

# 7 websites to download free desktop icons for Windows 10

Personalizing icons for shortcuts is a great way to make your PC look more attractive. You can replace boring icons for folders for years and people will admire how well your desktop is organized.

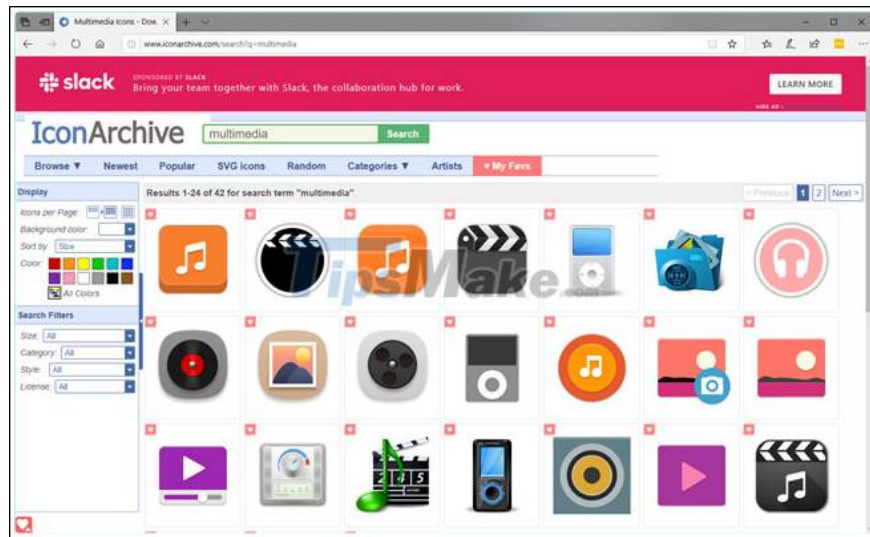

So where to go to find new icon sets? Here are some websites that allow you to download new icon sets for Windows for free.

## 1. DevianArt

[DevianArt](https://www.deviantart.com) is the largest online community with more than 47 million registered members, including artists and art enthusiasts. This website has a large number of beautiful icons created by artists from all over the world. Communities are constantly adding new content and make sure you can find something that's right for you.

## 2. IconArchive

[IconArchive](https://www.iconarchive.com) is one of the favorites for downloading icons. This website has more than 600,000 icons, most of them look great and many of them are free even for commercial use. IconArchive also provides icon sets, groups of icons with the same style for a unified look. All you have to do is enter the type of icon you want in the search bar.

### 3. FindIcons

[Findicons](https://findicons.com) is another trusted resource where you can find over 470,000 awesome icons. All you have to do is enter keywords that describe the logo you want and download it.

In addition, you can also browse over 2600 available icon packs and choose the one you like best.

### 4. DryIcons

[Dryicons](https://dryicons.com/) has one of the largest, professionally designed, unique collection of unique icons. This site offers more than 6700 icons and vector graphics with free, regular or extended license for a variety of styles, themes and colors.

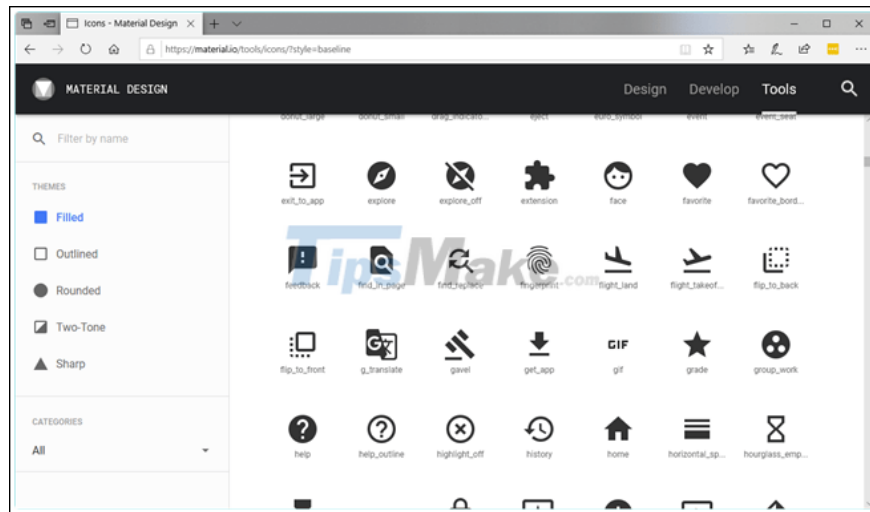

## 5. iconmonstr

[iconmonstr](https://iconmonstr.com/) is a bit different from other websites. First, iconmonstr provides a large number of icons (they are both black and white). You can use them as icons on your desktop, web pages, or as graphics in your presentations, for a more visual impact.

Second, this site provides all the icons in .svg, .eps, .psd and .png formats. This means you have to convert them to .ico format if you want to use them as icons for files and folders on Windows device.

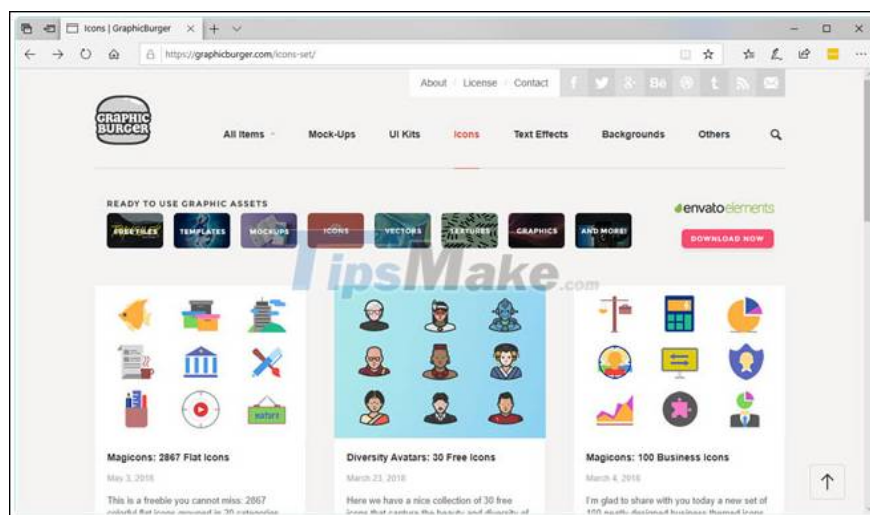

## 6. Icon Material Design from Google

If you like Android and its icons, Google offers them all on its Material Design website. All icons are simple and follow Google's guidelines for simplicity and usability.

You can download any [Google icon](#) you like but keep in mind that they are designed for use on Android, iOS and the web, so they are only available in .png and .svg formats. That means you have to first convert your downloaded icons into .ico format if you want to use them in Windows 10.

## 7. GraphicBurger

[GraphicBurger](#) is a great place if you want to download perfect, very high quality pixel icons. It is run by a Romanian designer (Raul Taci) and all the icons and other design resources this designer provides can be used for free by anyone. However, you must know that the icons are available in .png, .svg, .eps and Sketch formats, so you'll need to convert them to .ico file formats if you want to use them in Windows 10.

The websites we've covered above are good sources for finding great icons. In just a few minutes you will surely find some beautiful icon sets that will help you 'skin-change' the look and feel of your Windows desktop.

Wish you have a good choice for yourself!
