3. Geek Uninstaller

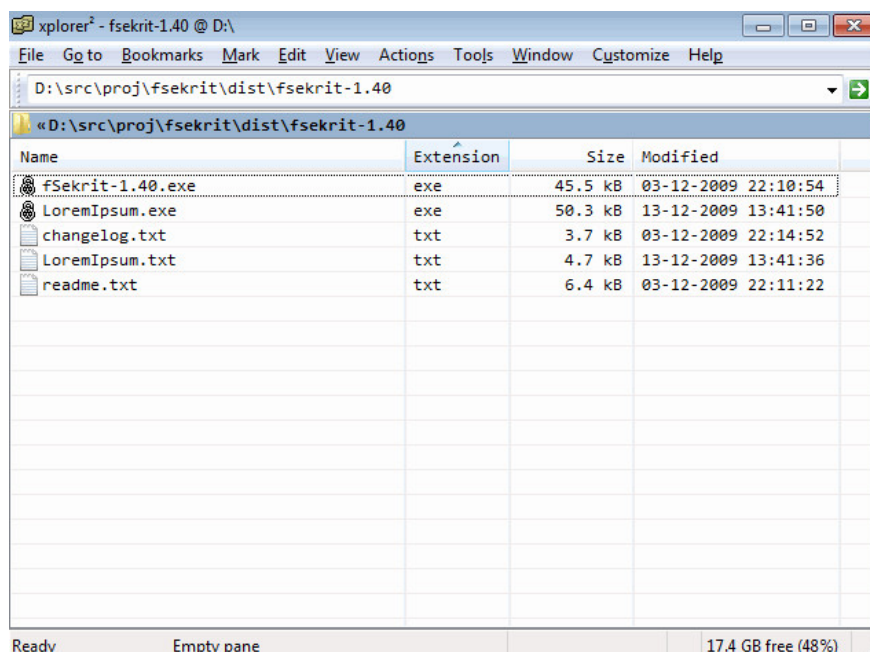

Download Geek Uninstaller for free here!

In the process of use, sometimes you get bored of old applications and want to remove the program being installed on your computer to install newer things, but, if removed with the default feature of Windows is hard to erase. Now a third-party software will be the choice for you, amidst numerous applications, Geek Uninstaller is a great choice for you because this application completely eliminates rooted data. regarding the removal program. This application is completely free, no need to install with a simple interface. Occupying a small amount of memory, especially Geek Uninstaller supports Vietnamese language for you to use more easily, in addition to exporting a full HTML file list of applications on your device.

4. FSekrit

Download fSekrit for free here!

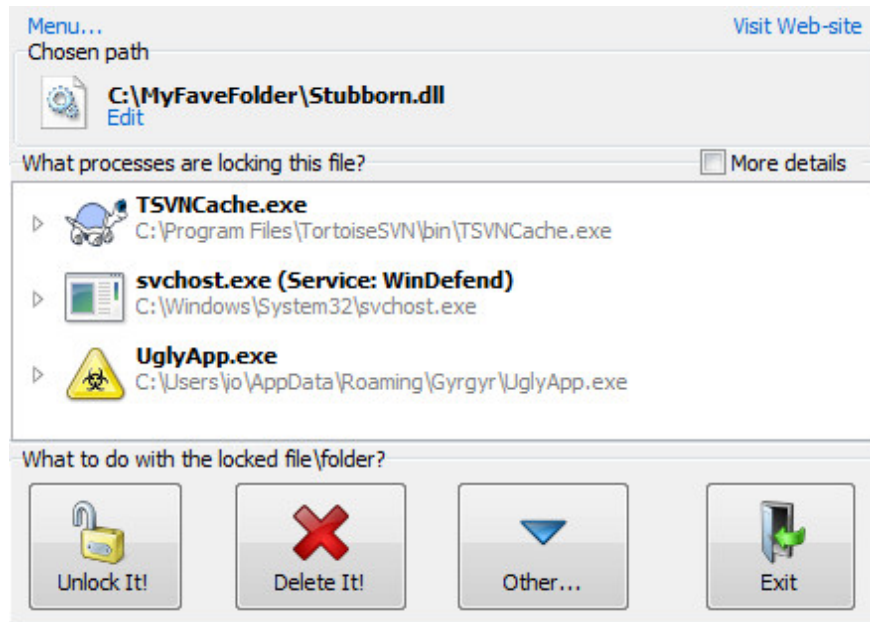

If you are someone who likes to write notes or diaries on your computer, you can still use OneNote or Evernote. However, in life there are secrets that you do not want to let anyone know, the two default applications above can not help you keep information confidential. So, an application that can write text files as well as secure information is no different from fSekrit. With this application you can set up an attached password to avoid leaking information to the outside. Thanks to Fsekrit, you can send and share important information in text format for your friends and relatives to be absolutely safe.

