

8 apps to help you watch YouTube videos in Chrome floating window

While waiting for Google to release the Picture-in-Picture feature for the web version of YouTube, users can use these extensions to play videos anywhere on the web in Chrome's floating window.

While waiting for Google to release the Picture-in-Picture feature for the web version of YouTube, users can use these extensions to play videos anywhere on the web in Chrome's floating window.

1. Sideplayer

1. Just watch YouTube and work with Sideplayer

2. Uninterrupted for YouTube

Uninterrupted feature for YouTube:

1. Support playing many types of YouTube videos (playlist, 360 degrees, live) in floating window.
2. Can move, change the position of floating window display.
3. Automatically exit the video when played out.

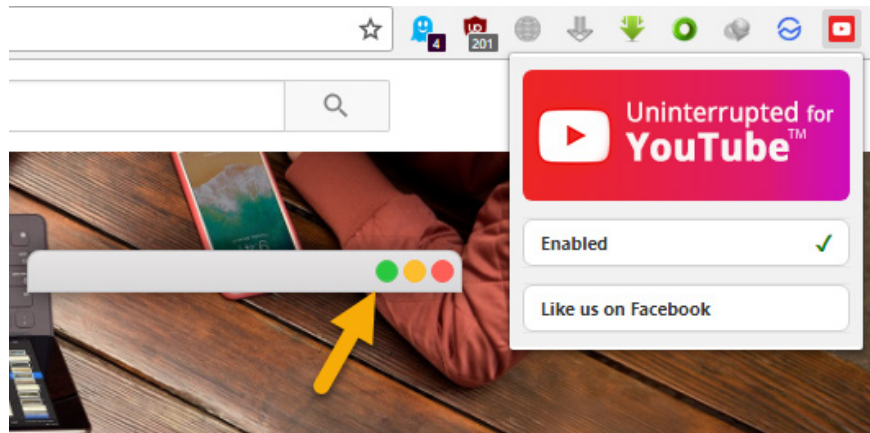

Visit the link below -> click on Add to Chrome -> select Add extension to install this extension.

Installation link: [Uninterrupted for YouTube](#)

The utility's Picture-in-Picture feature automatically activates after the installation is completed. To activate the floating window, you open the video you want to view in the floating window -> perform a search or click on the avatar account.

If playing a playlist format, you can click the Next button to move to the next video playback.

If you just want to listen to the sound without watching the video, you can hide the playback frame by clicking the minimize button on the playback window. To turn off this feature, click the widget icon -> click Enabled.

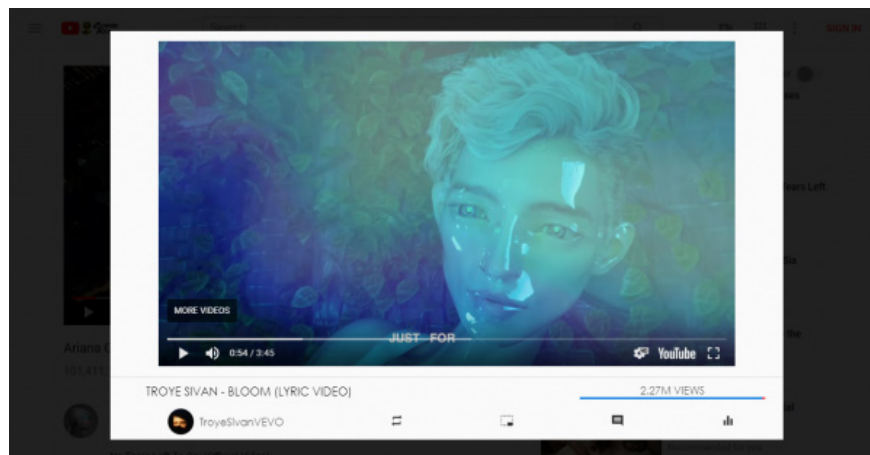

3. InstantView for YouTube

Link settings: InstantView for YouTube

Additional utility for YouTube with many functions such as separate interface, repeat, visualiser effect, play video in floating window .

With InstantView for YouTube, users can select two video viewing modes:

Compact Mode: Click on the thumbnail of the video, it will be opened in a separate interface, pop-up format, floating on the screen but neat and played in theater mode. Comments, video suggestions, information will be hidden.

