

# 7 Android gestures you may not know yet

Gestures make smartphone use faster and more efficient, but not everyone knows these gestures. This article will introduce seven Android gestures you may not know yet.

Gestures make smartphone use faster and more efficient, but not everyone knows these gestures. This article will introduce seven Android gestures you may not know yet.

## 1. Delete the icon and widget quickly from the main screen

The main screen doesn't have many icons and widgets that look clean and neat. If you want to clean up the main screen, you can use the following tip. Instead of clicking the icon or widget and dragging it to the top of the screen (where the X mark is located), simply press and hold the icon, then quickly drag it to the top of the screen to delete it.

1. 4 ways to uninstall apps for Android devices

## **2. Access the Quick Settings menu faster**

Android's Quick Settings menu is considered the easiest way to simplify the operation of opening Wi-Fi, Bluetooth, disable automatic rotation and use a variety of other tools. However, you need to do some operations to display the entire Quick Settings.
