

## 8 best AirPrint printers in 2021

AirPrint lets you print photos and documents wirelessly from your Apple device without installing any additional software, so these best AirPrint printers are perfect for macOS and iOS users who don't want to deal with the hassle, trouble with cables or a difficult setup process.

If you like the idea of printing wirelessly from your mobile device, an AirPrint printer is an especially good choice for you.

### HP OfficeJet 250

#### Advantages

1. Great photo quality
2. Fast print and scan speed
3. Highly portable

#### Defect

1. No USB cable included

Measuring 36 x 18.5 x 7cm and weighing just 2.9kg, the OfficeJet 250 is lightweight, but still quite large for a battery-powered printer. However, with its sharp looks and powerful printing, scanning and copying capabilities, the OfficeJet 250 is an outstanding all-in-one printer with AirPrint that you can take with you on the go.

# HP OfficeJet 3830

## Advantages

1. Excellent image quality with high DPI
2. Fast print speed
3. Good price

## Defect

1. Battery is not included

It's not the prettiest printer out there, but it should serve well for those looking for a printer that can perform basic functions at an affordable price. The 3830 from HP's OfficeJet series is a basic printer - one that packs a lot of features but doesn't come close to being as advanced as more expensive options. The machine is capable of scanning, copying, faxing, and of course, printing.

# Canon Pixma iX6820

## Advantages

1. High quality photo prints
2. Solid design
3. Fast printing time

## Defect

1. Quick-drying tri-color ink cartridge

### Canon Pixma iX6820

Canon's Pixma iX6820 isn't as high-tech as some of the other printers on this list, but it performs well and is built to last. This business inkjet printer is ideal for both home and office, ready to handle anything from 10 x 15cm mail to 28 x 43cm spreadsheets to 33 x 48cm charts. The IX6820 offers exceptional print detail at a maximum color resolution of 9600 x 2400 dpi. However, because of this high part count, the color cartridges will have to be replaced quickly.

## **HP OfficeJet Pro 9025e**

### Advantages

1. For fast color and black and white output
2. Good quality print
3. Compatible with Alexa and Google Assistant

### Defect

1. No high mobility

If you need a powerful machine that can handle large print jobs, then the DeskJet Pro 9025e might be just what you're looking for. With 24ppm printing, this machine can handle multi-page documents quickly. Plus, with color resolutions of up to 4800x1200 dpi, you can print photos with outstanding detail.

## Epson EcoTank ET-3760

### Advantages

1. Use ink bottles instead of toner cartridges
2. Save money and reduce waste
3. Good print quality

### Defect

1. Expensive

The Epson EcoTank ET-3760 is different from many other InkJet printers because it uses refillable ink cartridges instead of replaceable cartridges. You get an included ink bottle that allows you to print for up to two years, but this also depends on how often you use the printer.

Ideal for small offices and home offices, the 3760 can print at resolutions up to 4800 x 1200 and print in color at speeds up to 8 ppm (15 pages in black and white). This is much slower than machines like the HP DeskJet 9025, but slightly faster than a budget printer or compact printer like the DeskJet 3755.

## Color Laser Printer Brother HL-L8360CDW

### Advantages

1. Fast printing time
2. Perfect text and graphics quality
3. Multiple wireless printing options

### Defect

1. Mediocre photo quality

If you have a home office or business and need a high-performance printer, this might be the one for you. Offering wired Ethernet and wireless connectivity via AirPrint, the Brother HL-L8360CDW is a color laser printer with print speeds of up to 33 ppm. However, this is not a compact printer. It measures 44 x 48.5 x 31cm and weighs 21.8kg, so the machine cannot be moved.

# HP DeskJet 3755

## Advantages

1. Good price
2. Small size
3. Trusted companion app

## Defect

1. No premium print speed

Not too long ago, finding a quality all-in-one printer for around \$100 was almost impossible. Now, there's a huge selection from the major manufacturers, including the HP DeskJet 3755. While it doesn't offer the speed or premium quality of higher-priced options, the surprise is in its value. In addition, at only about 15cm high, 41cm long and 17.8cm wide, the machine occupies a small area in the home office. The HP DeskJet 3755 can also fold into a rectangle when you're not using it, so you can stash it in a drawer if needed.

# Thermal Printer Brother PocketJet PJ773

## Advantages

1. Compact size
2. High resolution prints
3. Additional battery available
4. Built-in memory

## Defect

1. Expensive and specialized

The Brother PocketJet PJ733 is a wireless thermal printer, so you don't need ink cartridges to print documents on the go. With Airprint and other wireless printing options, you can use your Apple device to print in your car or in a hotel while on the go. The Brother PocketJet PJ733 is quite unique compared to other printers because of its compact size (25.5 x 5.5 x 3cm), making it easy to put in a backpack or luggage.

These are the best AirPrint printers at the moment. Hope to have a product that matches your requirements!
