

8 great free software for Windows users

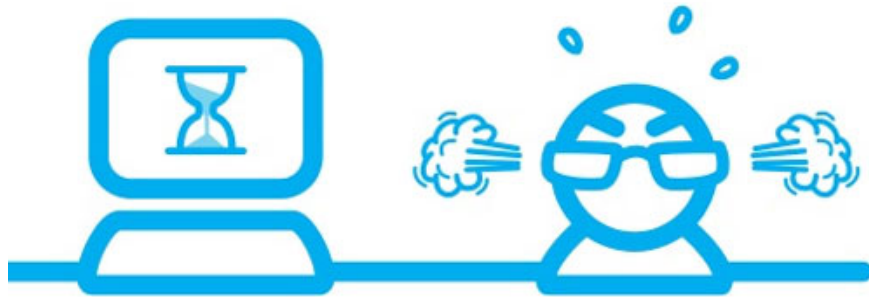

The software is free but very necessary to speed up the boot of the computer, recover the hard drive capacity, find stolen laptop etc ..

The software is free but very necessary to speed up the boot of the computer, recover the hard drive capacity, find stolen laptop etc .

1. Solutio

Solutio is the right software for computers with a long startup time. Every time the computer boots, Solutio will run and determine which programs take the most time to boot. After that, Solutio allows users to choose not to open these programs on subsequent launches.

If you are not sure whether you need to run a program when it starts up, Soluto will display a chart showing the proportion of Soluto users who choose to turn off that program for your reference.

In addition, Soluto also helps detect the time of hardware repair, change the default browser, homepage .

2. Microsoft Security Essentials

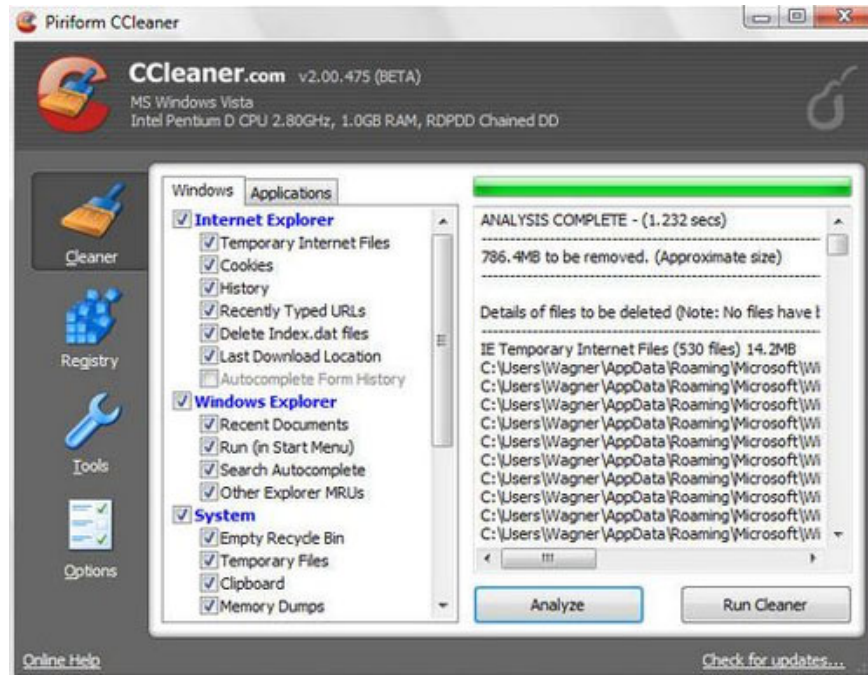

Although you are always aware of safe web surfing, **Microsoft Security Essential** free antivirus program is still not redundant. Microsoft Security Essential protects you from getting the latest viruses.

3. CCleaner

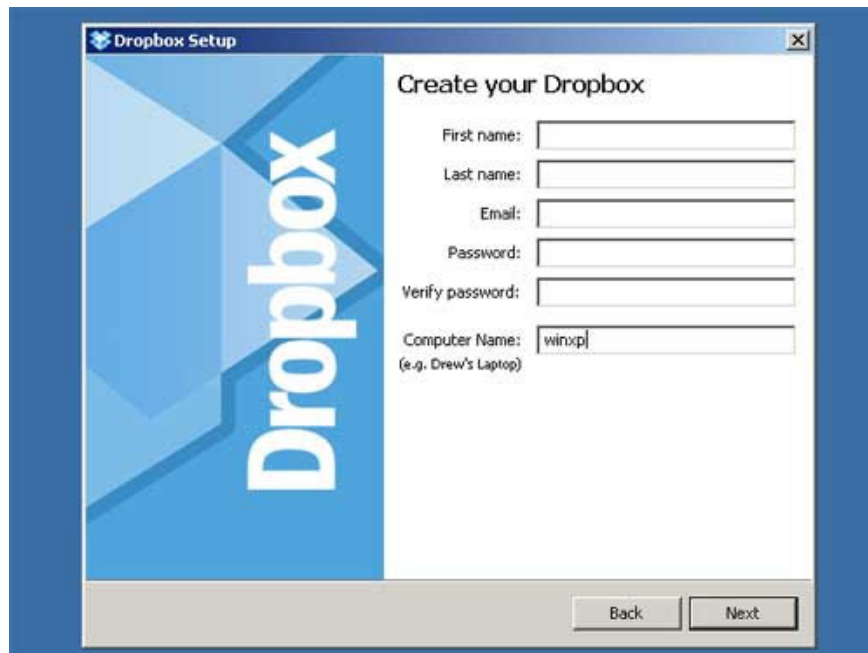

CCleaner scans a Windows computer to detect and remove junk files, restore hard drive capacity, remove software, and speed up your computer.

