

# 7 Great Distance Measuring Apps for Mobile Devices

Forget about measuring distances with a tape measure or relying on road signs. Whatever you're trying to measure, these distance measuring mobile apps make it easy to get accurate results in seconds.

Forget about measuring distances with a tape measure or relying on road signs. Whatever you're trying to measure, these distance measuring mobile apps make it easy to get accurate results in seconds.

1. The Best Pedometer Apps for Android and iOS

## 1. GPS Distance Calculator Trails

1. Download GPS Distance Calculator Trails for Android

Whether you are hiking, cycling, walking or driving, GPS Distance Calculator Trails has you covered. It is one of the simplest distance measuring apps. Just grant location permissions, set your starting point and start moving. That's it!

The best part is that you can choose the map style. This allows you to view your measured trails the way you want. You can also set your preferred unit of measurement. As mentioned, it's super easy.

## **2. Footpath Route Planner**

1. [Download Footpath Route Planner for Android | iOS](#)

While most hiking distance measuring apps measure distance as you go, Footpath Route Planner measures it during the planning stage. Want to make sure that fun trail isn't too long or too steep? Just use your finger to accurately measure distance.

38 ft gain, -128 ft loss

What makes this app different is that it doesn't just measure distance. It also measures elevation to help you more accurately determine the steepness of a trail before you hike.

