

8 best 4K streaming devices in 2019

With Netflix, Apple TV +, Disney +, the world is really in the golden age of streaming (streaming). And to get the most out of it, you need a great streaming device to access all these services.

With Netflix, Apple TV +, Disney +, the world is really in the golden age of streaming (streaming). And to get the most out of it, you need a great streaming device to access all these services.

But which device is right for you? The following article may help you. Below is a list of the best 4K streaming devices today.

Which is the best 4K stream device in 2019?

1. Apple TV 4K
2. Nvidia Shield TV Pro
3. Amazon Fire TV Cube
4. Xiaomi Mi Box S
5. Amazon Fire TV Stick 4K
6. Roku Streaming Stick Plus
7. Chromecast Ultra
8. Roku Premiere Plus

1. Apple TV 4K

Reference price: About 5,000,000 VND

If you're attached to the Apple ecosystem, then Apple TV 4K is probably the best TV streaming device for you. This device possesses many features: Has 4K HDR video and Dolby Atmos sound, supports multiple users and a remote control supports Siri for voice control. This box works with all major services like Netflix, Amazon Prime and Hulu.

Apple even offers a free Apple TV + offer for 1 year. On top of that, you can play games through the Apple Arcade service using the Xbox One S controller or PlayStation Dual Shock 4. On the downside, of course, Apple TV 4K is very expensive and YouTube support is limited.

2. Nvidia Shield TV Pro

Reference price: \$ 200 (4,600,000 VND)

Apple is not exclusive to high-end streaming devices. One of Apple's rivals is the powerful Shield TV Pro device. In fact, Shield TV Pro may even be the best streaming device today. It offers everything you expect, plus lots of unique top features. The most interesting is that this box uses machine learning to upgrade 720p and 1080p videos to 4K, the reviews show that Nvidia Shield TV Pro is really good.

Shield TV Pro runs Android TV so you can add applications, like the Kodi streaming player, and it is compatible with both Google Assistant and Amazon Alexa. If that's not enough, you can also access Nvidia's game streaming service Nvidia. Although this box only has 16GB of storage, you can use a USB or hard drive to add additional storage as needed.

Do you want gaming options? The slightly cheaper Shield TV, with its unusual cylindrical design, might be a better option.

3. Amazon Fire TV Cube

Reference price: \$ 119.99 (2,778,000 VND)

Amazon Fire TV Cube is a 4K streaming box and Amazon Echo smart speaker, with Alexa integration. It provides high quality video streaming, with support for the latest formats like Dolby Vision and HDR10 +.

You can even use this box to control your TV or soundbar, along with countless other compatible smart home devices. Amazon Fire TV Cube provides all major online TV services, including Apple TV +. You can also watch local videos by connecting your own USB.

4. Xiaomi Mi Box S

Reference price: \$ 59.99 (1,393,000 VND)

If you want the benefits of Android TV but don't have the budget for Nvidia Shield TV, then Xiaomi Mi Box S is the device for you. It fully supports streaming services, works with Google Assistant, integrates Chromecast and is Netflix UHD certified. You can also install your own selection of applications and games.

Although the Xiaomi Mi Box S has an almost identical appearance to the Apple TV, the lower price means lower specifications. Some users believe that Xiaomi Mi Box S may be a bit laggy, especially when playing 4K content. Perhaps this is a better choice if you are happy with choosing 1080p content instead.

5. Amazon Fire TV Stick 4K

Reference price: \$ 49.99 (VND 1,160,000)