The Fsekrit tool is quite compact in size, and does not require special installation and can still be used. You just need to extract and click to run the application, then you enter content to share with your relatives and friends in the work window or simply copy the content available there. Finally, you send your relatives and friends the newly created .exe text file.

5. LockHunter

Download LockHunter for free here!

Most computers that take a while will generate unnecessary system files, application files, causing the computer to become slower, although we switch to safe mode to delete but Those 'stubborn' files still can't be deleted. The solution here is to delete the file using LockHunter.

LockHunter is a small, useful utility that can be used to delete or fix those 'hard-headed' files quickly and easily. LockHunter allows us to delete files locked by the operating system, locked by viruses (note: LockHunter has no Virus removal function). Then send the files to the recycle bin, handy for restoring if you delete the important file of the system.

6. Zoiper

Download Zoiper for free here!

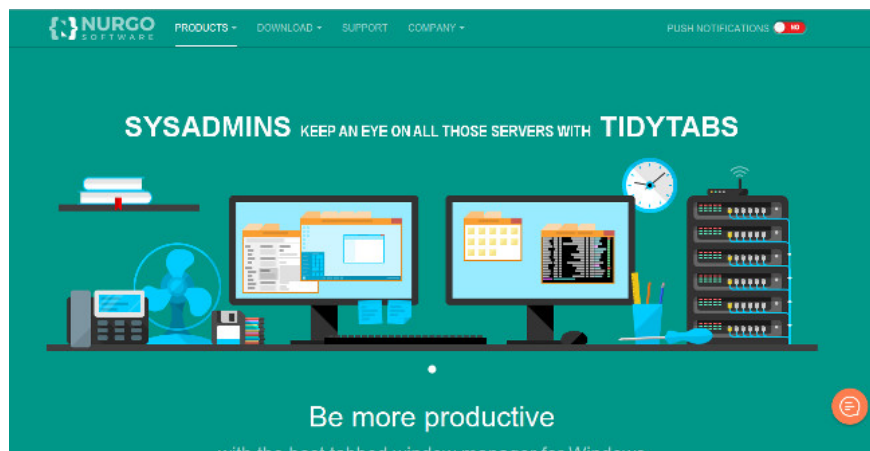

Zoiper is a free softphone software application that allows you to make phone calls over the Internet by connecting to a VoIP service provider. To use Zoiper you need a computer (or smartphone). Besides Windows, there are software versions for Android, iOS, Windows Phone, Linux and Mac OS X. The program interface is packed with 11 language packs and has all the standard audio and video codes needed. Set . With this application you can use dialing, contacts, voice mail and can answer your call like using a regular phone. In fact, the program is used with headphones and connected to the computer via a sound card or smartphone via a headset connection

In the Windows version the application has recently been overhauled, supporting SIP and IAX protocols, providing call logs, phone hold buttons and contact lists. The Pro version also offers more features including call recording and video calling.

7. TidyTabs

Download TidyTabs for free here!

TidyTabs was developed by Nurgo Software, this application is free software, provided for Windows users with the ability to add tab features to most Windows applications such as Explorer, Office, Notepad, CMD, . this application has all 2 versions for users to choose, including Free and Pro. Depending on your needs, you can choose the appropriate version.

TidyTabs is suitable for those who are constantly doing a lot of work, opening multiple windows on the computer and especially TidyTab operating in the background and not requiring users to install another program.

To manage tabs on Chrome browser, you can use Tab Manager as a tab management utility in miniature form. Tab Manager utility also supports shortcuts to manage cards, very quickly and conveniently.

TidyTabs will automatically determine which applications need tabs, which applications do not need, but you can still override the decisions made by TidyTabs in blacklist and whitelist.