### **3. GPS Fields Area Measure**

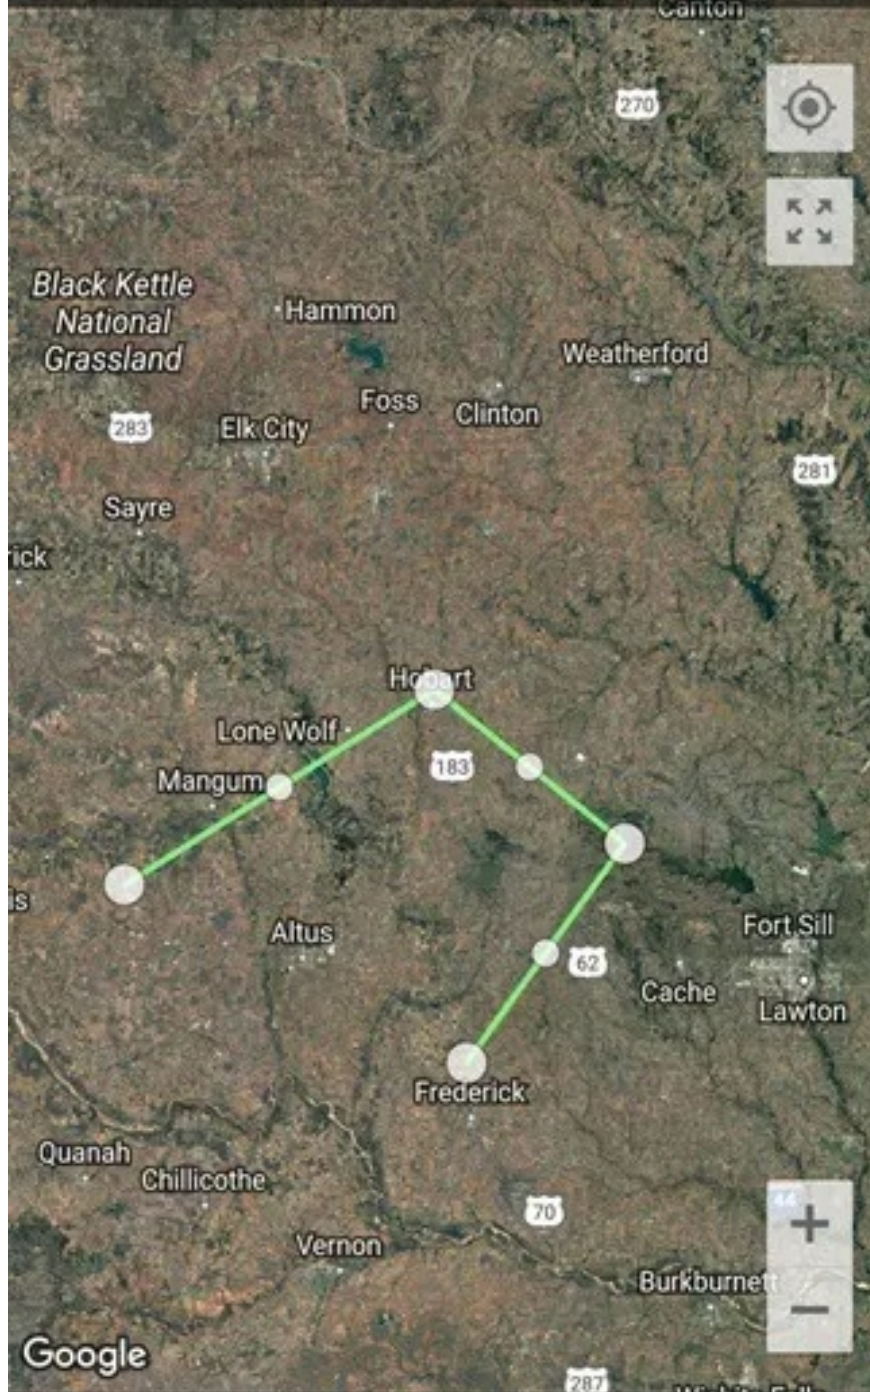

1. [Download GPS Fields Area Measure for Android | iOS](#)

GPS Fields Area Measure lets you start with a map and use it to measure the distance between two or more points. Measure the distance between two cities, the length of a road, or the perimeter, such as a field or other piece of land.

