

7 bluetooth headsets have the best battery life

There are many things to consider when buying Bluetooth headsets: Price, sound quality, comfort, etc. But perhaps the biggest concern is battery life.

There are many things to consider when buying Bluetooth headsets: Price, sound quality, comfort, etc. But perhaps the biggest concern is battery life. It's not convenient to charge a headset while you're on the move. So make sure the headset does not run out of battery when you need it most.

In this tutorial, TipsMake.com has selected 7 Bluetooth headsets with the best battery life. The battery life of headsets can be fully used for one day, or for at least a week in standby mode.

Top 7 bluetooth headsets with "huge" battery life

1. Plantronics Voyager Focus UC
2. VXi BlueParrott B250-XTS
3. Plantronic M70
4. Jabra Elite 65t
5. Mpow Pro Trucker
6. Jabra Talk 45
7. Motorola Boom 2+

1. Plantronics Voyager Focus UC

Plantronic Voyager Focus UC is an on-ear headset, providing a very pleasant listening experience. The scope of this headset is impressive (up to nearly 30 meters), which means you can move freely, not in one place when using a headset.

Plantronic Voyager Focus UC features a noise canceling feature, which helps to keep the sound on both sides of the headset clearer. Plantronic Voyager Focus UC also has a handy mute feature, notification if you start talking when the mic is turned off.

You will receive a stylish magnetic charging dock when buying this headset, but you should not use it too often. This headset can be used for about 12 hours.

Reference price: \$ 149 (3,456,000 VND).

2. VXi BlueParrott B250-XTS

Absolutely won the VXi BlueParrott B250-XTS when it comes to battery life. The battery of this headset can last for more than 20 hours of talk time and over 150 hours in standby mode. More convenient is the ability to charge the headset via any standard micro-USB cable.

This headset is very suitable for use while on the move, thanks to the noise canceling feature, which helps reduce traffic and other unwanted sounds around. The only downside is that it does not support playback of other audio files, including music or GPS instructions. If you need this feature, see BlueParrott B350-XT instead.

Reference price: \$ 99 (2,300,000VND).

3. Plantronic M70

Plantronic M70 is small, light and extremely affordable. But in contrast to the normal looking appearance, the battery life is 'terrible'. The battery of this headset can last more than 11 hours of talk time and with intelligent hibernation mode DeepSleep, the battery life will last up to 6 months.

M70 supports music and other audio files, plus support for Siri, Cortana and Google Assistant. You can activate all of these features through the control buttons on the headset, without even having to unplug the phone from the pocket. Above all, Plantronic M70 has HD voice quality and 91% noise reduction, which is ideal for use in high noise environments.

Reference price: \$ 23.75 (VND 550,000).

4. Jabra Elite 65t

At first glance, Jabra Elite's 5-hour battery life is slightly short. However, Jabra Elite 65t is part of a new wireless headset line that comes with its own charger case.

Every time you remove the headset and insert it into the case, the headset starts charging again. That helps extend the battery life up to 15 hours, before needing to recharge with a cable.

That's not the only thing users like about these headsets. In addition to the charger case that extends the battery life, they are also compact and elegant. These headsets are rated IP55, which means they have some water and dirt protection features. Up to 4 microphones make the call quality better, plus integrating support for Alexa, Siri and Google Assistant.

Elite 65t is quite expensive, but is one of the best wireless headsets on the market.

Reference price: \$ 149.99 (VND 3,480,000).

5. Mpow Pro Trucker

If you want a simple Bluetooth headset, with all-day battery life, look no further than Mpow Pro Trucker. The battery life of this headset lasts up to 12 hours of talk time and 200 hours of standby time. Pro Trucker Mpow is also capable of fast charging (charging from 0 to 100% in just two hours).

Many users also said that using Pro Trucker Mpow is very comfortable. Sound quality is also quite impressive thanks to the accompanying noise reduction mic. Other features are slightly limited (for example, Mpow Pro

Trucker does not support music playback). But that is not the problem. This headset has an excellent battery life with a super affordable price.

Reference price: \$ 18.99 (440,000VND).

6. Jabra Talk 45

Jabra Talk 45 is a small Bluetooth headset but has many features. Two of the outstanding features of Jabra Talk 45 are HD Voice and noise reduction capabilities for superior call quality.

The Jabra Talk 45 is capable of streaming media, including music and GPS guides, plus support for Siri and Google Assistant. Jabra's companion app is also a plus point. With this application, you can read text messages as soon as they are sent.

Battery life is enough for 6 hours of talk time and 8 days in standby mode, a little shorter than other products that the article has listed, but still enough for the whole day.

If you like a really long Jabra model with talk time, check out the Jabra Talk 25 for a cheaper price, more traditional style and can talk continuously for 8 hours.

Reference price: \$ 53.5 (VND 1,240,000).

7. Motorola Boom 2+

With 9 hours of talk time, the Motorola Boom 2+ is enough for day-to-day use and lasts up to 200 hours in standby mode. But this headset also has many other impressive features, in addition to the battery 'terrible' above.

This earbud is very small and compact. The range of the Motorola Boom 2+ is over 90 meters and with NFC support, you can connect this headset to your phone in a flash. The Motorola Boom 2+ has the ability to eliminate noise as expected, and lots of smart reminders help along the way. For example, Boom 2+ will speak the caller's name and also alert whenever the battery starts to weaken.

Reference price: \$ 62.7 (VND 1,454,000).

Now, when the iPhone and a large number of Android phones are eliminating the 3.5mm headphone jack, the Bluetooth headset is an extremely essential device. The headset models mentioned above are very suitable for conversations. Even more headsets allow music to be played.

Wish you find yourself a satisfactory headset!
