

7 best cheap Bluetooth speakers

Bluetooth speakers are very diverse in price. You can just spend less than \$ 50 (about VND 1,200,000) and still have a great Bluetooth speaker.

Bluetooth speakers are very diverse in price. Some speakers cost only a few dollars, while others can cost hundreds of dollars. But you don't need to spend too much money just to enjoy high quality audio. You can just spend less than \$ 50 (about VND 1,200,000) and still have a great Bluetooth speaker.

Here are some of the best cheap Bluetooth speakers for your reference.

7 best cheap Bluetooth speakers

1. Anker Soundcore 2
2. JBL Clip 2
3. Dell AD211
4. AOMAIS Sport II
5. DOSS SoundBox
6. Creative Muvo Mini
7. OontZ Angle 3

1. Anker Soundcore 2

"High quality sound, not inferior to high-end models."

Anker Soundcore 2 is arguably the best Bluetooth speaker at a price below \$ 50.

Those who have previously owned Anker Soundcore may not be worth the money to buy this new model. But for those who have just purchased Anker Soundcore for the first time, it's really a bargain. Anker Soundcore 2's sound is better than some of the larger and more powerful speakers on the market.

The speaker measures 6.6 x 1.9 x 2.2 inches (17 x 5 x 6 cm), comes with two 6W speakers and two 1.5-inch drivers. Battery life can last up to 24 hours and supports Bluetooth 4.2 at a radius of up to 66 feet (20m).

There is also an AUX port that allows you to play music from non-Bluetooth enabled devices.

Anker Soundcore 2 has an IPX5 waterproof rating. This means that this speaker can be used around the pool or in the bathroom.

Reference price: \$ 40 (VND 934,000).

2. JBL Clip 2

'A small speaker for those who have to move.'

Although almost all the best cheap Bluetooth speakers are portable, many speakers are not suitable for use when you're on the move.

The JBL Clip 2 is different. It offers an alternative solution for those who do not want to use Bluetooth headsets while they are on the move. Everyone, from gardeners to sports people, will find it useful. The device has a versatile hook available so you can attach it to your outfit.

With its compact size (its weight is only about 184 grams), it is not surprising that the speaker does not have the same features as the other models in this list. It includes a 3W speaker and 40mm converter. Battery life lasts about 8 hours. It does not include an AUX port.

Reference price: \$ 40 (VND 934,000).

3. Dell AD211

'A feature-rich speaker for indoor use.'

Dell AD211 is not designed for outdoor use. The silver casing of this speaker looks great when placed on a desk and in the kitchen. Rubber pads at one end give you the option of placing it vertically or horizontally.

It also includes some features that are more suitable for indoor use. They include NFC compatibility for fast pairing and microphones for use in hands-free phone calls.

The Dell AD211 Bluetooth signal has a range of 33 feet (10m) and a battery life of 10 hours. Dell AD211 includes two 2.5W speakers, a full-range driver (full-range driver) and passive radiator.

Reference price: \$ 42 (VND 980,000).

4. AOMAIS Sport II

'Best cheap Bluetooth speaker for outdoor use.'

AOMAIS Sport II is durable. The cover of the whole speaker is reinforced with rubber and thick plastic. There is a watertight cover covering all ports of the speaker.

The IPX7 waterproof speaker is the only option on this list to achieve that. This means that the speaker is mud-proof, dust-proof and waterproof in a depth of up to one meter in 30 minutes.

The sound quality of AOMAIS Sport II will not disappoint you. It consists of two 10W speakers (enough to play music in a large room). However, these two speakers emit mono sound. If you want to enjoy stereo sound, you will need to pair the two devices together.

Speakers also come with a microphone and an NFC reader.

Reference price: \$ 30 (VND 700,000).

5. DOSS SoundBox

'Powerful Bluetooth speaker for desktop.'

If sound quality is more important to you, DOSS SoundBox is the best Bluetooth speaker product available at prices below \$ 50. (If you consider the design more important, choose Dell AD211).

Sound is delivered through two 6W speakers, enhanced bass and 360-degree audio technology.

In addition to Bluetooth and AUX-in connectivity, DOSS SoundBox is also one of the few speakers that provides ports for Micro SD cards. The presence of this port means that the speaker is not waterproof and therefore not suitable for outdoor use.

The speakers are 6.6 x 2.9 x 2.7 inches (17 x 7 x 7 cm) and come in three colors: White, black and blue. Its Bluetooth range is 33 feet (10m).

Reference price: \$ 30 (VND 700,000).

6. Creative Muvo Mini

"A sturdy speaker that looks great when placed in the house."

Creative Muvo Mini is a speaker that makes users feel curious. Its fancy design makes it impossible to see whether it is placed outdoors or indoors, while features are suitable for any environment.

For example, the built-in and NFC-enabled microphone makes it a perfect desktop speaker, but the 10-hour battery life and IP66 waterproof rating make it ideal for Use outdoors during the summer. Speakers also have AUX and microphone ports.

Bass is acceptable but not perfect. That is the biggest weakness of this speaker.

Creative Muvo Mini weighs 285 grams and has a size of 7.4 x 1.4 x 1.7 inches (19 x 3.5 x 4.5 cm). It is available in black, blue, red and white.

Reference price: \$ 46 (VND 1,074,000)

7. OontZ Angle 3

'Speakers suitable for all weather conditions, have excellent range and battery life'.

OontZ Angle 3 is perfect for people who want to use speakers for a long time in large spaces (for example, during camping trips).

The battery life is extremely impressive (lasting for 20 hours), while the 100 feet Bluetooth range (nearly 31m) is also the largest of the 7 models mentioned in this list.

With an IPX6 rating, the loudspeaker is resistant to spray and anti-wave water splashes, but it will fail if completely submerged in water. (It can be conceived like it can be used in a shower but cannot be used in a bath). Two 7W physical speakers are capable of handling stereo output.

The speaker has an AUX and built-in microphone.

Reference price: \$ 40 (VND 934,000).

When you are looking for the best low-cost Bluetooth speakers, the key to long-term satisfaction is to buy equipment that meets your specific needs. Don't buy a solid, high quality speaker, if only to put it next to your computer all day.

Wish you can choose the right product!
