

7 reasons why you should buy iPhone X instead of iPhone 8

It's true that the iPhone 8 is an easier option than the iPhone X, but you will lose some of your own experience if you choose it instead of iPhone X.

Apple has launched 3 new iPhones: iPhone 8, iPhone 8 Plus and iPhone X with 3 prices of \$ 699, \$ 799 and \$ 999 respectively. You might ask why I have to spend at least \$ 1000 to buy an iPhone X while the iPhone 8 has many similar features and the price is cheaper than a few hundred dollars?

It's true that the iPhone 8 is an easier option than the iPhone X, but you will lose some of your own experience if you choose it instead of iPhone X.

iPhone X has a bigger screen

iPhone 8 and iPhone 8 Plus have 4.7 and 5.5 inch screens, while X's screen is 5.8 inches wide, covering almost the entire front of the phone.

iPhone X screen has better quality

iPhone X is the first iPhone to use an OLED display, which can produce accurate, sharp and darker colors. iPhone 8 and 8 Plus only use LCD screens like previous iPhones.

iPhone X screen almost occupies the entire phone

iPhone X also supports HDR, the technology has a clear difference when using 4K. iPhone 8 and iPhone 8 Plus do not support HDR.

iPhone X unlock faster and safer

One of the distinctive features of iPhone X is Face ID. This is the first phone without nubs Home, iPhone will use camera and sensor to detect faces - even in the dark - and unlock. Apple says that Face ID is more secure than Touch ID, a fingerprint unlock technology of iPhone 8 and 8 Plus.

iPhone X has a better selfie camera

Compared to FaceTime HD cameras on 8 and 8 Plus, the TrueDepth camera of the iPhone X also has all the same features but can take better selfie photos.

iPhone X has 3 exclusive features on the front camera: portrait selfie mode to blur the background, Portrait Lighting allows to remove the background when taking a selfie, even after shooting and Animoji allows to send emoji to mimic sympathy Face contact.

Front camera for better images

Animoji is also the reason to buy iPhone X

It's also easy to imagine the joy of using this feature.

iPhone X also has a better rear camera

The main difference is that the iPhone X has OIS optical stabilization technology for both wide-angle and telephoto lenses on the rear camera. iPhone 8 Plus has similar rear camera but only OIS for wide-angle tube. This means that the iPhone X will have a sharper image, even in low light conditions.

Perhaps you will sell more money with iPhone X

When the iPhone X is a better phone than the iPhone 8 and 8 Plus, the same fact that Apple produces in smaller quantities, if you sell iPhone X in the future, you can expect a higher price. When it comes to reselling prices, high technology will cost more.
