Create your own mode

Tile Modes help you quickly change the scene on your Android device. Whether you're driving, playing a game, or going to bed, there's a mode for every situation. Tile Modes lets you quickly choose from preset modes or create your own if needed.

When you initiate a mode, your phone goes into silent mode, turns off notifications, and blocks apps from disturbing your sleep or gaming session—all with just two taps.

Just the Two of Us

Song by Grover Washington, Jr.

Overview

Lyrics

3:19

Bill Withers - Just The Two Of Us (official video)

📺 Pop music crooners of the 20th century

Lyrics

I see the crystal raindrops fall
And the beauty of it all
Is when the sun comes shining through
To make those rainbows in my mind...

While Google 's Pixel devices can identify any song playing nearby with the Now Playing feature, other Android devices lack this functionality. However, the Song Search quick settings tile fills this gap seamlessly. With just a tap, it quickly gives you details about any song playing nearby so you don't miss a catchy tune.

Song Search is not only accurate, but it's also surprisingly fast. Once launched, Google's Song Search will quickly listen to the song that's playing and give you information about the previously unknown tune.

5. Extra Dim

Brightness below minimum to avoid eye strain

Tile Extra Dim not only helps protect your eyes at night, it also provides an indirect privacy shield against any nearby snoopers. By dimming the screen below its lowest brightness level, Extra Dim indirectly reduces visibility, prevents eye strain, and improves distance vision.

Tile Security and privacy are more important than you think. We can't always keep track of the permissions of every app on our phones, which gives apps more access to our camera, microphone, and location in the background than they intended. All of this information can be used to track your activities.

Whether you're commuting to work, sitting in a park, scrolling through your phone, watching YouTube , or enjoying a movie, people often don't want to plug in their headphones. However, they also don't want to disturb those around them with the sound of their phones. That's where Live Caption comes in handy.

While most apps these days have built-in caption support, Live Caption lets you enable captions for any content with just a tap. You won't have to fiddle with in-app settings to enable captions, and you can customize them to your liking.

Android's Tile Focus mode offers a simple solution to the smartphone distraction problem. It pauses distracting apps until you choose to reactivate them, helping you regain control of your time and focus on the task at hand.

You can still launch the app and use it for 5 minutes, the app will automatically close after the specified time.

QR codes are everywhere. Having to switch between different apps to scan them can get tiring, to the point where you don't want to scan any more QR codes.

The QR Code Scanner tile offers a convenient solution. With just a tap, you can scan any QR code without having to open a separate app (even from the gallery). As part of the Google app, this tile reliably pulls details from any QR code you scan.
