

8 interesting features on Android 10 that you should experience

'Slowly but surely', Android 10 is gradually appearing on all Android phone models released in 2019.

Slowly but surely, Android 10 is gradually appearing on all Android phones released in 2019. Samsung, Sony, Huawei, Xiaomi, Oppo . most major smartphone manufacturers have sent Android updates. 10 to their flagship smartphones.

Instead of a major overhaul of the UI, Android 10 is primarily focused on a number of small but important features that help greatly in improving the overall user experience. Here are some of the top 10 Android features that you should definitely experience.

New navigation gestures

Google has released Android 9.0 Pie with navigation gestures designed in a way that is difficult to get used to. The issue has been fixed on Android 10 with iOS-inspired navigation style that is much more experienced. As follows:

1. **Back to main screen** : Swipe up from the bottom edge of the screen.
2. **Open the view of running applications** : Swipe up from the bottom and hold.
3. **Back**: Swipe from the left / right edge.
4. **Open Google Assistant** : Swipe diagonally from the bottom left / right corner and hold.

Control location access details

Android 10 marks an important step in the way the operating system handles application access rights and manages location data in a way that enhances the security and privacy of users. Currently Android 10 gives users an option to allow only location access for a specific app when it is launched. This way, you can rest assured knowing that an installed application will not be able to track you in the background without your permission.

Dark mode (dark mode)

Google has finally added a dark background mode for Android. This feature is very well optimized, seamlessly linked with system applications and even third-party applications, providing a seamless background experience for users. Not only the operating system, but all your installed applications will also switch to dark themes when you enable this feature.

1. Zalo for Android has supported Dark Mode, invite you to update and experience

Focus mode

Focus Mode is basically a utility that enhances user focus when working by enabling notification control as well as background activity of all applications on the device, thereby minimizing time when using phone screen when not needed - factors that affect concentration. In a nutshell, you just need to choose the apps that often distract you and pause them.

You can also set Auto Focus to turn on and off according to the schedule and specific time schedule you have chosen. And the new Take Break feature will allow you to schedule a Focus Mode interrupt.

TipsMake.com has an article on how to activate Focus Mode, please refer.

Smart Reply

Android 10 has become smarter in handling notifications from messaging apps. Now, depending on the content of the message, you will receive a related suggested action. For example, if you receive a message with the message "Hello", Smart Reply will display "Hello" as the recommended action. In particular, this feature will be compatible with third-party messaging applications such as WhatsApp, Telegram and Signal.

Update the system via Google Play

With every new release of Android, Google has always made great strides in making the platform safer and faster. In Android 10, Google makes it easier and faster to update security patches through Google Play, the same way you install app updates on your device.

This method will allow Google and OEM to bypass carrier certification thus greatly reducing the time it takes to deploy security updates to users.

Live Caption

This is a noticeable new accessibility feature in Android 10. Live Caption can automatically add subtitles to locally stored videos, podcasts and audio messages without requiring data, mobile or Wi-Fi.

New emoticons

Android 10 brings over 236 new emoticons and also modifies existing emoticons to make them richer and more adorable. Here are the new emoticons in Android 10:

There are many other new features in Android 10 that we haven't mentioned above including notification management, support for foldable devices, privacy handling, Family Link, etc. Words to explore!