# Map

Distance: 150.617 km

Google

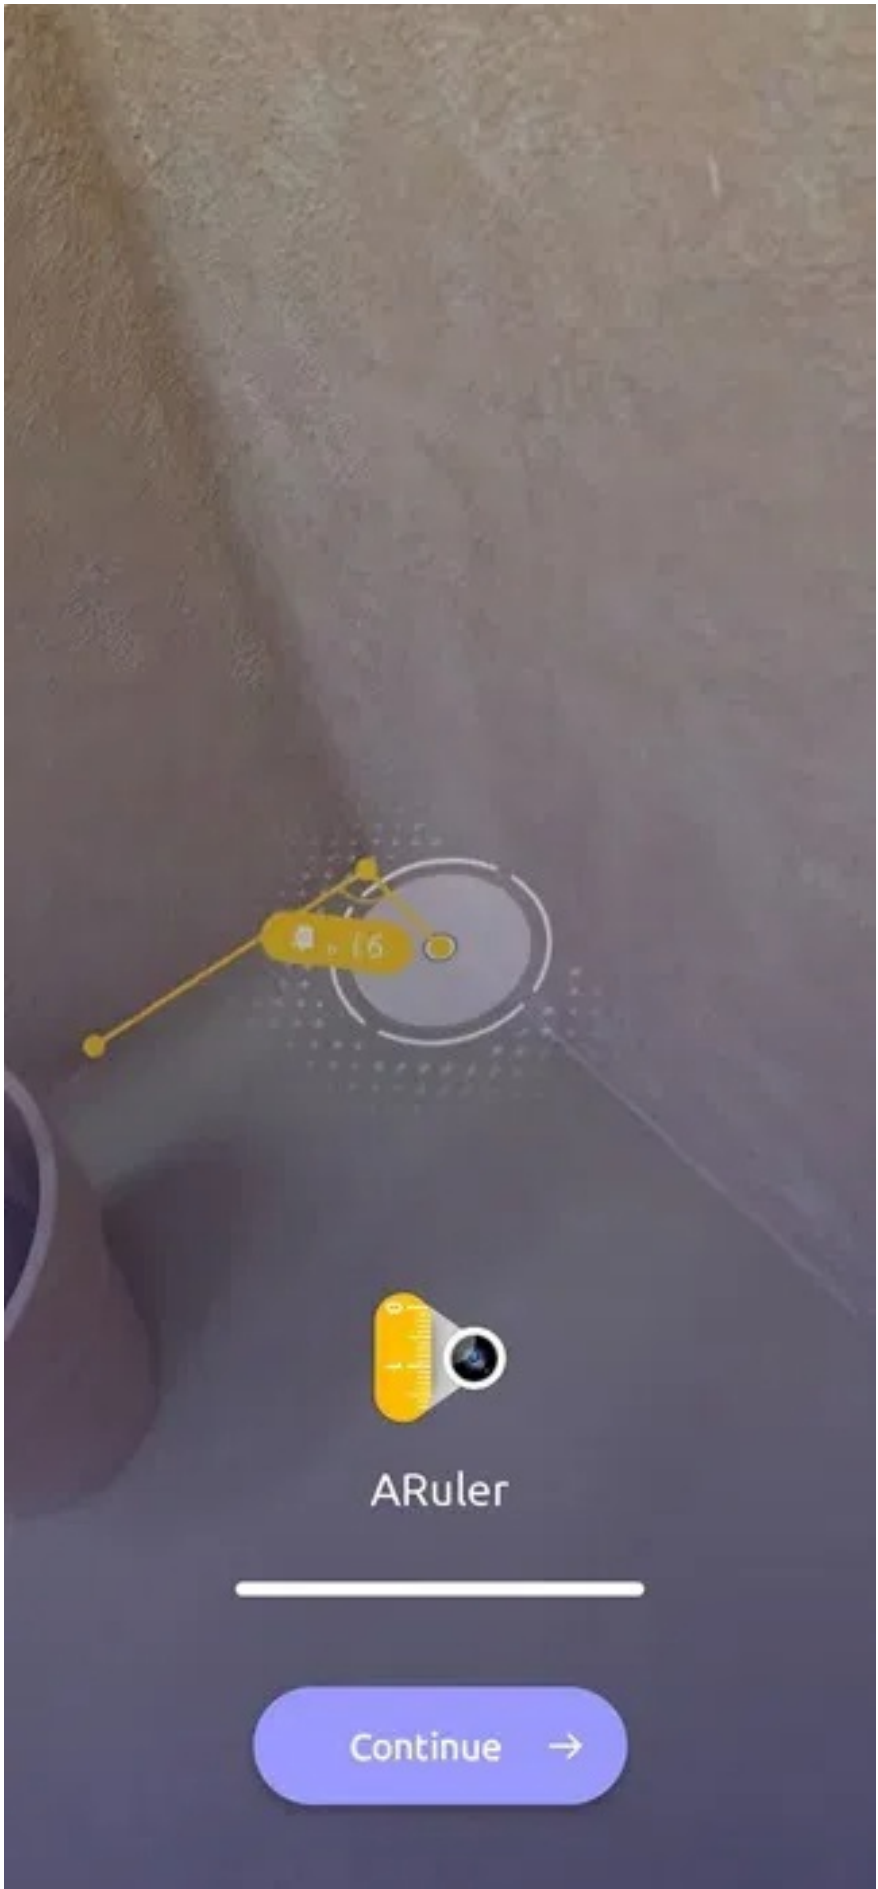

This app is designed for farmers who want to quickly measure the perimeter of their fields. However, it is really for anyone who wants to measure distances and perimeters around the world.

## **4. AR Ruler 3D**

### 1. Download AR Ruler 3D for Android | iOS

AR Ruler 3D, or AR Ruler App on the Google Play Store, turns your phone's camera into a tape measure. Whether you're renovating a room, designing a garden, or setting up a new floor plan, this app can help. It can handle everything from simple line measurements to volumes and distances.

ARuler

The app uses LiDAR technology to measure objects. Just gently move your phone according to the instructions in the app and you can start measuring your target. Choose the units of measurement (both metric and imperial), along with your measurement type, such as line, distance, volume, etc. The app even automatically detects shapes.

## **5. Map My Walk**

1. [Download Map My Walk for Android | iOS](#)

Want to know how far it is to walk from your favorite coffee shop to your house? Just use Map My Walk. The app tracks almost everything about your walk, like route, speed, and distance, using your phone's GPS.

**START WORKOUT**

Unlike the other distance measuring apps on this list, this one is designed for fitness purposes, and even integrates with some fitness trackers and apps. There are even multiple walking and activity types to choose from. You can even use it to measure the distance of a hallway.

## **6. Google Maps**

1. [Download Google Maps for Android | iOS | Web](#)

While all the other apps on this list have paid options, Google Maps is free. Sure, you may have used it for traveling, but did you know it also has a built-in distance measuring tool? If you want to see distances for more than just a planned route, open the Measure Distance tool to get started.

Measure areas as big or small as you like. Zoom in to measure your yard or the width of a local lake. Or, check the distance between cities, states, or countries. Right-click (Web) or long-press (App) the first point on the map. Select **Measure distance** , then select the other point(s). If you don't see this option, swipe up to see more options. The options can be straight lines or any shape you want.

## 7. GPS Land Measurement and Survey

1. Download GPS Land Measurement and Survey for Android | iOS

GPS Land Measurement and Survey is a distance measurement and area calculation application in one. This application is mainly designed for land surveying, providing both manual and GPS measurement modes.