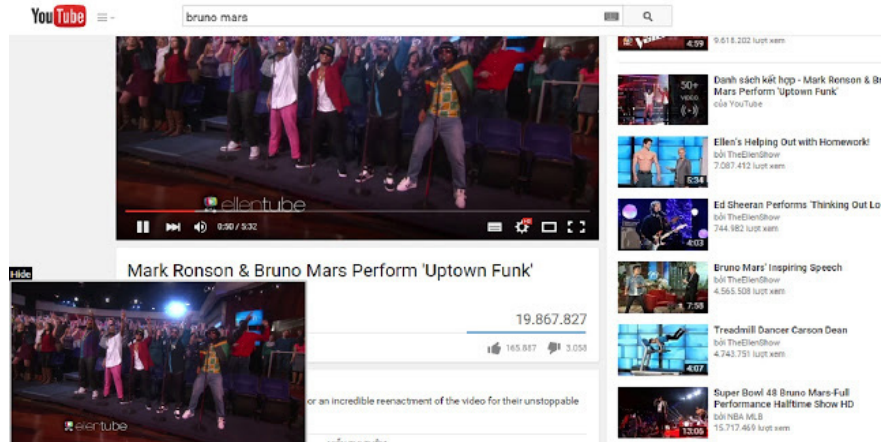

Users click on an empty area of the screen or press the Esc key to exit this view.

Floating window: To open the video in this mode, you do it via Compact Mode and press the second icon button from the left.

4. LazyFox

This utility helps users to watch videos in floating windows running on HTML5, such as YouTube, Facebook, Vimeo, Dailymotion, Zing TV, .

Link installation: LazyFox

To open a pop-up playback window, simply click on the video thumbnail. You can move the position of the video display. The floating window only works on the video playback page, but it works independently on all websites. Thus, you can open the floating window on YouTube, Facebook, Vimeo from different tabs that the content is not affected.

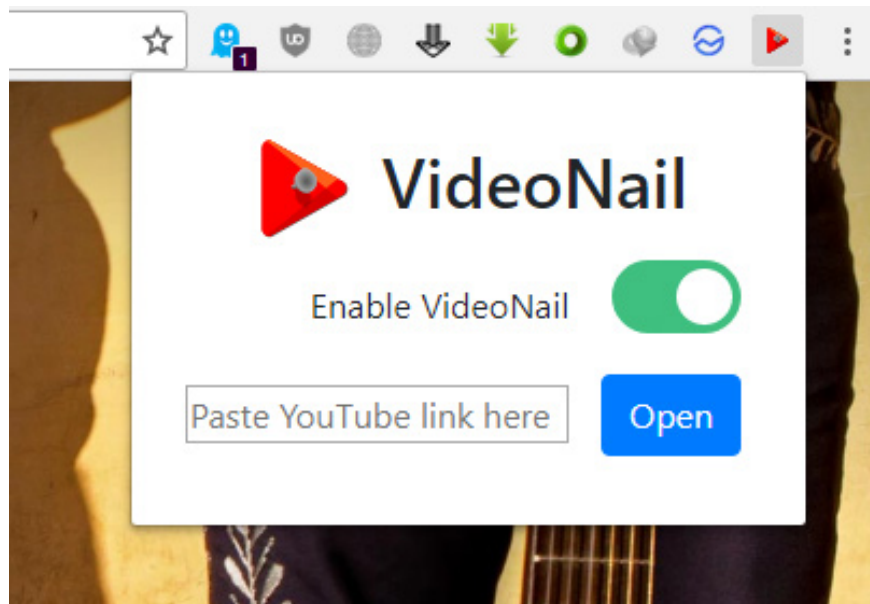

5. VideoNail - Floating YouTube PiP Player

Like Sideplayer, this utility allows playing videos in floating windows at sites outside of YouTube but in the same tab.

