

## 7 best RGB mouse pads

RGB has always had a big appeal to gamers. You can equip it for RAM, fan and GPU, so why not mouse pad? Here are the best RGB mouse pads to elevate your gaming experience today.

Without a mouse pad, the mouse runs the risk of encountering foreign objects on the table surface that disrupt its functions. Surely you don't like accidentally clicking on something or not being able to precisely target enemies in a video game, do you?

RGB has always had a big appeal to gamers. You can equip it for RAM, fan and GPU, so why not mouse pad? Here are the best RGB mouse pads to elevate your gaming experience today.

### Corsair MM700 RGB Extended Cloth Gaming Mouse Pad

The Corsair MM700 provides ample space for your mouse, while ensuring enough room for a full-size keyboard. To keep things steady and smooth, this mouse pad also features a thick, non-slip rubber base.

Corsair MM700 RGB offers great style and utility. At the top right is a button that lets you toggle through multiple RGB color profiles, along with the option to create your own using Corsair's iCue software (available for Windows and Mac). However, the button also serves as a USB hub, so if you have a wired mouse or headset, you have two USB ports conveniently located right there.

#### Advantage

1. Big enough for a full-size keyboard and mouse
2. There are two with the Passthrough feature

3. Mouse glides great on the surface

Defect

1. Only three RGB zones

## ASUS ROG Balteus Qi

ASUS ROG Balteus Qi removes fabric for a stiffer, textured surface that significantly reduces friction. It also has a conveniently placed Qi charging area!

ASUS ROG Balteus Qi comes with 15 RGB zones. Through ASUS Armory II software, you can maximize color according to 1 of 9 preset options or manually adjust color and brightness to your liking. RGB won't be a problem even in well-lit rooms.

Advantage

1. Qi Charger 10W
2. Hard surface, less friction
3. USB passthrough

Defect

1. Few options for Qi-compatible mice

## KTRIO RGB Large Gaming Mousepad

KTRIO RGB Large Gaming Mousepad is what you need when size and RGB is all you really want. Its surface is also quite smooth, as well as being waterproof.

KTRIO RGB Gaming Mousepad is surprisingly durable. The edges are nicely stitched to reduce wear and tear over time, which is great for product life. Although the surface has a small amount of friction, overall the experience is very smooth.

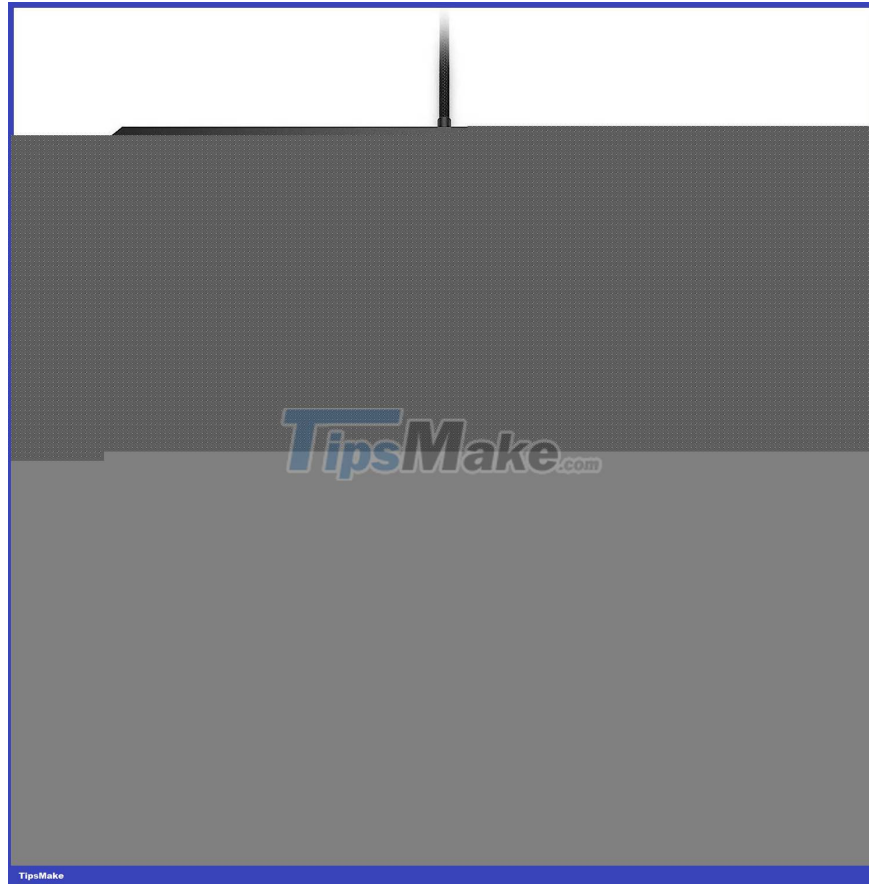

#### Advantage

1. Waterproof coating
2. Rubber sole has good grip on the table
3. The edges are carefully finished

#### Defect

1. Stains are difficult to remove

## HP Omen Outpost

The HP Omen Outpost serves not only as a work of art, but as a product that looks to the future. Quickly switch between hard and soft surfaces, while still having access to Qi wireless charging.

#### Advantage

1. Qi Charger 5W
2. Quickly switch between hard and soft surfaces
3. Dynamic lighting keeps everything in sync

#### Defect

1. Only a single RGB zone

## **Thermaltake Argent MP1 RGB Mousepad**

Thermaltake Argent MP1 RGB Mousepad gets rid of the fabric, replacing it with aluminum and a hard surface. The durability of this mousepad is on par with its performance.

#### Advantage

1. Tough, sure
2. Hard surface greatly reduces friction
3. Lots of space to move around

#### Defect

1. Requires large area to place the pad

## HyperX Pulsefire Mat

The HyperX Pulsefire Mat's smooth, precise surface is perfect for gamers of all kinds. The RGB software is also incredibly easy to use, not to mention the advantage of having a conveniently placed RGB button.

#### Advantage

1. Smooth, precise surface
2. Has anti-fraying stitching
3. Provide the necessary space to use the mouse

Defect

1. Basic RGB functions

## Razer Firefly V2

Featuring 19 RGB zones, the Razer Firefly V2 is highly customizable through Razer's proprietary software. It also has a slim form factor for comfort and a handy built-in cable end.

Advantage

1. 19 RGB lighting zones
2. Your wrist will be comfortable to use
3. Built-in micro-textured surface for high speed

Defect

1. Software may be less user-friendly
2. Easy to stick to fingerprints