The highlight of CCleaner is simple, easy to use, fast and does not affect the system at launch.

4. Dropbox (or Google Drive, Microsoft SkyDrive)

Have you ever lost all your important pictures when your laptop suddenly broke down ?. Cloud storage services like **Dropbox** will help users automatically upload and store documents.

5. Prey

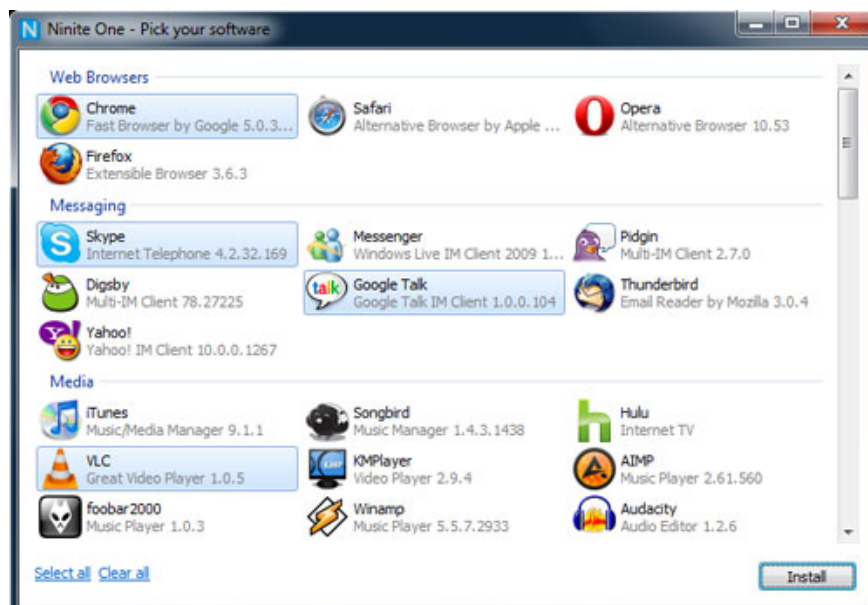

If you accidentally stole your laptop, **Prey** is a very unique software that will help you trace the thief through your IP address, Webcam photos or based on the Wi-Fi hotspot that the laptop connects to zone find.

In addition to laptops, Prey also supports phones and tablets.

6. Ninite

Ninite is not really a software, but a handy utility. When you first buy a computer or just reinstall the operating system, Windows users must perform a tedious process of reinstalling all applications.

To make things simpler, Ninite will help you install all the necessary free applications at the same time. You just go to the ninite.com homepage, choose the programs you like (eg Firefox, Skype .). Then download Ninite, which will install all those applications on your computer.

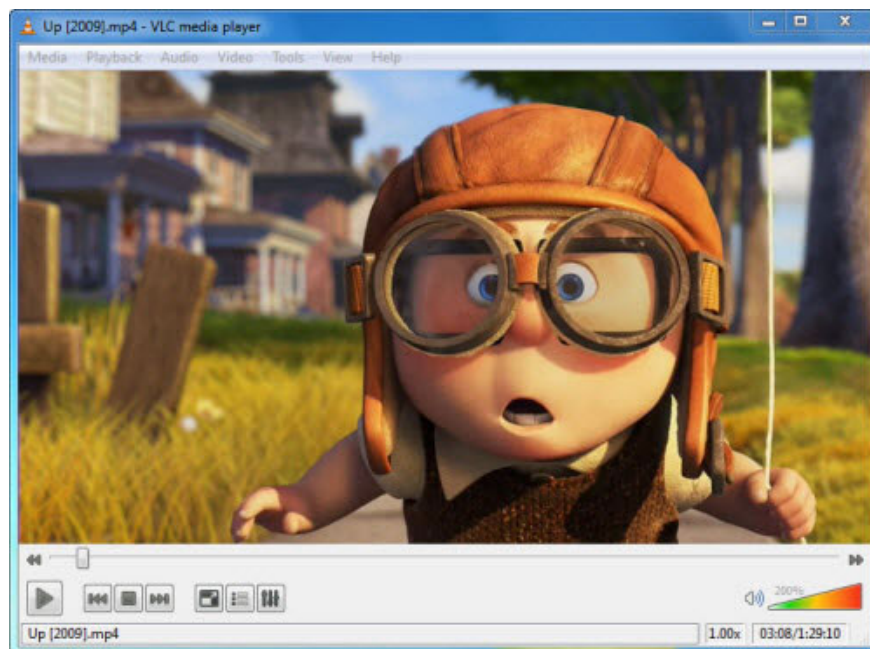

7. 7-Zip

7-Zip is a software used to compress and decompress folders.

8. VLC Media Player

With the advent of cloud storage services, **VLC Player** is no longer necessary as it once was. However, this is still a useful program for listening to music, watching television, movies, DVDs.
