

## 8 best wireless keyboards for traveling

With the rise of remote workers, there is an increasing need for technology to make their experience more convenient and comfortable. An important tool that travelers need is a wireless keyboard.

With the rise of remote workers, there is an increasing need for technology to make their experience more convenient and comfortable. An important tool that travelers need is a wireless keyboard.

Wireless keyboards come with different features, but they all contribute to a pain-free back and a comfortable workstation. However, travelers also need keyboards that fit well in their luggage, while backlighting and multi-device pairing are features that may also be of interest.

Here are some of the best wireless keyboards for travel today.

### Logitech K380

Logitech K380 is the best wireless keyboard choice for travelers who need to connect to multiple devices simultaneously. It can pair with up to 3 devices at the same time, allowing you to type on your phone, laptop or tablet conveniently and comfortably. The keyboard is also very quiet and has outstanding battery life, slim size and affordable price.

#### Advantage

1. Wide compatibility
2. Good price
3. Great battery life
4. The keys are comfortable, low-profile and quiet
5. Choose beautiful colors

#### Defect

1. Compactness affects some key sizes
2. No backlight

## Logitech MX Keys Mini

Logitech Keys Mini is a premium wireless keyboard with great design and quality features. This compact version of the MX Keys doesn't have a numeric keypad, making it a more compact choice for travelers. You can connect up to 3 devices, and handy features like system mute and dictation key add convenience.

### Advantage

1. Diverse color choices
2. Mac-specific version available
3. Comfortable and convenient keyboard
4. Can connect to 3 devices at the same time
5. Has backlight

### Defect

1. Expensive

## Arteck HB030B

If you're looking for a budget-priced wireless keyboard that still offers great quality, consider the Artek HB030B. Despite its affordable price, it has a convenient backlight that ensures you can get your work done outside, even after the sun goes down. There's even an auto-Sleep feature that helps preserve already excellent battery life. Travelers will also love its compact and lightweight size that makes it easy to carry around.

#### Advantage

1. Backlight color and brightness level can be selected
2. Good price
3. Good battery life
4. Automatically enter Sleep state
5. Compact and lightweight

#### Defect

1. Only one device can be paired
2. May not be suitable for people with large hands

## Apple Magic Keyboard

Apple Magic Keyboard is designed for Apple products. It's a thin, light keyboard that barely gets in the way during travel and is comfortable to type on for hours. It may be a little more expensive than other wireless keyboards, but the battery is long-lasting and setup is seamless.

#### Advantage

1. Light and thin
2. Good build quality
3. Includes USB-C to Lightning cable
4. The battery can be used for a long time

#### Defect

1. No backlight
2. Keyboard layout best suited to Apple products

## Samsers folding Bluetooth keyboard

If you want to tuck your wireless keyboard into your back pocket while on the go, you'll need a foldable model. Samsers' foldable Bluetooth keyboard does just that while remaining slim enough. It's compatible with almost any device and comes with a free phone mount. Additionally, the auto power-on and quick start-up feature ensures you can type quickly.

#### Advantage

1. Solid faux leather case
2. Easy pairing
3. Wide compatibility
4. Automatic power on/off
5. Phone holder included

#### Defect

1. Some keys are small in size

# Microsoft Designer Compact Keyboard

The Microsoft Designer Compact Keyboard may be a little more expensive than other wireless keyboards, but it offers many convenient features. One of them is the Expressive Input Key, which allows easy access to a variety of emojis. This is a keyboard that is comfortable to type on, has great battery life, and is compact and lightweight, making it a good choice for any traveler.

## Advantage

1. Very thin
2. Outstanding battery life
3. Great wireless range
4. Expressive Input Key and Screen-Snipping Key
5. Key spacing and key travel are optimized

## Defect

1. There is no adjustable stand
2. No backlight

# Logitech K480

For those who have to work on their phone or tablet on the go, the Logitech K480 has a built-in stand to keep your device in place. Although this increases the weight and size of the keyboard, you won't need to carry a separate stand. You can also pair the keyboard with up to 3 devices using Easy-Switch Dial for ease and convenience, and the keyboard is also durable and waterproof.

#### Advantage

1. Can pair with 3 devices at the same time
2. Good battery life
3. Easy-Switch Dial
4. Waterproof

#### Defect

1. Heavier than most wireless keyboards

## OMOTON Ultra-Slim Bluetooth Keyboard

For travelers with iPads and iPhones who don't want to invest in the expensive Apple Magic Keyboard, the OMOTON Ultra-Slim is a good alternative. While some minor issues may exist with the MacBook, it's a decent alternative for most other Apple products. It's lightweight and extremely thin, and can easily fit into any bag.

#### Advantage

1. Choose beautiful colors
2. Light and thin
3. Good price
4. Automatic sleep mode
5. Luxurious design

#### Defect

1. Operating distance 10 meters
2. Batteries not included