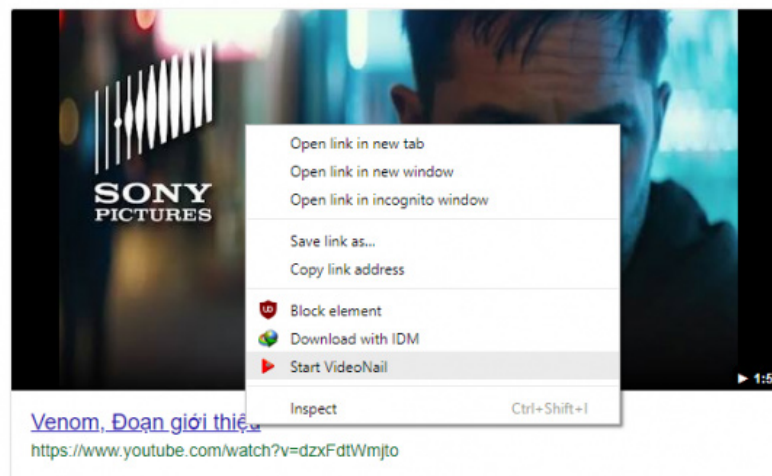

Installation link: [VideoNail - Floating YouTube PiP Player](#)

You can open the video in the floating window on this gadget in the following ways:

1. Open the video and scroll down, the floating window will appear. You can easily move, change the position of the display window.
2. Click the utility icon in the toolbar -> copy and paste the video URL you want to view into the empty box -> click Open.

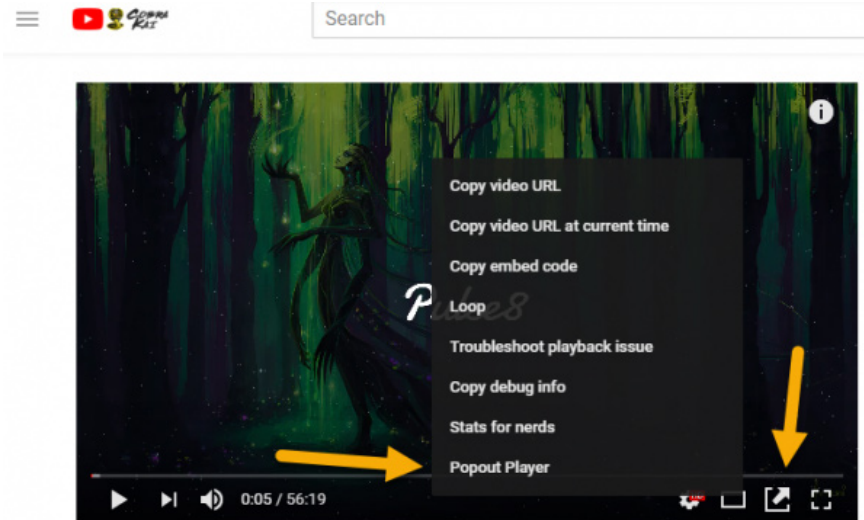

1. To open a link window when searching or on any web page, right-click on the YouTube link -> select **Start VideoNail** .

6. YouTube Popout Player

With this utility, users can play YouTube videos in a browser-independent window, so even if you play other videos or close YouTube, it will not be affected.

Installation link: [YouTube Popout Player](#)

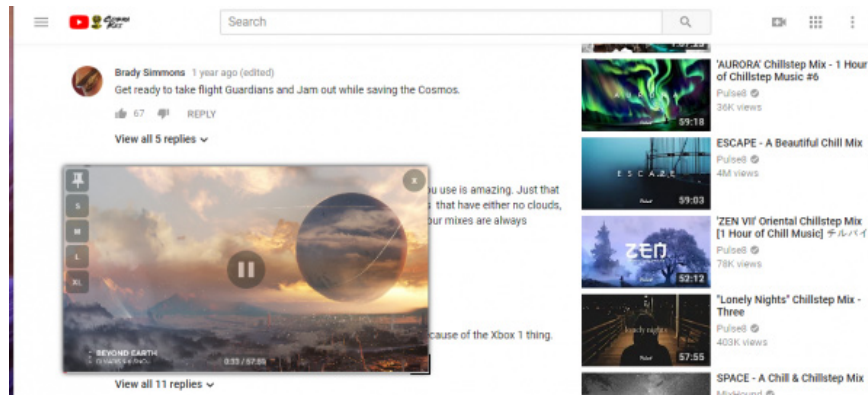

There are two ways to open in a standalone window:

- + Click the Popout Player button to the left of Full screen in the playback frame.
- + Right-click on the video playback screen -> in the pop-up menu select Popout Player.

7. Mini Y
