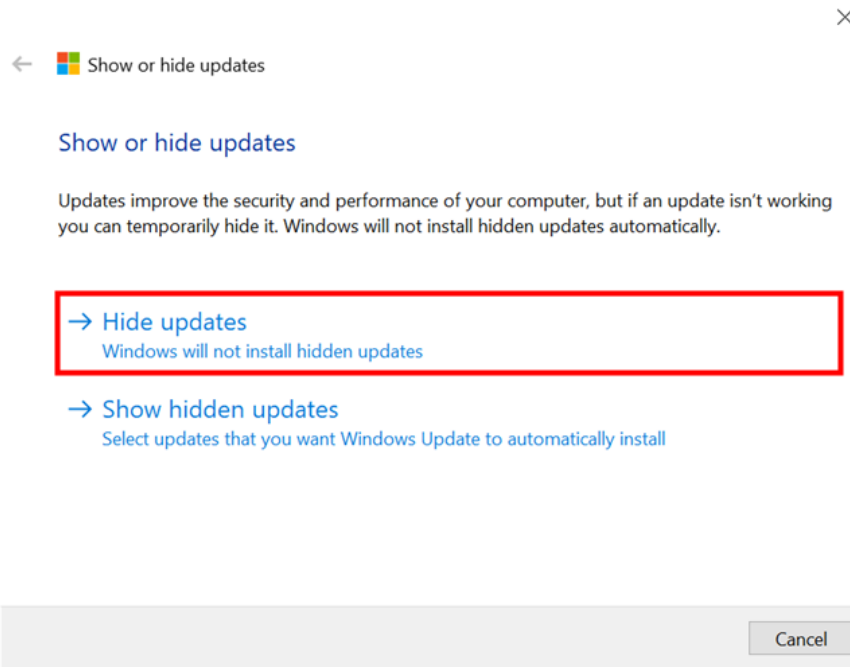

Step 1: Click here to download the Show or Hide Updates Utility.

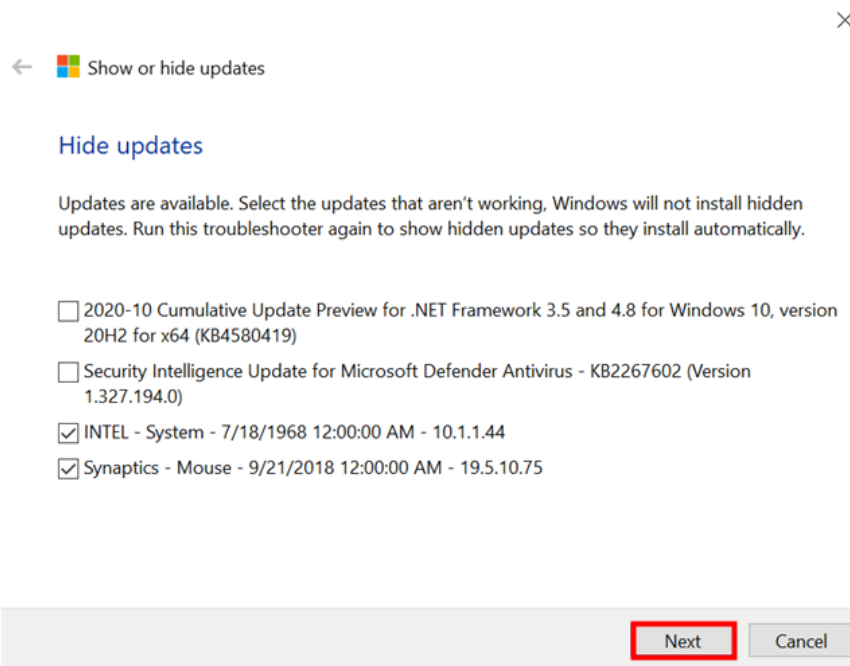

Step 2: Run the utility. Click **Next** to have the tool search for available Windows updates as well as driver updates.

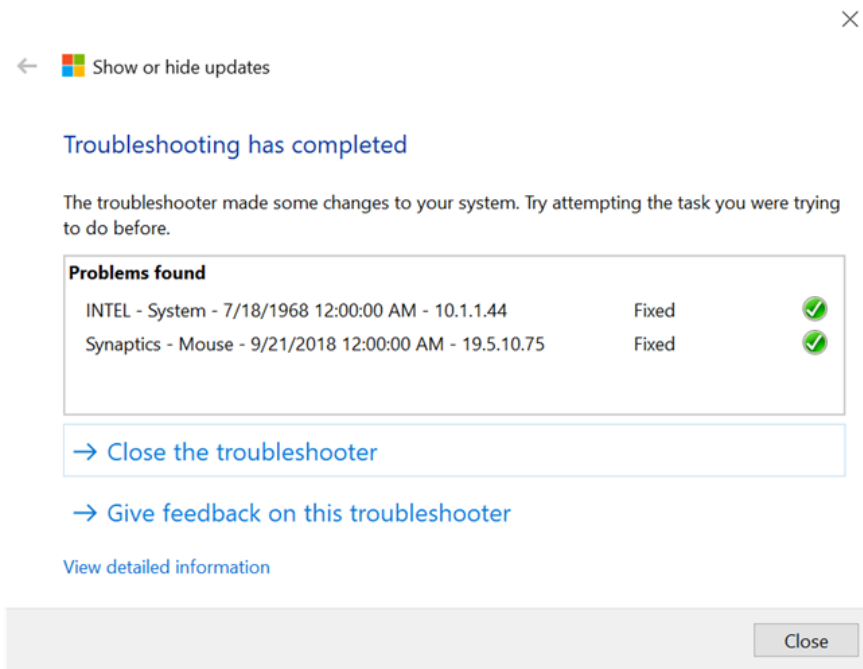

Step 3: When you see the following screen, click **Hide Update** to hide updates to see all available driver and Windows updates.

Step 4: You can now see a list of all the updates that can be blocked. Click or tap to select any updates you want to hide to select them. This will prevent Windows 10 from automatically installing them. When you are done, click **Next**.

Step 5: The 'Show or hide updates' tool will take a moment to mark the selected updates as hidden, so they won't be installed on your Windows 10 device. Once done, the troubleshooter will list the blocked updates, letting you know they've been Fixed, as shown below.

6. Turn off Win 10 Update by Configuring System Settings

You can also take advantage of adjusting the settings in the Windows 10 system to disable the update feature on Windows. Accordingly, this method only applies to computer devices using the latest version of Windows, that is, Windows 10 and above.

Although this method cannot completely disable the automatic update feature on Windows 10, you can still decide whether to upgrade or not through the displayed notifications. This will help you minimize the risk of data loss when the operating system suddenly updates without prior notice.

This method is very simple and easy to do, even for readers who are not knowledgeable or first-time computer users. The sequence of steps is as follows:

Step 1: In the search section on the taskbar , enter the text ' **Update** ', the system will display suggestions for you to choose from, find the **Check for updates** section and click on it.