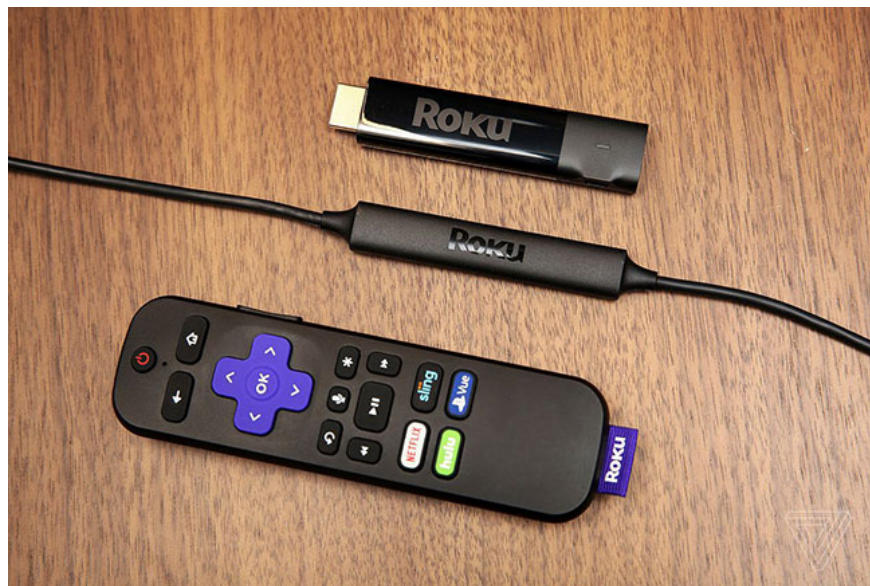

The Amazon Fire TV Stick 4K is one of the cheapest 4K UHD streaming devices and may be the best 4K streaming device for most people. This small device hides a lot of power. There is support for 4K HDR, along with Dolby Vision and Dolby Atmos. Fire Stick 4K has also improved WiFi performance compared to previous versions.

You have access to a full range of streaming services, including Prime Video, Netflix, YouTube and Apple TV +, along with many other add-on channels. Another impressive feature is the Amazon Fire TV Stick 4K integrated with Alexa, capable of controlling smart home devices, as well as supporting many basic Android applications and games.

6. Roku Streaming Stick Plus

Reference price: \$ 42.95 (VND 997,000)

The Fire TV Stick 4K is of good quality, but it prioritizes Amazon services and content a lot. If you want to find a cross-platform alternative, you might want to consider Roku Streaming Stick Plus. This Roku device claims to be the best 4K streaming device available. It comes with a voice remote control and long-range WiFi, according to Roku, which results in 4 times the range you normally expect.

For content, you get 4K HDR support, as well as 4K upgrades for 720p and 1080p videos. All major channels and services - both free and paid - are here. One of the interesting extras is the Roku mobile app. It includes a smart private listening mode, which allows you to use the headset to enjoy programs through your phone. You can set the volume to your preferred level so that you do not disturb anyone else in the house.

7. Chromecast Ultra

Reference price: \$ 83.99 (1,950,000 VND)

Unlike other devices here, Google's Chromecast Ultra needs a smartphone to set up and control. It works with every app that supports Chromecast, including options like Netflix and Hulu, to video player apps like VLC, so you can stream movies stored on your phone. Chromecast Ultra is a dongle that hangs on the back of the TV.

This design works well for TVs with a narrow HDMI port. It is also a great option if you have slow WiFi. There is an Ethernet port in the power adapter that allows you to use a fast, stable wired connection instead. Chromecast Ultra works with the Google Stadia game streaming platform.

8. Roku Premiere Plus

Reference price: \$ 40.98 (947,000VND)

The cheaper alternative to Streaming Stick Plus, Roku Premiere Plus, is a basic player that supports 4K HDR and a simple Roku-branded interface, making it easy to plug in and use. Premiere Plus is a very small dongle, which can dangle like a Chromecast, but can also be attached to the edge of the TV with a few pieces of duct tape.

Roku Premiere Plus has a basic voice remote control and supports all major streaming services, just like other Roku products. But unlike the more advanced Roku stream devices, Roku Premiere Plus does not offer the option to upgrade 4K. You also cannot get enhanced WiFi performance. But if you have a tight budget, these things are worth the tradeoff.

There is a lot of competition for the best 4K streaming device in 2019. Deciding which device is right for you will depend largely on your budget and whether you are bound to a specific ecosystem. of companies like Apple or Amazon.

Once selected, you can upgrade your 4K viewing experience by choosing one of the best cheap soundbar speakers.

Wish you find yourself a suitable choice!
